Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 6.39% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	87.29%	82.61%	89.58%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.52%*	*0.19%*	*0.71%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*12.16%*	*17.10%*	*9.69%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	87.59%	82.95%	89.81%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.29%*	*0.15%*	*0.33%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*12.09%*	*16.80%*	*9.83%*

Questo grafico rappresenta il 98.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 1.17% e la quota di investimenti in attività abilitanti era pari al 5.30%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 3.87%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **48.99%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 12.29%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un benchmark ESG ed è confrontato con il suo universo di riferimento per tutti gli aspetti ambientali e sociali.
Si rimanda alla sezione relativa alla performance degli indicatori di sostenibilità.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EUROPEAN EQUITY CONSERVATIVE

Identificativo della Persona Giuridica: 529900CA12DQSLAWW128

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **70.58%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento MSCI Europe Index. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.019 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.828** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.054 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.798 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

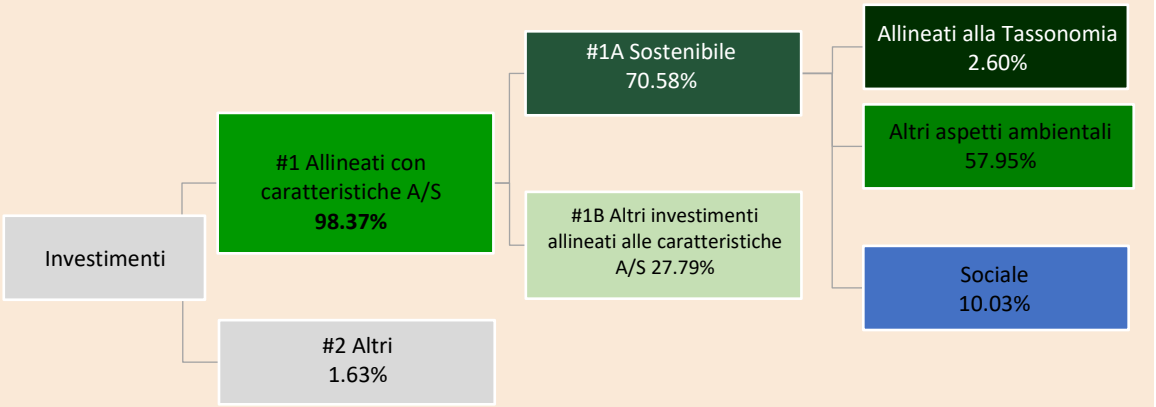
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 70.58% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 2.60% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.04%	93.32%	95.11%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.28%*	*0.06%*	*0.38%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.68%*	*6.61%*	*4.51%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.17%	93.46%	95.20%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.19%*	*0.05%*	*0.25%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.64%*	*6.49%*	*4.55%*

Questo grafico rappresenta il 99.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.30% e la quota di investimenti in attività abilitanti era pari al 3.27%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 3.03%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **57.95%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.03%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un benchmark ESG ed è confrontato con il suo universo di riferimento per tutti gli aspetti ambientali e sociali.

Si rimanda alla sezione relativa alla performance degli indicatori di sostenibilità.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EUROPEAN EQUITY DYNAMIC MULTI FACTORS

Identificativo della Persona Giuridica: 5493008YF0WLJMAHCR51

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **71.15%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **MSCI EUROPE (15) (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.000 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.828** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.91 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.798 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

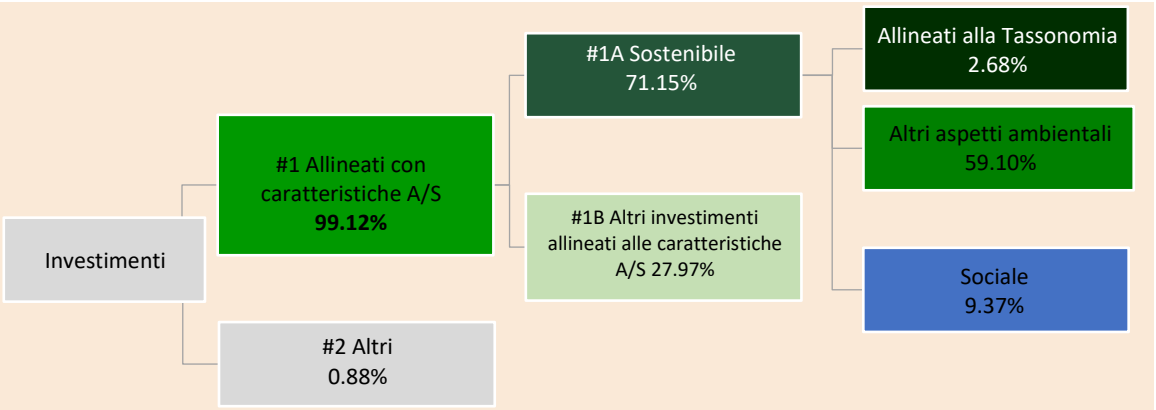
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 71.15% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 2.68% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

■ Allineati alla Tassonomia [Non gas e nucleare]	*5.68%*	*7.90%*	*4.02%*

Questo grafico rappresenta il 99.7% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.19% e la quota di investimenti in attività abilitanti era pari al 2.60%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.08%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **59.10%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.37%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL EQUITY CONSERVATIVE

Identificativo della Persona Giuridica: 529900QOYD9Y5ZBAUZ70

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **42.07%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **MSCI World Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.082 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.185** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.021 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.179 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

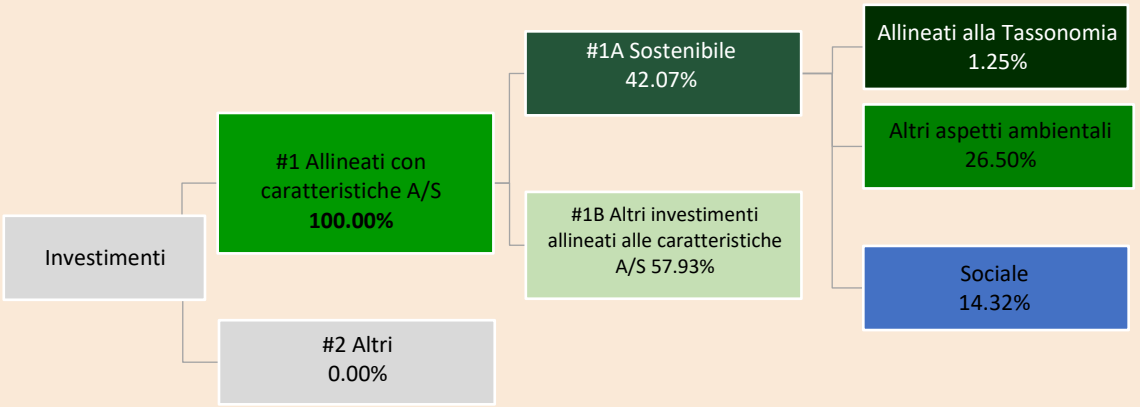
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 42.07% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.25% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.52%	95.88%	97.54%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.47%*	*4.09%*	*2.43%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.50%	95.86%	97.53%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.49%*	*4.12%*	*2.45%*

Questo grafico rappresenta il 99.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.11% e la quota di investimenti in attività abilitanti era pari al 1.78%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.87%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **26.50%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 14.32%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL EQUITY DYNAMIC MULTI FACTORS

Identificativo della Persona Giuridica: 549300YXILW3O14Y0587

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.92%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **MSCI World (dividendi reinvestiti) Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.076 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.185** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.079 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.179 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

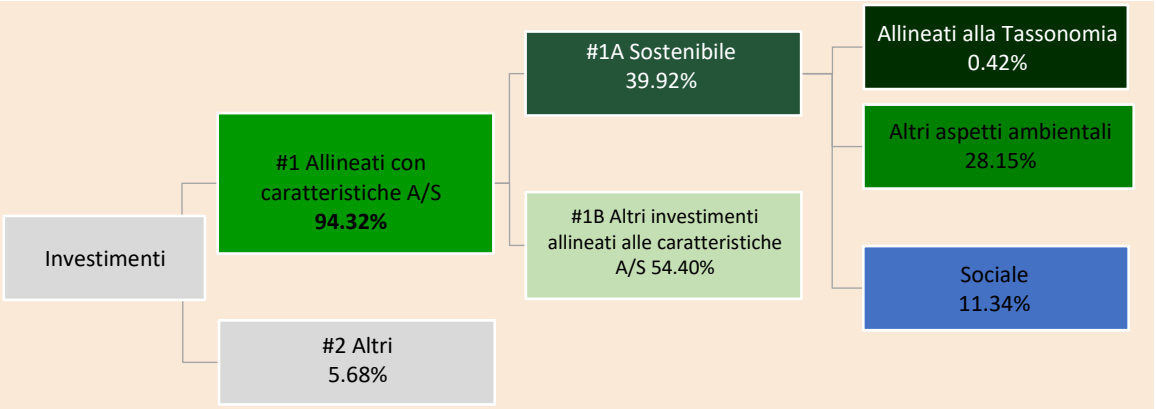
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 39.92% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.42% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.10%	98.65%	99.15%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.90%*	*1.32%*	*0.82%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.10%	98.65%	99.15%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.90%*	*1.32%*	*0.82%*

Questo grafico rappresenta il 100.0% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.07% e la quota di investimenti in attività abilitanti era pari al 0.43%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.17%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **28.15%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 11.34%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EUROPEAN CONVERTIBLE BOND

Identificativo della Persona Giuridica: 529900644PSS3LALW918

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **61.00%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **REFINITIV EUROPEAN CONVERTIBLE HEDGED (EUR) INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.774 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.768** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.037 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.675 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

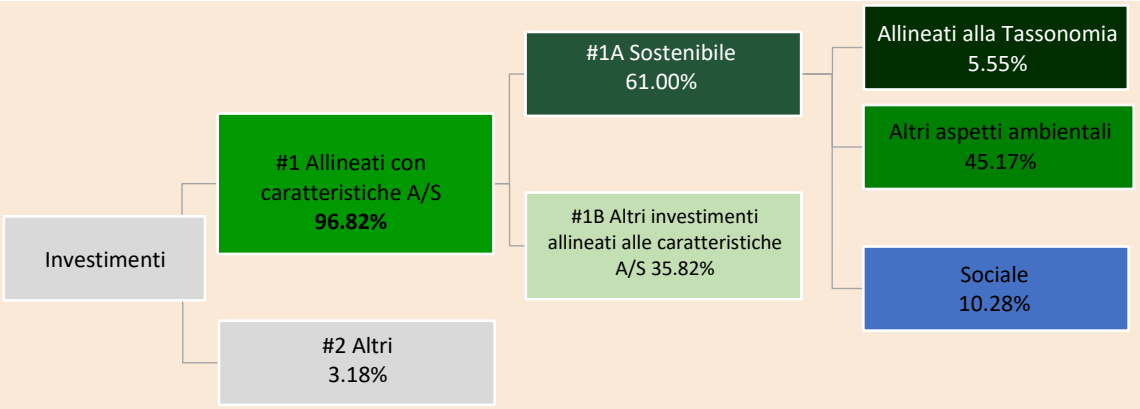
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 61.00% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 5.55% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	89.82%	87.28%	92.21%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.05%*	*0.08%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*10.18%*	*12.67%*	*7.71%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	89.82%	99.36%	92.21%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.05%*	*0.08%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*10.18%*	*12.67%*	*7.71%*

Questo grafico rappresenta il 100.0% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.47% e la quota di investimenti in attività abilitanti era pari al 4.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 3.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia è stata pari al **45.17%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.28%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Amundi Funds Montpensier Global Convertible Bond

Identificativo della Persona Giuridica:

529900LZ9GLOP969J692

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di attività economiche ecosostenibili. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Oui**	☒ **Non**
☐ **Ha effettuato degli investimenti sostenibili con un obiettivo ambientale: ___% del patrimonio netto del fondo**	☒ **Ha promosso caratteristiche ambientali/sociali (A/S) e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del 35.7% di investimenti sostenibili**
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ **Ha effettuato degli investimenti sostenibili con un obiettivo sociale: ___% del patrimonio netto del fondo**	☐ Ha promosso caratteristiche di A/S, ma **non ha effettuato alcun investimento sostenibile**

Una Società viene identificata come sostenibile dal gestore patrimoniale, applicando la metodologia descritta nella Politica ESG disponibile sul sito montpensier-arbevel.com.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il fondo integra i fattori di sostenibilità nel proprio processo d'investimento, come indicato più dettagliatamente di seguito e nel capitolo "Strategia d'investimento" del Prospetto informativo.
I criteri ESG sono presi in considerazione dal fondo al fine di unificare la performance finanziaria e il desiderio di influenzare positivamente, quando possibile, l'emittente in termini di performance ESG, incoraggiando le società a migliorare l'integrazione dei criteri ESG nelle proprie attività e valorizzando le migliori pratiche.

La società di gestione ha applicato la politica descritta nel documento precontrattuale per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo paragrafo, del regolamento (UE) 2020/852.

Il 36.84% del portafoglio investito, esclusa la liquidità e i mezzi equivalenti e qualsiasi organismo di investimento collettivo (ovvero il 35.66% del patrimonio netto del fondo), è costituito da investimenti sostenibili.

L'intensità media ponderata di carbonio e l'impronta di carbonio del portafoglio sono significativamente inferiori al proprio indice.

Le proporzioni sono simili quando si aggiunge lo Scope 3: l'intensità e l'impronta di carbonio del portafoglio sono inferiori a quelle dell'indice.
Ricordiamo che in precedenza lo Scope 3 Tier 1 teneva conto delle emissioni dei fornitori diretti del prodotto finale, mentre lo Scope 3 Upstream ha un ambito più ampio, che tiene conto delle emissioni legate al trasporto e alla distribuzione dei prodotti acquistati dall'azienda tra i suoi fornitori Tier 1 e le sue attività, oltre ad altri servizi quali la logistica in entrata, la logistica in uscita, il trasporto e la distribuzione tra i siti dell'azienda.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Come si sono comportati gli indicatori di sostenibilità?

Gli indicatori utilizzati per dimostrare che il comparto ha promosso caratteristiche ambientali e/o sociali sono i seguenti:

Quota di investimenti conformi alla politica di esclusione di Montpensier Arbevel: 100%
Quota di investimenti con rating B o superiore (su una scala da CCC a AAA): 100%
Quota degli investimenti coinvolti in una controversia “Rossa” secondo MSCI 0%
Quota degli investimenti soggetti alla metodologia Montpensier Arbevel Industry Contributor, comprensiva di un’analisi qualitativa best-in-class: 100%

Rispetto del Global Compact: Peso delle società in portafoglio identificate come conformi ai principi del Global Compact delle Nazioni Unite.

... e rispetto ai periodi precedenti?

Vedi sopra.

Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario ha in parte realizzato e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?

L'obiettivo degli investimenti sostenibili effettuati in parte dal Comparto era contribuire e allinearsi a uno degli Obiettivi di Sviluppo Sostenibile stabiliti dalle Nazioni Unite.

La metodologia di Montpensier Arbevel per identificare gli investimenti sostenibili si basa sulle seguenti componenti:

- La valutazione del contributo a un obiettivo di sostenibilità, che si basa su un approccio di best effort, con l'obiettivo di individuare il coinvolgimento delle società sulla base di criteri ambientali e/o sociali, nonché su un approccio basato sugli Obiettivi di Sviluppo Sostenibile (SDG) e su un'esposizione ad attività sostenibili, determinate secondo una definizione interna di "attività definite come sostenibili";

- Valutare la conformità ai principi di buona governance, sulla base della nostra analisi dell'allineamento degli interessi tra management, azionisti e stakeholder in generale;

- La valutazione del principio "non arrecare un danno significativo" (DNSH) che si basa su esclusioni settoriali, sui Principali Effetti Negativi (PAI) e sul monitoraggio delle controversie anche in termini di governance.

Si consiglia di fare anche riferimento al Prospetto informativo e al Documento precontrattuale SFDR allegato al prospetto dell'OICR, disponibili sul sito web della società di gestione.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?

In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?

La valutazione del principio "Non arrecare un danno significativo" (Do Not Significantly Harm, DNSH) si basa su:
- La nostra Analisi SRI, Fase 1: esclusione delle società coinvolte in attività controverse: produzione di armi, estrazione di carbone, tabacco, intrattenimento per adulti, gioco d'azzardo, OGM e olio di palma.
- Fase 2, ossia l'esclusione delle società con rating "CCC" o "Red Controversy Vigilance" secondo MSCI ESG Research;

- Considerazione dei PAI (Principal Adverse Impacts) attraverso un approccio qualitativo nell'analisi SRI dei titoli. Gli indicatori relativi agli impatti negativi principali delle decisioni di investimento sui fattori di sostenibilità sono elencati in appendice.

Inoltre, le società con un impatto ambientale o sociale MIA negativo, o pilastri A e S, sono considerate in deroga al principio DNSH.

Si rimanda inoltre al Prospetto informativo e al Documento precontrattuale SFDR allegato al prospetto dell'OICR, disponibili sul sito web della società di gestione.

Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:

Escludiamo dal nostro universo d'investimento le società che non sono allineate con alcune norme e convenzioni internazionali, in particolare il Global Compact delle Nazioni Unite (UNGC), le linee guida OCSE destinate alle imprese multinazionali, l'Organizzazione Internazionale del Lavoro (OIL) e i Principi Guida delle Nazioni Unite su Imprese e Diritti Umani (UNGPBHR).
Le società che sono oggetto di una controversia "Rossa" sono escluse dall'universo d'investimento. Tra queste controversie "Rosse" si annoverano le aziende che non sono in linea con il Global Compact delle Nazioni Unite (Diritti Umani, Diritti del Lavoro, Ambiente e Corruzione).

La Tassonomia dell'UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia dell'UE, ed è accompagnata da criteri specifici dell'Unione.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Teniamo conto dei principali indicatori di impatto negativo nella politica di esclusioni settoriali e normative, l'analisi delle buone pratiche di governance (utilizzando la Montpensier Governance Flag - MGF), l'analisi qualitativa esclusiva del contributo delle aziende alle transizioni ambientali e solidali (Montpensier Impact Assessment - MIA, Montpensier Industry Contributor - MIC), e/o nell'analisi delle eco-attività che determina il contributo a uno o più Obiettivi di Sviluppo Sostenibile (SDGs) delle Nazioni Unite.
La rilevanza e la copertura di questi indicatori nell'analisi variano a seconda del settore, dell'industria e della regione in cui opera ogni azienda.

Gli indicatori relativi agli impatti negativi principali delle decisioni di investimento sui fattori di sostenibilità sono elencati in appendice.

Le informazioni sugli obiettivi ambientali, sociali e di governance (ESG) sono disponibili sul sito web della società di gestione: https://www.montpensier-arbevel.com/sites/default/files/public/documents/politique-esg.pdf

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'Unione europea per le attività economiche sostenibili dal punto di vista ambientale.
Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'Unione europea per le attività economiche sostenibili dal punto di vista ambientale.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia:

Maggiori Investimenti	Settore	% Asset	Paese
Ping An Insurance - 0.875% - 07/2029	Assicurazioni	2.37%	Cina
Uber Technologies Inc - 0.875% - 12/2028	Prodotti e servizi di consumo	2.27%	Stati Uniti

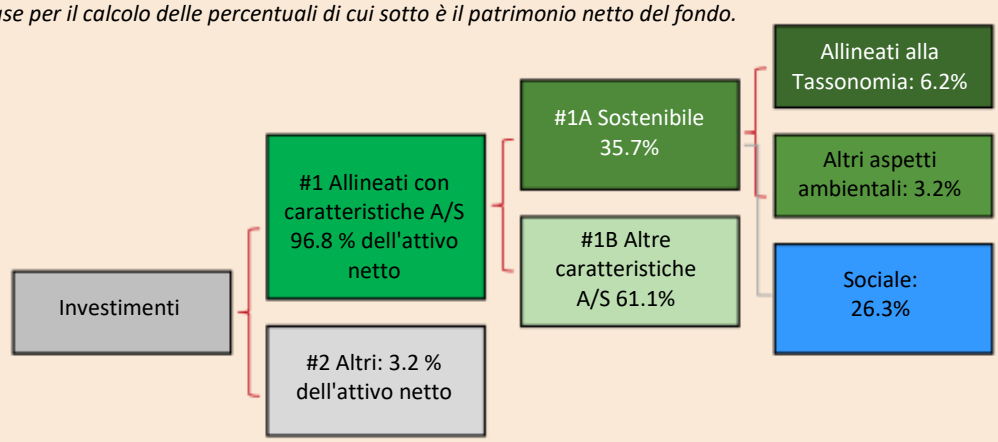
Peso totale delle prime 15 linee rispetto al patrimonio netto del fondo al 30/06/25		24.1%	

Qual è stata la quota di investimenti legati alla sostenibilità?

Qual è stata l'allocazione degli asset?

L'asset allocation descrive la quota di investimenti in asset specifici.

La base per il calcolo delle percentuali di cui sotto è il patrimonio netto del fondo.



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria #1 Allineati con caratteristiche A/S comprende:
- La sottocategoria #1A Sostenibili contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria #1B Altri investimenti allineati alle caratteristiche A/S contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

In quali settori economici sono stati effettuati gli investimenti?

	% AUM Investimenti sostenibili	% AUM Portafoglio investito

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare**, i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie;

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE?

Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla tassonomia UE?[1]

[X] Sì:

[X] In gas fossile [X] In energia nucleare

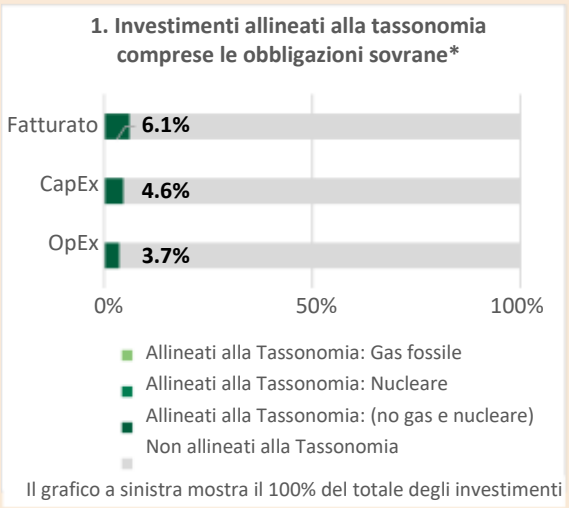
[ ] No

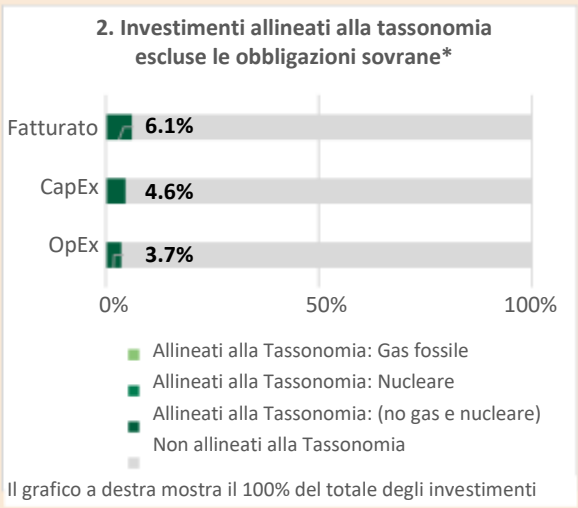
I dati relativi al coinvolgimento delle aziende nelle attività legate al gas fossile e/o all'energia nucleare, in linea con la tassonomia, sono determinati prendendo in considerazione solo i dati pubblicati dalle aziende.
Non sono ancora disponibili dati sul coinvolgimento delle aziende in attività di gas fossile e/o energia nucleare conformi alla tassonomia.

A titolo informativo, i titoli identificati come coinvolti nell'energia fossile e/o nucleare rappresentano il 10.62% del portafoglio, vale a dire il 7.87% del portafoglio per i titoli che derivano parte delle loro vendite dall'energia nucleare e il 3.87% per i titoli coinvolti nell'energia fossile.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- fatturato riflette la "ecocompatibilità" delle società partecipate oggi.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, rilevanti per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.





** Ai fini dei grafici di cui sopra, per 'obbligazioni sovrane' si intendono tutte le esposizioni sovrane.*
Il fatturato è stimato da MSCI ESG Research in base alla metodologia descritta di seguito.
I dati CapEx e Opex tengono conto solo dei dati pubblicati dalle aziende.

La percentuale di allineamento con la tassonomia sopra indicata rappresenta il contributo del portafoglio in media ponderata all'allineamento alla tassonomia europea (in base al fatturato, CapEx od OpEx) di tutti gli investimenti sostenibili, che abbiano un obiettivo ambientale o sociale.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla Tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Allineamento della tassonomia europea
L'allineamento della tassonomia europea è stimato da MSCI ESG Research in base alla percentuale massima del fatturato di una società derivante da prodotti e servizi che perseguono obiettivi ambientali, sulla base del quadro MSCI Sustainable Impact Metrics.
La percentuale di vendite generate da prodotti e servizi che soddisfano gli obiettivi ambientali è ridotta a 0 per le aziende che non soddisfano i criteri "Non arrecare un danno significativo" e "Garanzie minime di salvaguardia sociale" della tassonomia europea.
Lo stesso vale per le aziende i cui ricavi derivano dalla fornitura, distribuzione o vendita al dettaglio di prodotti del tabacco in misura pari o superiore al 5% e le aziende coinvolte in armi controverse.

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili

Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?

Il Comparto non prevede una quota minima di investimenti in attività transitorie o abilitanti.

In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?

	30/06/25	28/06/24	30/06/23
Allineamento alla tassonomia europea	**% AUM**	**% AUM**	**% AUM**
Amundi Funds Montpensier Global Convertible	6.1%	8.4%	9.5%

La percentuale sopra indicata rappresenta il contributo del portafoglio all'allineamento alla tassonomia europea (in base al fatturato) di tutti gli investimenti sostenibili, che abbiano un obiettivo ambientale o sociale.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non erano allineati alla Tassonomia UE?

Alla data della presente relazione, il 9.4% del patrimonio netto era investito in investimenti sostenibili con un obiettivo ambientale, mentre il 3.2% non era allineato alla tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

Alla data della presente relazione, il 26.3% del patrimonio netto era investito in investimenti sostenibili con finalità sociali.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

La liquidità, i mezzi equivalenti ed eventuali fondi o derivati di copertura rappresentano il 3.2% del patrimonio netto del fondo e non offrono garanzie ambientali o sociali minime.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

La società di gestione ha applicato la politica descritta nel documento informativo precontrattuale per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo paragrafo, del regolamento (UE) 2020/852.

La politica di coinvolgimento degli azionisti di Montpensier Arbevel consiste in una politica di voto e in una politica di coinvolgimento.

L'esercizio dei diritti di voto è un elemento importante del dialogo con gli emittenti. Incoraggia le migliori pratiche di governance e promuove l'etica professionale.
Montpensier Arbevel ritiene che l'esercizio dei diritti di voto sia parte integrante del processo di gestione degli investimenti e debba essere effettuato nel migliore interesse dei propri clienti. La politica dei diritti di voto di Montpensier Arbevel mira a promuovere la valutazione a lungo termine degli investimenti dei suoi fondi.

Per esercitare i diritti di voto connessi alle azioni detenute dal fondo, i gestori fanno riferimento ai principi relativi alle raccomandazioni di corporate governance pubblicati da ISS Governance, nella sua Politica di sostenibilità. L'ISS copre tutte le società presenti nei portafogli dei fondi gestiti da Montpensier Arbevel.
Le norme di conformità richiedono che i gestori di portafoglio svolgano le loro funzioni in modo indipendente, in particolare per quanto riguarda gli emittenti, e nell'interesse esclusivo delle quote / degli azionisti. I gestori di portafoglio prestano particolare attenzione alle delibere che possono pregiudicare gli interessi delle quote / degli azionisti.
La politica di voto completa e l'ultima relazione sull'esercizio dei diritti di voto sono disponibili sul nostro sito web.

Montpensier Arbevel integra la sua politica di voto con una politica di impegno.
I team di gestione dei fondi sono incoraggiati a sollevare qualsiasi preoccupazione con le società durante le riunioni, in particolare quando le questioni ESG sembrano non essere sufficientemente prese in considerazione, al fine di incoraggiare queste società a migliorare le loro pratiche in materia ambientale, sociale e
di governance aziendale, tutti fattori di crescita sostenibile.
I gestori del fondo, coadiuvati dagli analisti ISR, instaureranno un rapporto positivo e costruttivo a medio-lungo termine con le società in portafoglio.
Questa relazione è poliedrica:
✓ Contatti aziendali;
✓ Comunicare alla società le intenzioni di voto dei gestori dei fondi prima dell'Assemblea generale.

Oltre alle iniziative di coinvolgimento diretto che di solito conduce direttamente con le Piccole e Medie Imprese, Montpensier Arbevel partecipa anche ad azioni di coinvolgimento collettivo implementate da ISS come parte del suo programma ISS ESG, in particolare per le società più grandi.

Questo dialogo è condotto con l'obiettivo di:
✓ Incoraggiare le aziende a definire un impegno ESG;
✓ Incoraggiare le aziende a comunicare le loro pratiche ESG.

La politica di coinvolgimento completa e l'ultima relazione sul coinvolgimento sono disponibili sul nostro sito web.
L'ultimo rapporto di engagement è disponibile all'indirizzo: https://www.montpensier-arbevel.com/sites/default/files/public/documents/engagement_rapport.pdf

Come si è comportato questo prodotto finanziario rispetto al benchmark sostenibile di riferimento?

I benchmark di riferimento sono indici atti a misurare se il prodotto finanziario raggiunge l'obiettivo sostenibile.

Il fondo non utilizza un benchmark sostenibile. La sua performance di sostenibilità viene confrontata con il suo benchmark: Refinitiv Global Conv Focus EUR

- ***In che modo l'indice designato differisce da un indice generale di mercato pertinente?***

  N/A

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento alle caratteristiche ambientali o sociali che promuove?***

  N/A

Principali impatti negativi delle decisioni di investimento sui fattori di sostenibilità

Amundi Funds Montpensier Global Convertibile

Gli indicatori relativi ai principali impatti negativi sui fattori di sostenibilità coprono un periodo di riferimento che va dal 1° gennaio 2024 al 31 dicembre 2024. Ai sensi dell'articolo 6 del Regolamento delegato 2022/1288, l'impatto corrisponde all'impatto medio al 31 marzo, 30 giugno, 30 settembre e 31 dicembre del periodo. I calcoli si basano sui portafogli alla fine del trimestre e sui dati disponibili al 31 dicembre.

Descrizione dei principali impatti negativi sui fattori di sostenibilità

[Informazioni previste dall'articolo 6 del Regolamento delegato (UE) 2022/1288]

Descrizione dei principali impatti negativi sui fattori di sostenibilità

Indicatori applicabili agli investimenti in società						
Indicatore di impatto negativo sulla sostenibilità		**Elemento di misura**	**Impatto 2024**	**Impatto 2023**	**Tasso di copertura 2024**	**Tasso di copertura 2023**
CLIMA E ALTRI INDICATORI AMBIENTALI						
Emissioni di gas a effetto serra	1. Emissioni di gas serra	Emissioni di gas serra di livello 1	1 777		98.45%

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO AGGREGATE BOND

Identificativo della Persona Giuridica: 529900DJK6EP37QSNF19

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **45.05%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **5% JP MORGAN EMBI GLOBAL+ 85% BLOOMBERG EURO AGGREGATE + 10% ICE BOFA GLOBAL HIGH YIELD Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.035 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.952** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.036 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.930 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

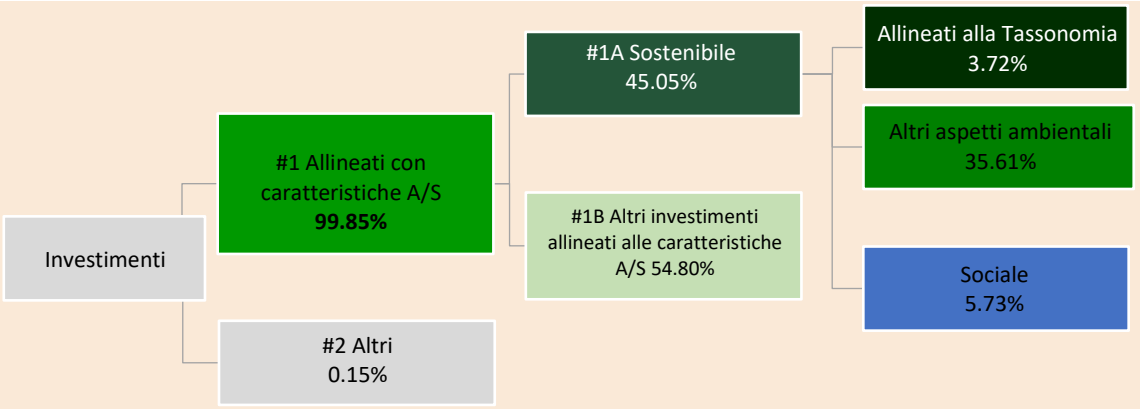
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 45.05% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 3.72% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.83%	95.34%	95.27%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.41%*	*0.65%*	*0.51%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.76%*	*3.91%*	*4.19%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.04%	92.87%	94.28%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.16%*	*0.06%*
■ Allineati alla Tassonomia: Nucleare	*0.03%*	*0.75%*	*0.69%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.92%*	*6.23%*	*4.97%*

Questo grafico rappresenta il 54.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.33% e la quota di investimenti in attività abilitanti era pari al 0.40%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.43%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **35.61%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.73%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO CORPORATE BOND SELECT

Identificativo della Persona Giuridica: EJCJD2QBJY0UVP7HMP10

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **54.16%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG EURO AGGREGATE CORPORATE (E) (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.768 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.564** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.030 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.537 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

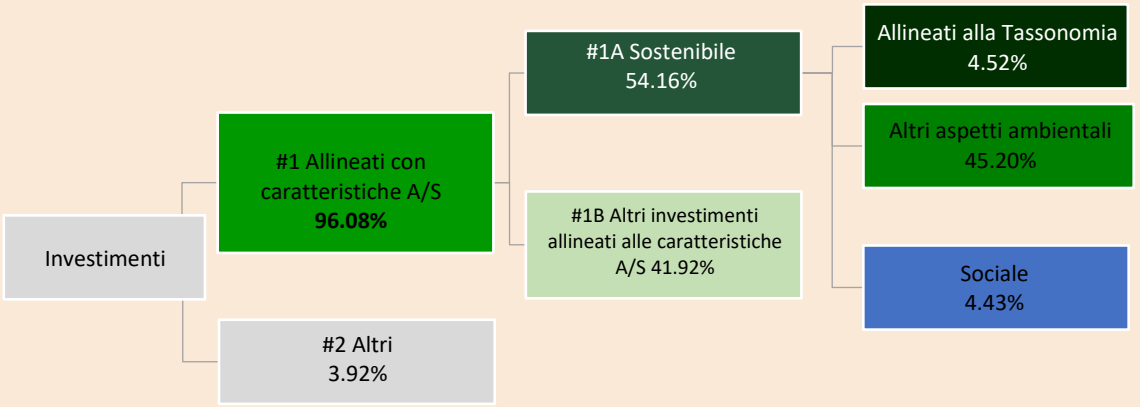
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 54.16% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 4.52% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.11%	91.64%	93.61%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.15%*	*0.04%*
■ Allineati alla Tassonomia: Nucleare	*1.02%*	*1.03%*	*0.98%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.87%*	*7.18%*	*5.37%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.05%	92.46%	94.06%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.14%*	*0.05%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.45%*	*0.43%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.94%*	*6.94%*	*5.46%*

Questo grafico rappresenta il 93.0% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.78% e la quota di investimenti in attività abilitanti era pari al 0.94%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.91%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **45.20%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.43%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare***

l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO GOVERNMENT BOND RESPONSIBLE

Identificativo della Persona Giuridica: 529900SX4UQ95340NW59

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **34.25%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove caratteristiche ambientali e/o sociali investendo almeno il 30% del patrimonio netto in obbligazioni Green, Social e Sustainability (GSS) che soddisfano i criteri e le linee guida dei Green Bond Principles (GBP), dei Social Bond Principles (SBP) o delle Sustainability Bond Guidelines (SBG) pubblicati dall'ICMA. Inoltre, sono esclusi gli emittenti con un rating ESG pari a F o G.

Il Comparto era gestito attivamente facendo riferimento al JP Morgan EMU Government Bond Investment Grade Index e mirava a sovraperformare tale indice (al netto delle commissioni applicabili) nell'arco del periodo di detenzione raccomandato. Il Comparto era principalmente esposto agli emittenti inclusi nel Benchmark; tuttavia, la gestione del Comparto era discrezionale ed era esposto anche a emittenti non inclusi nel Benchmark. Il Comparto monitorava l'esposizione al rischio rispetto al Benchmark, tuttavia il livello di deviazione dal Benchmark era prevedibilmente significativo.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.319 (C).**
- Il rating ESG medio ponderato dell'indice di riferimento è **1.304 (C)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

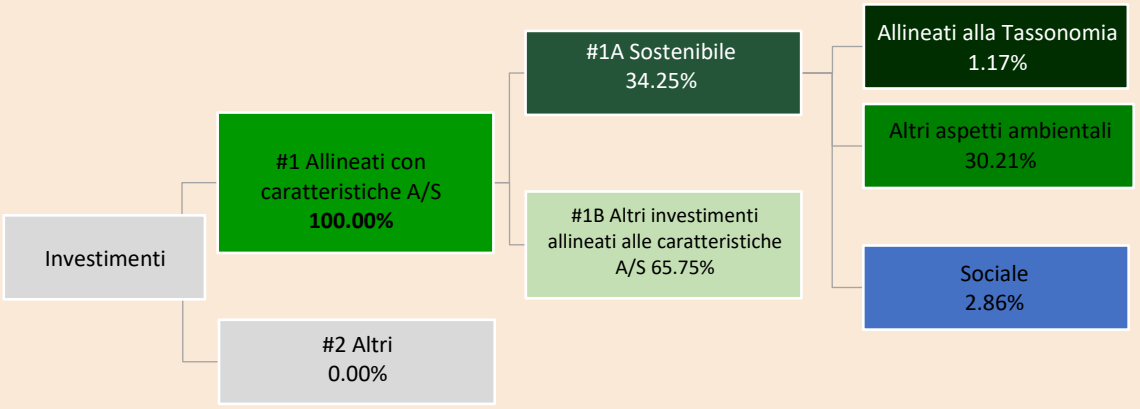
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 34.25% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	*Sottosettori*	*% Asset*

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.17% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.99%	99.91%	98.80%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.01%*	*0.07%*	*1.18%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	73.60%	15.18%	32.56%
■ Allineati alla Tassonomia: Gas	*1.07%*	*3.20%*	*1.04%*
■ Allineati alla Tassonomia: Nucleare	*0.18%*	*34.07%*	*23.38%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*25.12%*	*47.55%*	*4302%*

Questo grafico rappresenta il 0.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.01%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **30.21%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.86%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS STRATEGIC BOND

Identificativo della Persona Giuridica: 5493009E9QZ9NKKEW632

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **30.09%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto ha promosso le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento.

Nel determinare lo score ESG del Comparto e dell'Universo d'Investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance.

Non è stato designato alcun Indice ESG di riferimento.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.160 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.151 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

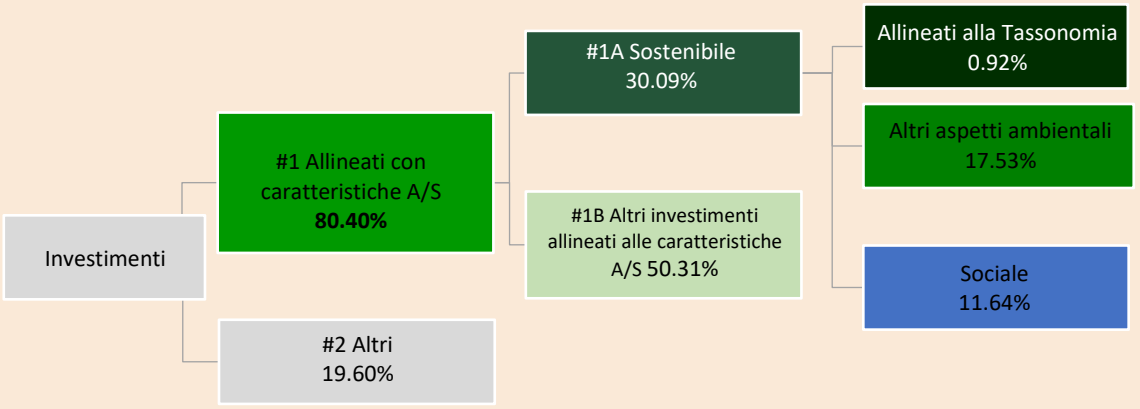
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 30.09% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.92% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.36%	96.58%	97.21%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.22%*	*0.35%*	*0.39%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.42%*	*3.04%*	*2.38%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.35%	96.57%	97.21%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.21%*	*0.22%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.65%*	*3.19%*	*2.56%*

Questo grafico rappresenta il 92.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.14% e la quota di investimenti in attività abilitanti era pari al 0.52%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.55%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **17.53%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 11.64%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **40.87%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ML European Curr H YLD BB-B Rated Constrained Hed Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.356 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.252** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.487 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.315 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

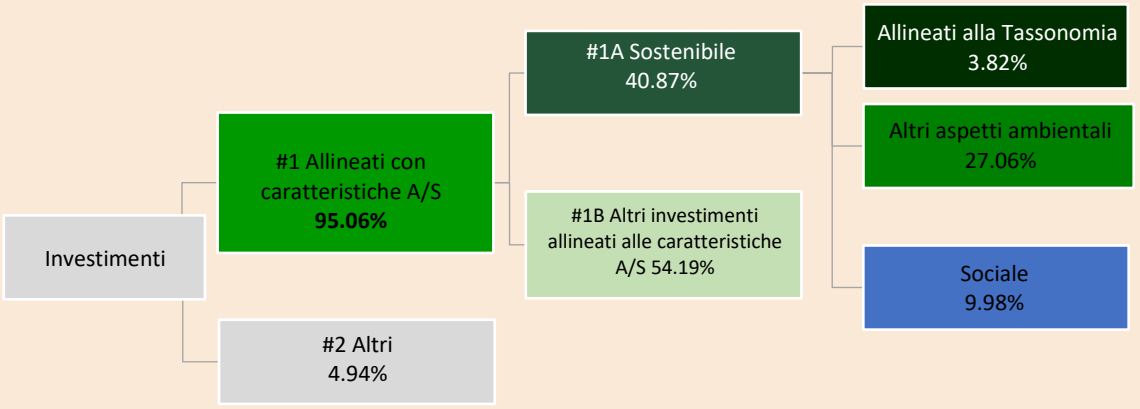
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 40.87% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 3.82% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	91.39%	90.96%	93.48%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*2.07%*	*1.66%*	*1.51%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*6.50%*	*7.28%*	*4.97%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.44%	93.86%	95.60%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.11%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.15%*	*0.13%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.53%*	*5.87%*	*4.23%*

Questo grafico rappresenta il 94.7% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 1.39% e la quota di investimenti in attività abilitanti era pari al 1.44%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.69%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.6%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.98%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO HIGH YIELD SHORT TERM BOND

Identificativo della Persona Giuridica: 529900Q3IK91XCA88E07

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ Si	☒ No
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.82%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **Merril Lynch Euro High Yield 1-3 Non Fin, BB-B,Constrained Index.**
Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.392 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.280** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.567 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.309 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

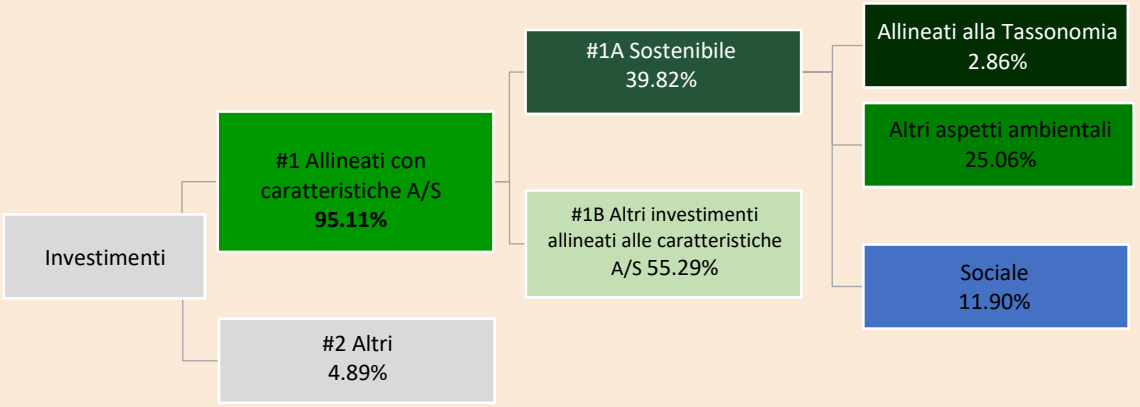
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 39.82% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 2.86% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	89.84%	90.02%	93.86%
■ Allineati alla Tassonomia: Gas	*0.05%*	*0.11%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*1.40%*	*1.07%*	*1.25%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*8.72%*	*8.80%*	*4.85%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	91.95%	92.06%	95.79%
■ Allineati alla Tassonomia: Gas	*0.05%*	*0.12%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.05%*	*0.03%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*8.00%*	*7.75%*	*4.15%*

Questo grafico rappresenta il 96.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 1.28% e la quota di investimenti in attività abilitanti era pari al 1.77%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.79%.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **25.06%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 11.90%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO SUBORDINATED BOND RESPONSIBLE

Identificativo della Persona Giuridica: 2221006F1314ERENWD22

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **69.13%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG EURO AGGREGATE CORPORATE INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.979 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.564** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 1.097 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.537 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

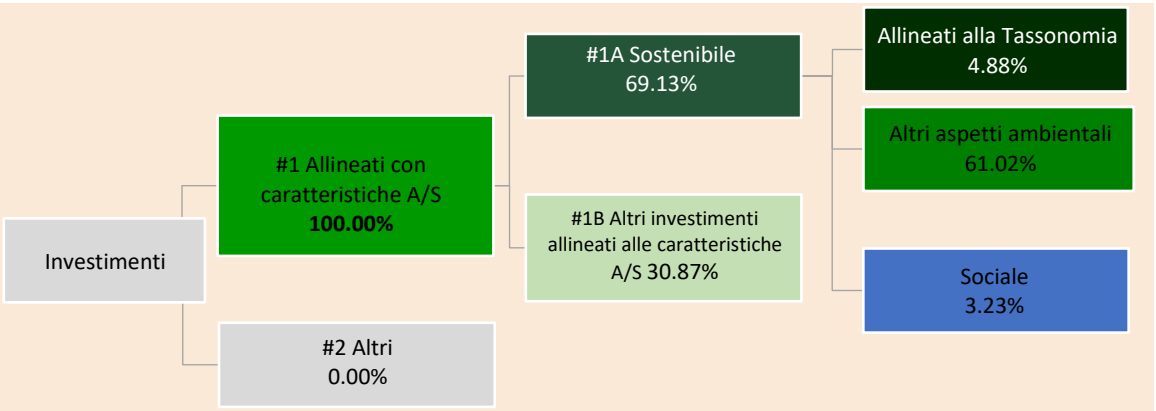
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 69.13% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 4.88% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	93.78%	93.09%	91.38%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.35%*	*0.13%*
■ Allineati alla Tassonomia: Nucleare	*0.98%*	*1.64%*	*1.79%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.25%*	*4.92%*	*6.70%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.90%	94.10%	92.16%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.36%*	*0.13%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.95%*	*0.96%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.10%*	*4.59%*	*6.75%*

Questo grafico rappresenta il 97.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 1.46% e la quota di investimenti in attività abilitanti era pari al 1.08%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.28%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **61.02%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.23%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL HIGH YIELD BOND RESPONSIBLE

Identificativo della Persona Giuridica: 213800O2125EN6NGE460

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **37.66%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.178 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.333** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.371 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.303 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
KW 4.75% 02/30	Corporate	Altre attività finanziarie	Stati Uniti	1.86%

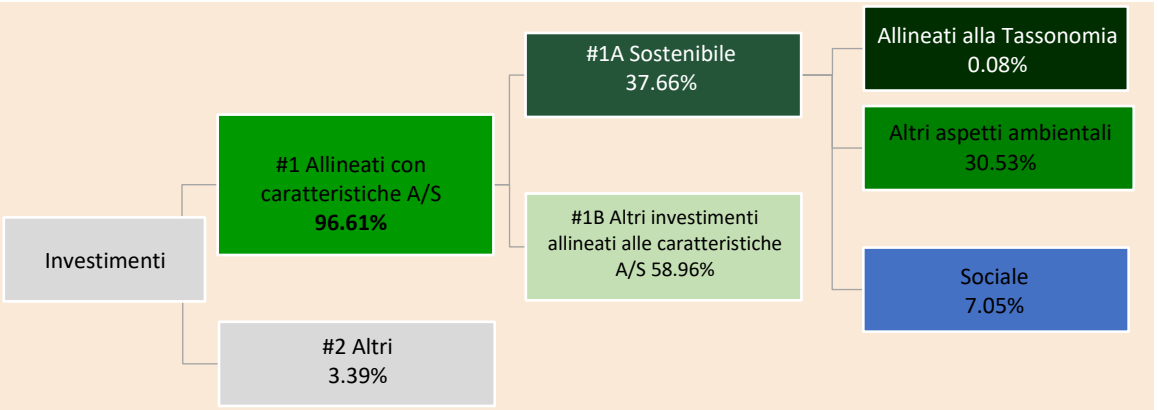
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 37.66% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.08% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.82%	99.71%	99.92%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.07%*	*0.06%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.18%*	*0.22%*	*0.01%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.81%	99.71%	99.92%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.07%*	*0.06%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.19%*	*0.22%*	*0.01%*

Questo grafico rappresenta il 98.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari al 0.01%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.01%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **30.53%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 7.05%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL SUBORDINATED BOND

Identificativo della Persona Giuridica: 549300YM7XSURJOGN349

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **45.33%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento, composto per il **37.5% dall'ICE BofA ML Global Hybrid Non-Financial Corporate Index (coperto in EUR),** per il **30% dall'ICE BofA ML Contingent Capital Index (coperto in EUR),** per il **15% dall'ICE BofA ML Perpetual Preferred Securities Index (coperto in EUR)** e per il **17.5% dall'ICE BofA ML Global Hybrid Non-Financial High Yield Index (coperto in EUR).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.591 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.425** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.560 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.42 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

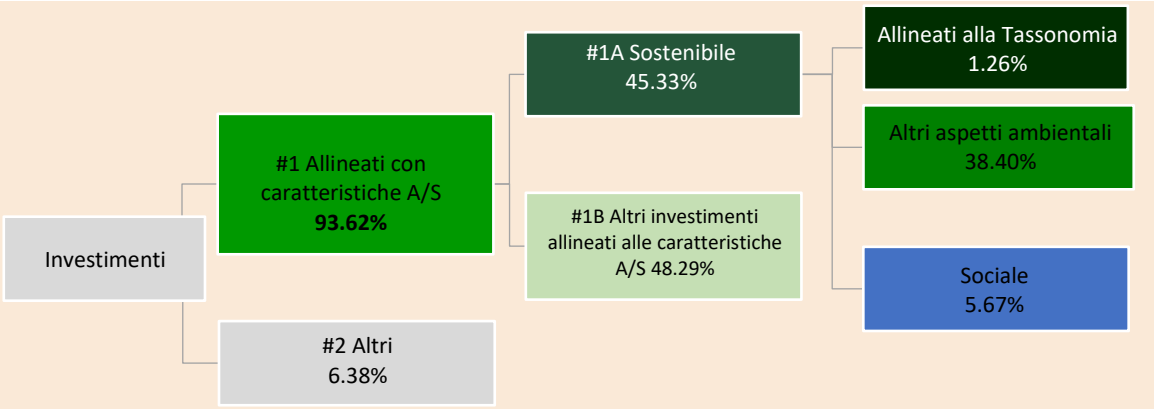
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 45.33% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.26% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.40%	95.27%	96.31%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.13%*	*0.05%*
■ Allineati alla Tassonomia: Nucleare	*1.52%*	*1.63%*	*1.41%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.08%*	*2.98%*	*2.22%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.23%	96.85%	97.10%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.13%*	*0.06%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.56%*	*0.58%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.77%*	*2.46%*	*2.26%*

Questo grafico rappresenta il 94.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 1.32% e la quota di investimenti in attività abilitanti era pari al 0.48%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.21%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **38.40%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.67%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS PIONEER GLOBAL HIGH YIELD BOND

Identificativo della Persona Giuridica: 5493001ZUQBYXT5ICJ95

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **15.59%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento BLOOMBERG GLOBAL HIGH YIELD. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance. L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.078 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.276** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.102 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.259 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- *In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?*
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

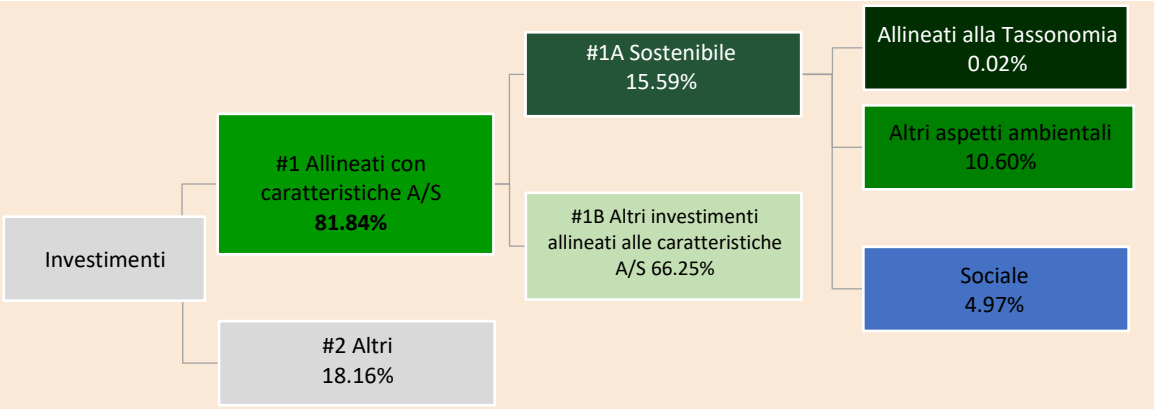
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 15.59% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.02% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.83%	99.77%	99.98%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.17%*	*0.21%*	*0.00%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.82%	99.76%	99.97%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.18%*	*0.22%*	*0.00%*

Questo grafico rappresenta il 95.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **10.60%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.97%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/88 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US HIGH YIELD BOND

Identificativo della Persona Giuridica: 5493003QDKL8L48UQW51

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **20.32%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☐ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA US HIGH YIELD INDEX (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.251 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.462** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.238 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.457 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

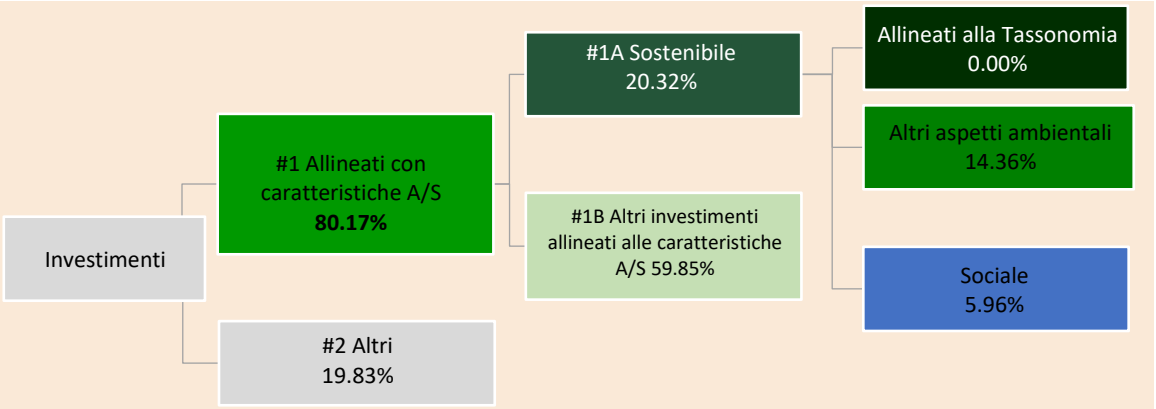
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 20.32% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Nel periodo di riferimento, il fondo ha investito lo 0.00% in investimenti sostenibili allineati alla Tassonomia UE.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **14.36%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.96%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL AGGREGATE BOND

Identificativo della Persona Giuridica: 1BXU0IWD1I54BQDOY676

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ Si	☒ No
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **37.70%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX .** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.874 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.445** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.942 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.488 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

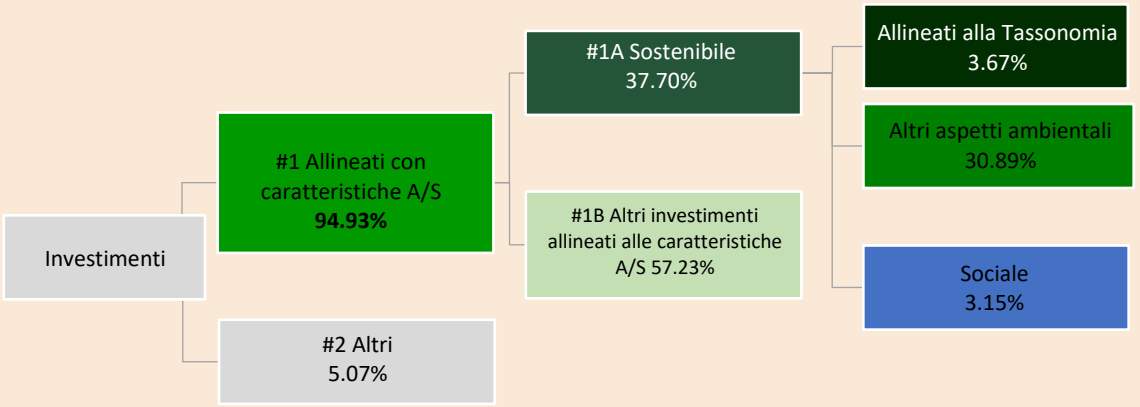
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 37.70% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 3.67% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.08%	96.89%	96.00%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.06%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.18%*	*0.35%*	*0.19%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.73%*	*2.70%*	*3.79%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.94%	92.96%	90.45%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.17%*	*0.04%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.58%*	*0.046%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.05%*	*6.29%*	*9.04%*

Questo grafico rappresenta il 38.7% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.08% e la quota di investimenti in attività abilitanti era pari al 0.18%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.06%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **30.89%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.15%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL GOVERNMENT BOND

Identificativo della Persona Giuridica: 529900LNWLLVPZNRTX63

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **38.22%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove caratteristiche ambientali e/o sociali investendo almeno il 30% del patrimonio netto in obbligazioni Green, Social e Sustainability (GSS) che soddisfano i criteri e le linee guida dei Green Bond Principles (GBP), dei Social Bond Principles (SBP) o delle Sustainability Bond Guidelines (SBG) pubblicati dall'ICMA. Inoltre, sono esclusi gli emittenti con un rating ESG pari a F o G.

Il Comparto è gestito attivamente facendo riferimento al J.P. Morgan Government Bond Global All Maturities Unhedged in USD Index (il "Benchmark") nell'arco del periodo di detenzione raccomandato. Il Comparto è principalmente esposto agli emittenti inclusi nel Benchmark; tuttavia, la gestione del Comparto era discrezionale e sarà esposto anche a emittenti non inclusi nel Benchmark. Il Comparto monitora l'esposizione al rischio rispetto al Benchmark, tuttavia il livello di deviazione dal Benchmark è prevedibilmente significativo.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class".

I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

Per maggiori dettagli, si rimanda alla sezione Investimenti sostenibili del Prospetto informativo.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.080 (C).**
- Il rating ESG medio ponderato dell'indice di riferimento è **1.083 (C)**.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

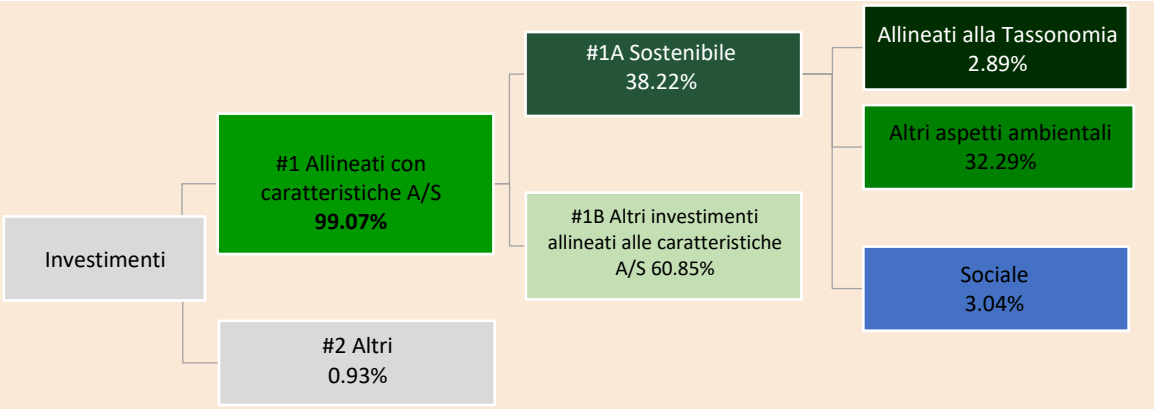
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 38.22% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



L'asset allocation descrive la quota di investimenti in asset specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	*Sottosettori*	*% Asset*

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 2.89% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.17%	98.21%	96.95%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.04%*	*0.14%*	*0.07%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.79%*	*1.64%*	*2.98%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.60%	94.25%	93.53%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.04%*	*0.46%*	*0.22%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.36%*	*5.26%*	*6.24%*

Questo grafico rappresenta il 27.5% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.03% e la quota di investimenti in attività abilitanti era pari al 0.11%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **32.29%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.04%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL CORPORATE BOND

Identificativo della Persona Giuridica: XJOH2VT7DMIW80J7DZ04

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **49.69%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.414 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.042** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.358 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.007 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

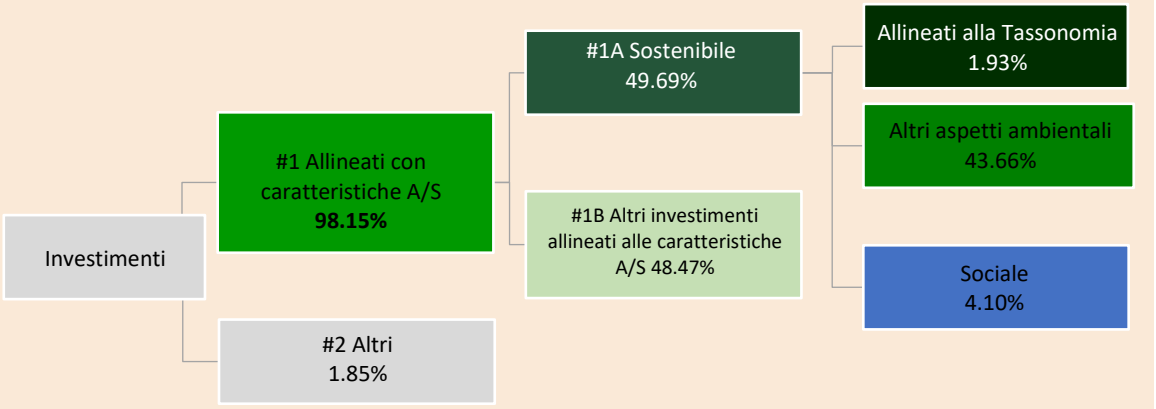
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 49.69% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.93% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.64%	96.54%	97.16%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.72%*	*0.75%*	*0.37%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.64%*	*2.68%*	*2.46%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.53%	97.32%	97.28%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.25%*	*0.21%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.47%*	*2.41%*	*2.49%*

Questo grafico rappresenta il 96.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.26% e la quota di investimenti in attività abilitanti era pari al 0.41%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.07%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **43.66%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.10%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL CORPORATE BOND SELECT

Identificativo della Persona Giuridica: 2138002V2U9FP8L55Z17

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **63.63%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.692 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.042** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.617 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.007 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
AMGN 2.45% 02/30	Corporate	Beni di prima necessità	Stati Uniti	1.91%

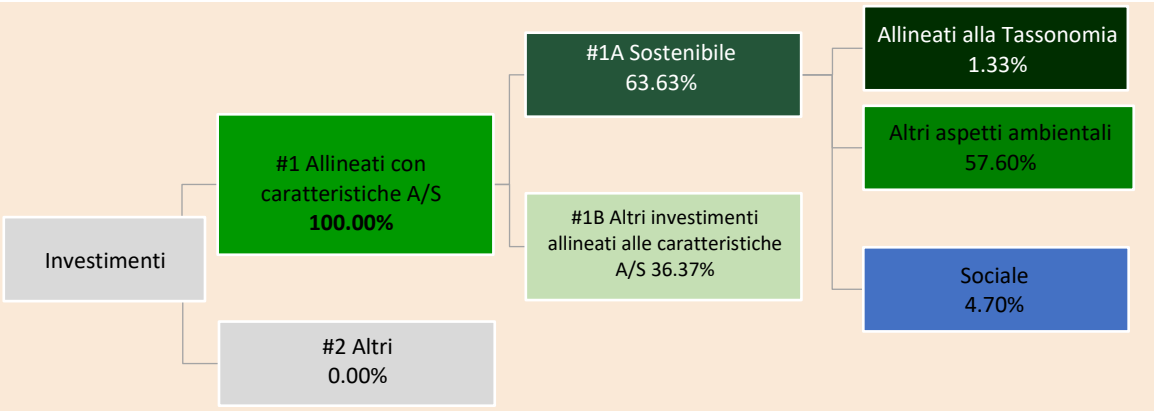
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 63.63% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.33% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.82%	94.71%	97.33%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.14%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.20%*	*0.67%*	*0.26%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.94%*	*4.48%*	*2.39%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.05%	94.91%	97.31%
■ Allineati alla Tassonomia: Gas	*0.03%*	*0.14%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.53%*	*0.26%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.92%*	*4.42%*	*2.41%*

Questo grafico rappresenta il 99.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.24% e la quota di investimenti in attività abilitanti era pari al 1.23%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.75%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **57.60%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.70%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL HIGH YIELD BOND

Identificativo della Persona Giuridica: 222100AIHPWCQOF6UQ48

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **16.41%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.148 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.333** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era -0.090 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.303 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

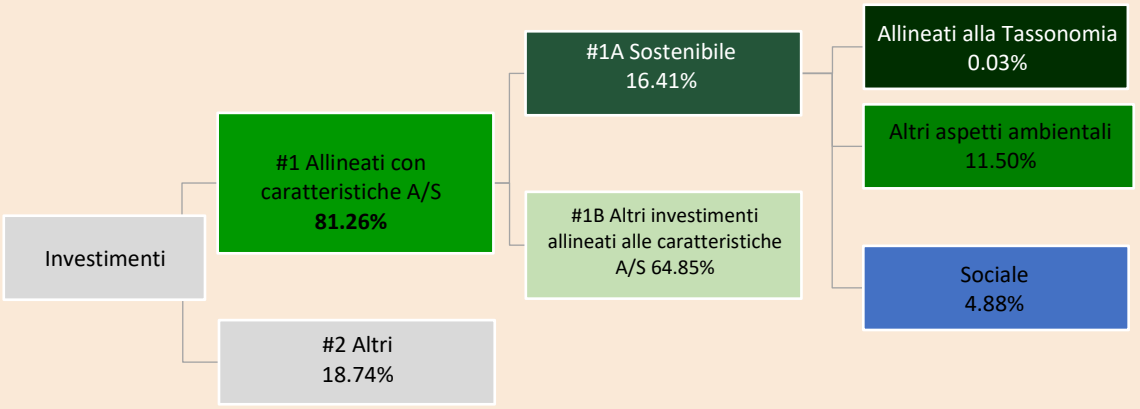
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 16.41% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 0.03% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.86%	99.78%	99.97%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.03%*	*0.03%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.14%*	*0.19%*	*0.00%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.85%	99.78%	99.97%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.03%*	*0.03%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.15%*	*0.19%*	*0.00%*

Questo grafico rappresenta il 99.7% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.01%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **11.50%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.88%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL SHORT TERM BOND

Identificativo della Persona Giuridica: 213800N25O8X71IK7M94

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **48.83%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento, costituito dal seguente indice composito: **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL +10% ICE BOFA GLOBAL HIGH YIELD.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.864 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.444** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.853 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.487 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
UK TSY 0.875% 07/33	Tesoreria	Tesoreria	Regno Unito	3.49%

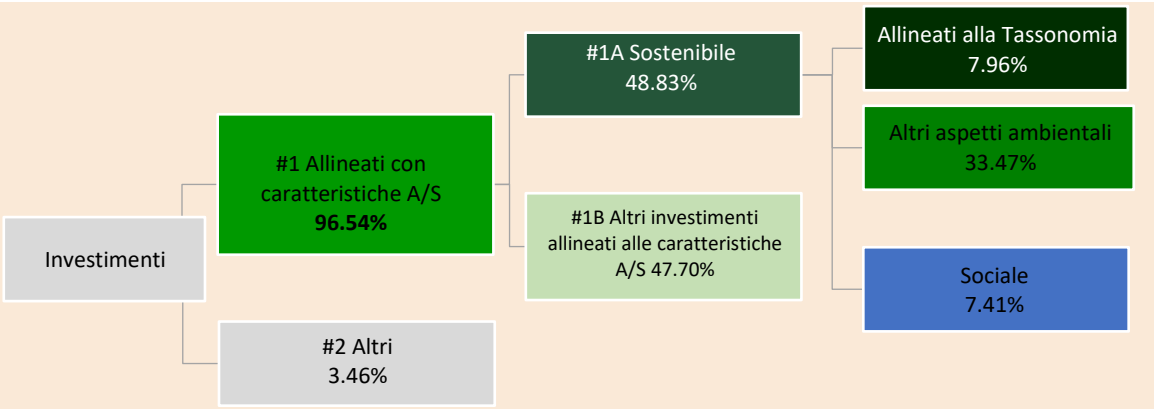
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 48.83% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 7.96% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.25%	92.67%	91.43%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.08%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*1.84%*	*1.22%*	*0.52%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.91%*	*6.02%*	*8.05%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.68%	93.81%	85.90%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.21%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*1.08%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.32%*	*4.90%*	*14.09%*

Questo grafico rappresenta il 39.2% degli investimenti totali.

* *Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.42% e la quota di investimenti in attività abilitanti era pari al 0.29%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.23%.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **33.47%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 7.41%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL BOND FLEXIBLE

Identificativo della Persona Giuridica: 222100PZ5D2ORNFR7S72

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **13.71%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento, costituito dal seguente indice composito: **40% JP MORGAN GLOBAL GOVERNMENT BOND INDEX BROAD + 10% BLOOMBERG GLOBAL AGGREGATE GOVERNMENT RELATED + 10% BLOOMBERG GLOBAL AGGREGATE CORPORATE + 20% BLOOMBERG GLOBAL HIGH YIELD HEDGED + 20% JP MORGAN EMERGING MARKET BOND.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.674 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

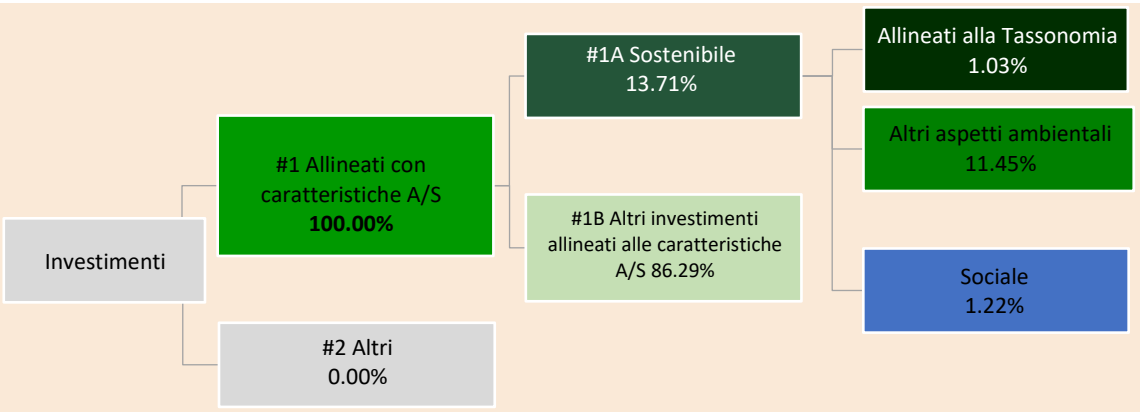
L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
AMUNDI OBL INT FLEXIBLE-OR (D)	Finanziari	Fondi comuni di investimento	Francia	100.62%

Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 13.71% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	*Sottosettori*	*% Asset*
Finanziari	*Fondi comuni di investimento*	*100.62%*
Cash	*Cash*	*-0.62%*

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.03% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.70%	99.53%	98.87%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.02%*	*0.06%*	*0.04%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.28%*	*0.40%*	*1.09%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.74%	98.16%	98.19%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.24%*	*0.18%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.26%*	*1.57%*	*1.62%*

Questo grafico rappresenta il 20.8% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari al 0.06%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **11.45%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.22%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS MULTI SECTOR CREDIT

Identificativo della Persona Giuridica: 222100C0Q8DZ0ONZYS48

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **34.80%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.
Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.512 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.506 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.
- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.53% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.42%	95.94%	97.02%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.11%*	*0.05%*
■ Allineati alla Tassonomia: Nucleare	*0.32%*	*0.44%*	*0.31%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.26%*	*3.51%*	*2.62%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.53%	96.01%	96.95%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.13%*	*0.05%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.24%*	*0.20%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.47%*	*3.63%*	*2.79%*

Questo grafico rappresenta il 88.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.41% e la quota di investimenti in attività abilitanti era pari al 0.43%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.02%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **30.66%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.61%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL CORPORATE BOND CLIMATE

Identificativo della persona giuridica: 213800ZDJ7583Z2H5G06

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **66.74%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
- Esclusioni legali di armi controverse
- Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compac), senza misure correttive credibili;
- Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.
3. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato dell'universo di investimento del fondo dopo aver eliminato il 20% degli emittenti peggiori.
4. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio “best in class”). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l’UCI può quindi essere esposto ad alcuni settori controversi.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL).**

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio “Best-in-class”. I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.591 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.189** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **88.81**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **95.99**

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.537 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.172 (D) fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 82.17 Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 99.19.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e

- Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
- Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
- Non essere implicata in controversie riguardanti biodiversità e inquinamento.

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni

controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

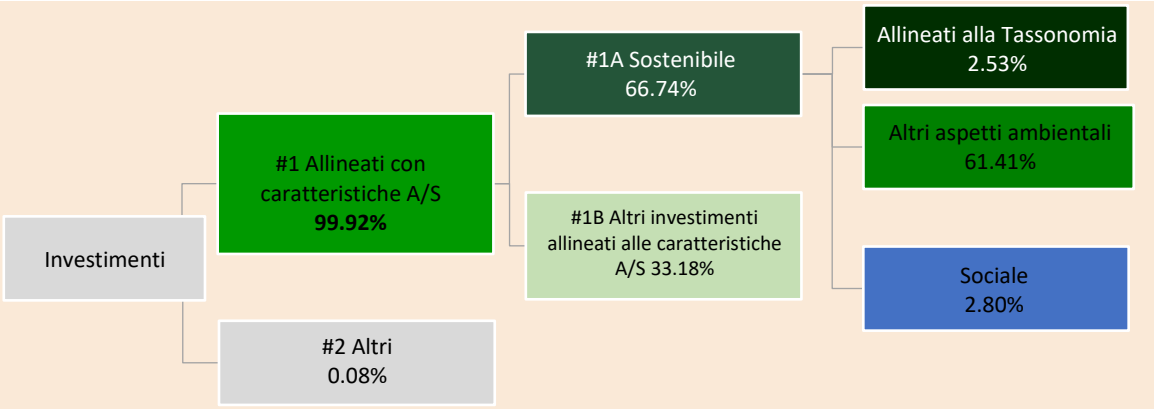
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 66.74% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 2.53% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.56%	94.51%	96.21%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.07%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.62%*	*1.04%*	*0.66%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.80%*	*4.38%*	*3.11%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.59%	95.46%	96.92%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.08%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.13%*	*0.69%*	*0.39%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.27%*	*3.78%*	*2.66%*

Questo grafico rappresenta il 98.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.22% e la quota di investimenti in attività abilitanti era pari al 0.81%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.63%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **61.41%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.80%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice Solactive Paris Aligned Global Corporate USD Hedged Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 88.81.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 95.99.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

- Il rating ESG medio ponderato del portafoglio è 0.591 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è 0.189 (D).

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 88.81.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 95.99.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice Solactive Paris Aligned Global Corporate USD Hedged Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 88.81.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 95.99.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un “Paris Aligned Benchmark” che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Nome del prodotto: AMUNDI FUNDS OPTIMAL YIELD

Identificativo della Persona Giuridica: 549300SEXJO4VZFPO521

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **37.51%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento.

Nel determinare lo score ESG del Comparto e dell'Universo d'Investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance.

Non è stato designato alcun Indice ESG di riferimento.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.241 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.232 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

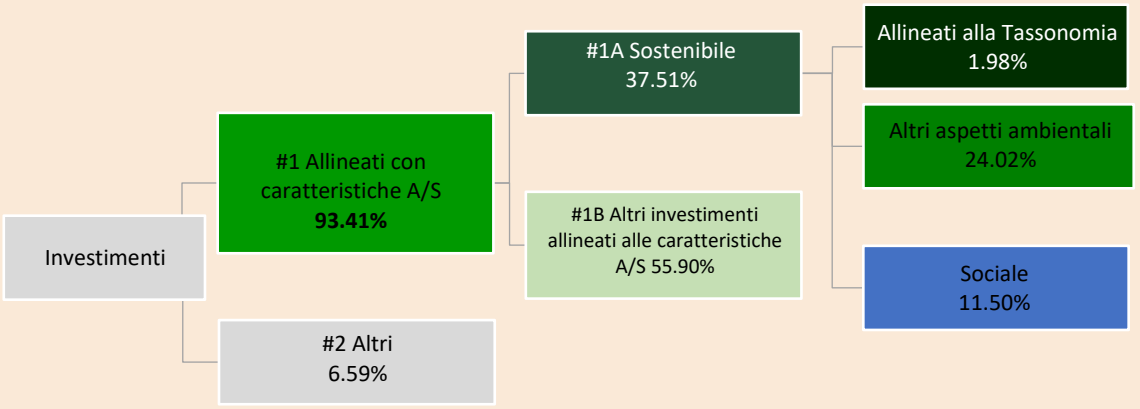
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 37.51% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla tassonomia dell'UE, nel periodo di riferimento ha investito lo 1.98% in investimenti sostenibili allineati alla tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della tassonomia dell'UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.25%*	*0.09%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.40%*	*6.21%*	*3.16%*

Questo grafico rappresenta il 90.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla tassonomia dell'UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.31% e la quota di investimenti in attività abilitanti era pari al 2.23%. La percentuale di allineamento degli investimenti del fondo con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.23%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **24.2%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di tassonomia dell'UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della tassonomia dell'UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 11.50%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS OPTIMAL YIELD SHORT TERM

Identificativo della Persona Giuridica: 549300NI6I5JE79M9X21

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.54%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento.

Nel determinare lo score ESG del Comparto e dell'universo d'investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance.

Non è stato designato alcun Indice ESG di riferimento.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.256 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.221 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:

  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

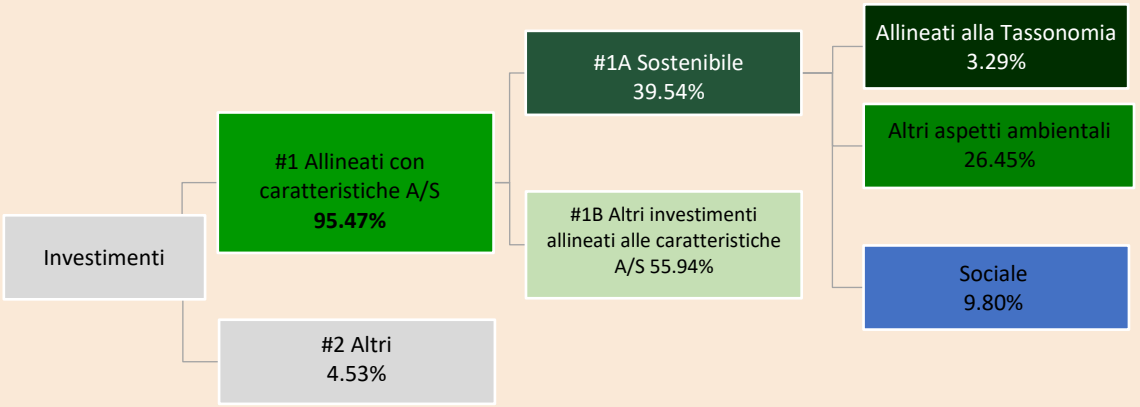
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 39.54% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 3.29% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	92.01%	91.08%	95.02%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.04%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*1.44%*	*1.41%*	*0.41%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*6.54%*	*7.48%*	*4.57%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	93.43%	92.14%	94.86%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.04%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.41%*	*0.18%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*6.56%*	*7.41%*	*4.96%*

Questo grafico rappresenta il 88.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.30% e la quota di investimenti in attività abilitanti era pari al 2.54%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.11%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **26.45%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 9.80%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS STRATEGIC INCOME

Identificativo della Persona Giuridica: 5493004ZTK6D21CGCO05

Obiettivo di investimento sostenibile

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **15.19%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG US UNIVERSAL (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.270 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.232** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.461 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.356 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

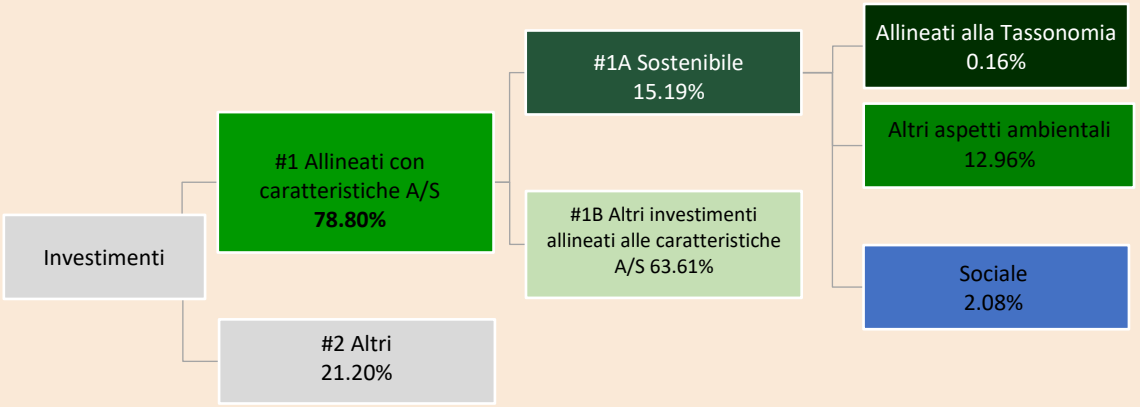
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 15.19% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.16% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]1?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.72%	99.60%	99.77%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.18%*	*0.08%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.28%*	*0.22%*	*0.15%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.55%	99.34%	99.62%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.30%*	*0.13%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.45%*	*0.36%*	*0.25%*

Questo grafico rappresenta il 61.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.08%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **12.96%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.08%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US CORPORATE BOND CLIMATE

Identificativo della Persona Giuridica: 213800VWP1P2KAFPEU55

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **25.71%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index.**

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.113 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.111** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è **49.58**
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è **140.83**

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.188 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.097 (D). Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 42.30 Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 77.40.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

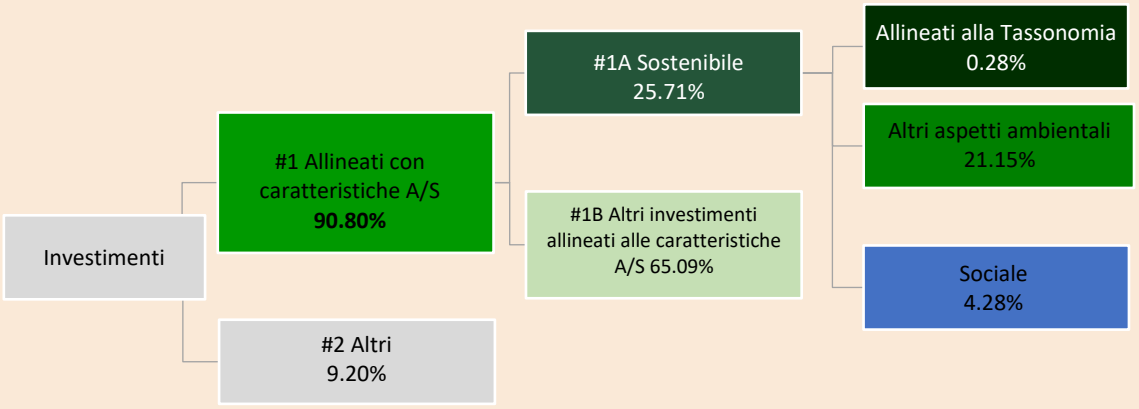
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 25.71% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***

L'asset allocation descrive la quota di investimenti in asset specifici.



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.28% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.81%	98.76%	99.28%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.23%*	*0.28%*	*0.30%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.95%*	*0.96%*	*0.43%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.09%	99.01%	99.49%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.11%*	*0.10%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.91%*	*0.88%*	*0.41%*

Questo grafico rappresenta il 97.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.13% e la quota di investimenti in attività abilitanti era pari al 0.36%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **21.15%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.28%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice MSCI USD IG Climate Paris Aligned Corporate Bond Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 49.58.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 140.83.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

- Il rating ESG medio ponderato del portafoglio è 0.113 (D).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è -0.111 (D).

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 49.58.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 140.83.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo all'indice MSCI USD IG Climate Paris Aligned Corporate Bond Index. L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 49.58.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 140.83.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Un indice generale di mercato non valuta né include i suoi componenti in base alle caratteristiche ambientali e pertanto non è allineato alle caratteristiche ambientali.

L'indice utilizzato è un "Paris Aligned Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Nome del prodotto: AMUNDI FUNDS US BOND

Identificativo della Persona Giuridica: 5493005LBJJ6BWRENA39

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **9.84%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG US AGGREGATE**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.455 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.289** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.511 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.464 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

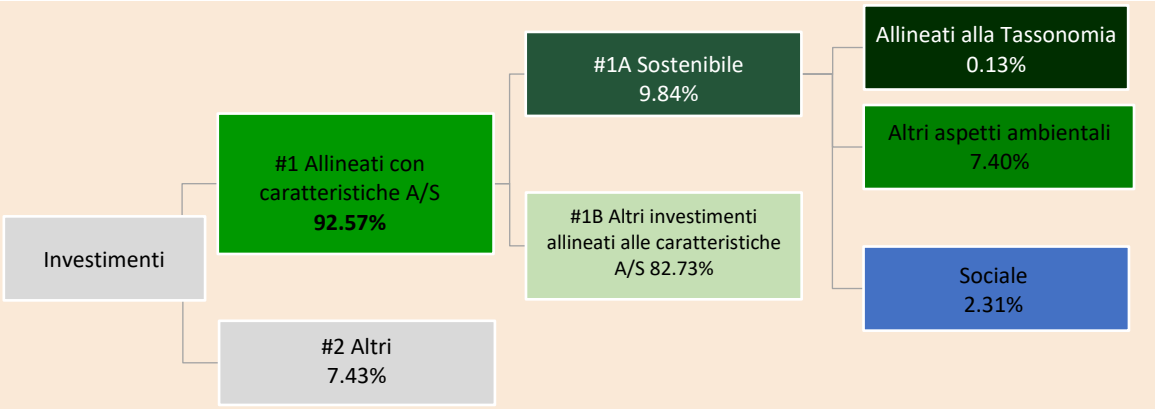
Qual è stata la quota di investimenti legati alla sostenibilità?

L'asset allocation descrive la quota di investimenti in asset specifici.

Il fondo ha investito il 9.84% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.13% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.52%	99.46%	99.65%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.14%*	*0.22%*	*0.16%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.33%*	*0.32%*	*0.19%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.23%	99.02%	99.43%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.30%*	*0.10%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.77%*	*0.68%*	*0.47%*

Questo grafico rappresenta il 38.0% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.08% e la quota di investimenti in attività abilitanti era pari al 0.14%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **7.40%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 2.31%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US CORPORATE BOND SELECT

Identificativo della Persona Giuridica: 222100LE431F865A4S54

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **20.93%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG US CORPORATE INVESTMENT GRADE (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.112 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.286** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.122 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.307 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

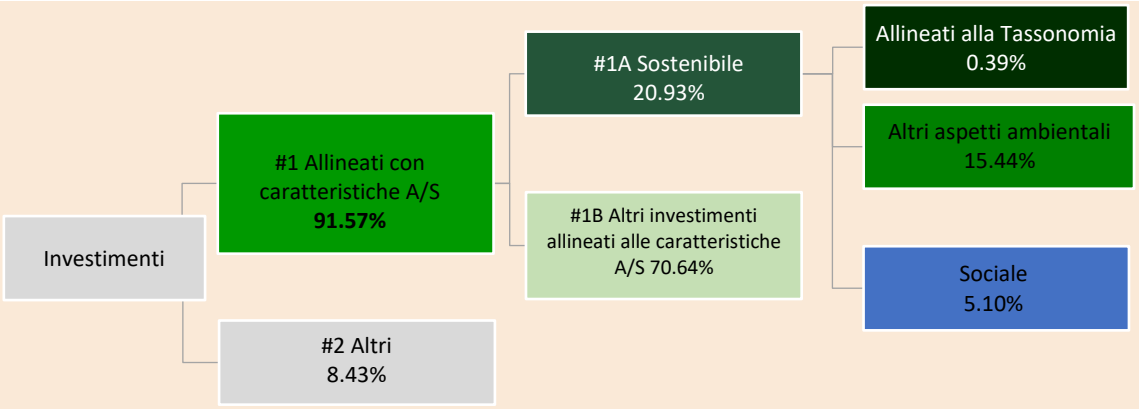
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 20.93% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.39% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.48%	98.42%	99.02%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.38%*	*0.69%*	*0.47%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.15%*	*0.89%*	*0.51%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.93%	98.83%	99.37%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.43%*	*0.14%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.07%*	*0.74%*	*0.49%*

Questo grafico rappresenta il 97.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.20% e la quota di investimenti in attività abilitanti era pari al 0.45%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **15.44%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.10%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS US SHORT TERM BOND

Identificativo della Persona Giuridica: 549300QBCEQZSOFGDW23

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **15.70%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale:** _____	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 0-1 YEAR US CORPORATE INDEX (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.192 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.184** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.386 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.215 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

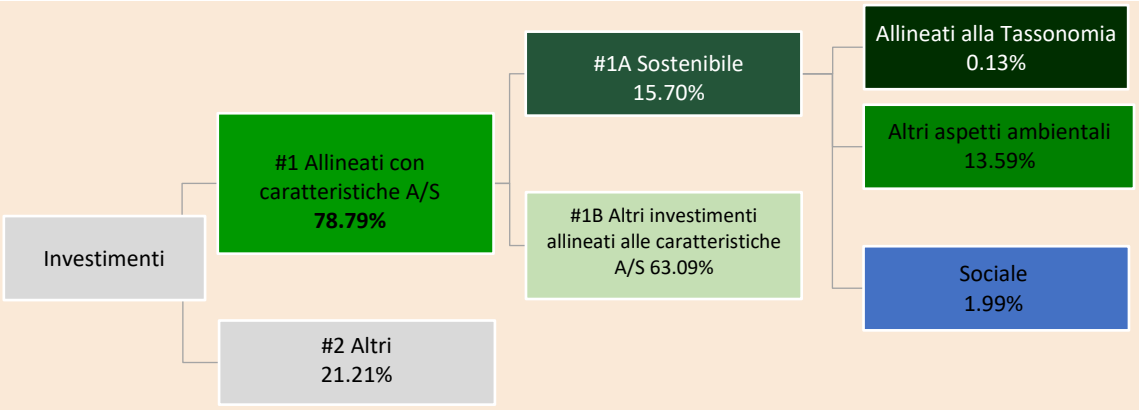
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 15.70% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.13% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.64%	99.56%	99.79%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.08%*	*0.19%*	*0.04%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.28%*	*0.26%*	*0.17%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.63%	99.51%	99.70%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.18%*	*0.06%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.37%*	*0.31%*	*0.25%*

Questo grafico rappresenta il 70.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.09%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **13.59%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.99%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS ASIA BOND INCOME RESPONSIBLE

Identificativo della Persona Giuridica: 213800UVZ2BRX4N1ZK70

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **41.08%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale:** _____	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento, costituito da **90% JPM Asia Credit Index + 10% Markit iBoxx ALBI (USD Unhedged) Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.293 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.224** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.319 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.281 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

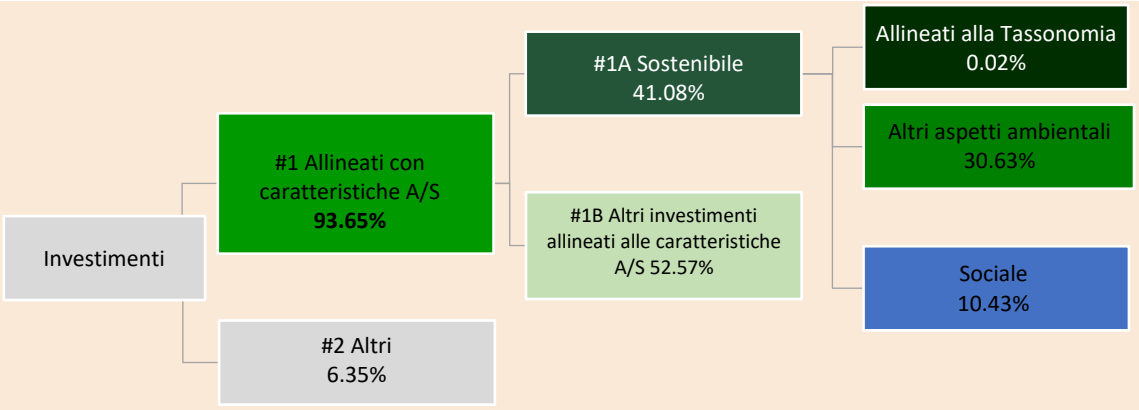
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 41.08% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***

L'asset allocation descrive la quota di investimenti in asset specifici.



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.02% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.67%	99.88%	99.92%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.33%*	*0.12%*	*0.08%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.57%	99.85%	99.89%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.43%*	*0.15%*	*0.11%*

Questo grafico rappresenta il 76.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.06%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.05%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **30.63%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.43%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS CHINA RMB AGGREGATE BOND

Identificativo della Persona Giuridica: 213800R541S7BYLJJK77

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale:** _____	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **5.11%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☐ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☐ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale:** _____	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG CHINA AGGREGATE (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.239 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.285** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

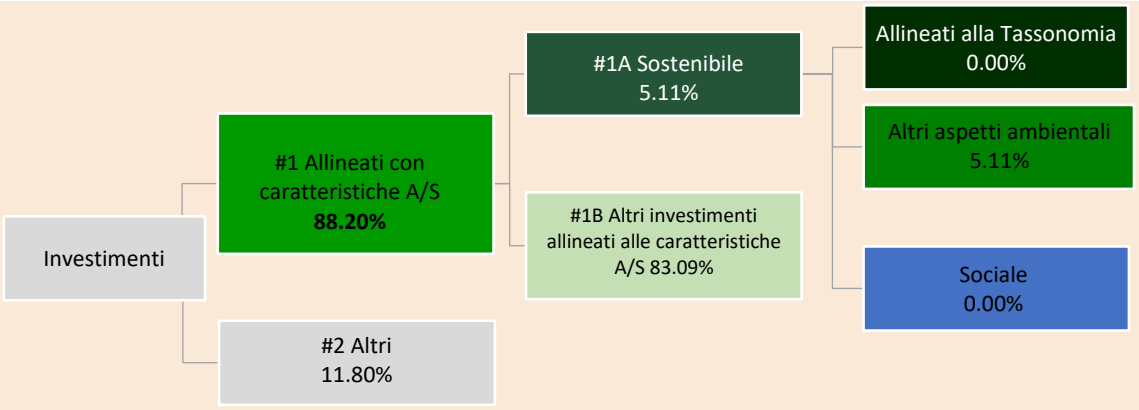
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 5.11% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Forex	*Forex*	*0.03%*
Altri	*Altri*	*0.02%*
Cash	*Cash*	*10.76%*

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Nel periodo di riferimento, il fondo ha investito lo 0.00% in investimenti sostenibili allineati alla Tassonomia UE.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	100.00%	100.00%	100.00%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.00%*	*0.00%*	*0.00%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	100.00%	100.00%	100.00%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.00%*	*0.00%*	*0.00%*

Questo grafico rappresenta il 31.06% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Questo è il primo rapporto periodico del SFDR redatto per questo comparto.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **5.11%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

Questo prodotto non si è impegnato ad effettuare investimenti sostenibili dal punto di vista sociale nel corso del periodo.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS BLENDED BOND

Identificativo della Persona Giuridica: 222100ABBJIBM1BE8222

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **9.47%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR) INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.041 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.127** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era -0.110 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.153 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.24% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.63%	99.53%	99.63%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.11%*	*0.05%*	*0.05%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.26%*	*0.42%*	*0.32%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.04%	98.67%	99.28%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.08%*	*0.06%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.96%*	*1.25%*	*0.64%*

Questo grafico rappresenta il 22.8% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.02% e la quota di investimenti in attività abilitanti era pari al 0.05%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.02%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **7.90%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.34%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS BOND

Identificativo della Persona Giuridica: 549300KZW6KQ7WLJO866

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **11.14%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento 50% JP Morgan EMBI Global Diversified Index + 50% JP Morgan CEMBI Global Diversified Index**.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.147 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.156** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era -0.018 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.155 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

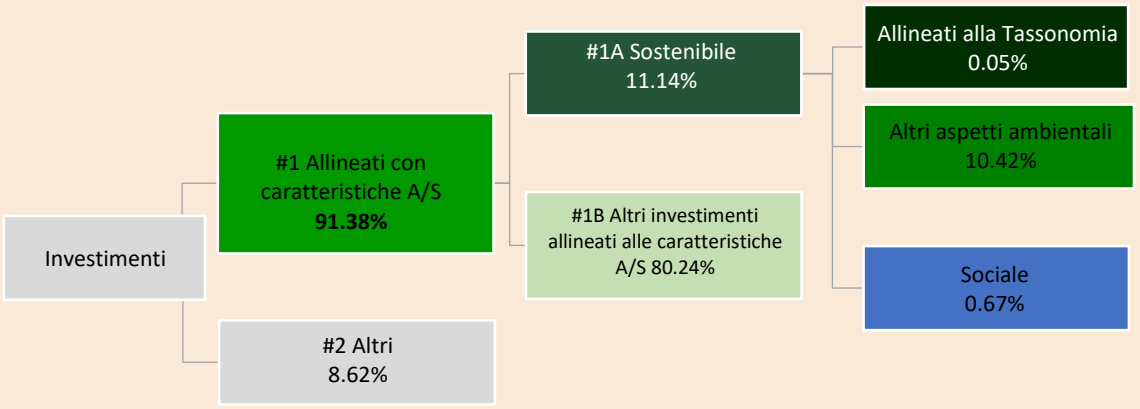
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 11.14% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.05% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.58%	99.27%	99.74%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.41%*	*0.71%*	*0.24%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.01%	98.22%	99.39%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.03%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.99%*	*1.75%*	*0.58%*

Questo grafico rappresenta il 39.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.06%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.01%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **10.42%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 0.67%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS CORPORATE BOND **Identificativo della Persona Giuridica:** 529900YJOJ3E3FRQQ325

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **28.68%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN CEMBI BROAD DIVERSIFIED (OFFICIAL).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.123 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.187** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.003 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.157 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO_2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

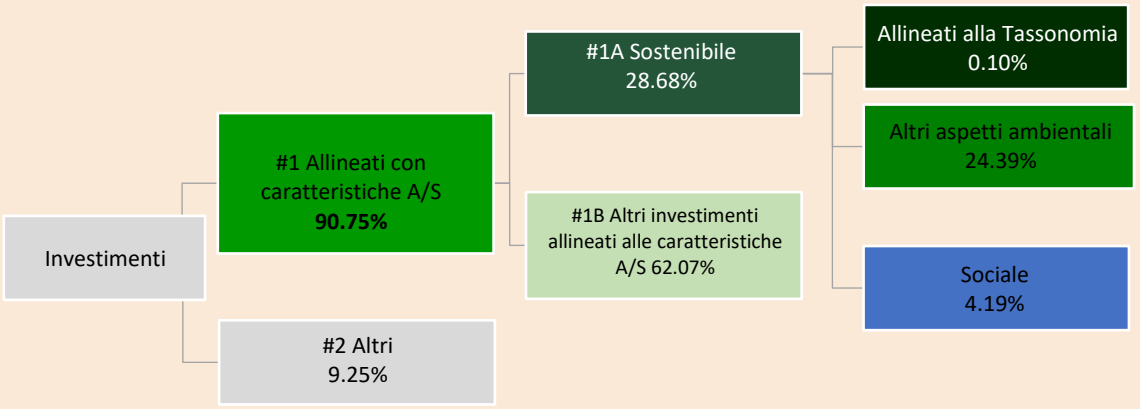
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 28.68% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.

La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.10% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.47%	99.31%	99.75%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.53%*	*0.67%*	*0.25%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.41%	99.23%	99.73%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.59%*	*0.75%*	*0.27%*

Questo grafico rappresenta il 87.5% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.07% e la quota di investimenti in attività abilitanti era pari al 0.02%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.04%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **24.39%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.19%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS CORPORATE HIGH YIELD BOND

Identificativo della Persona Giuridica: 5493006QGDCTMW9Y1N50

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **22.11%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance. L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.092 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.214** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.039 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.133 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

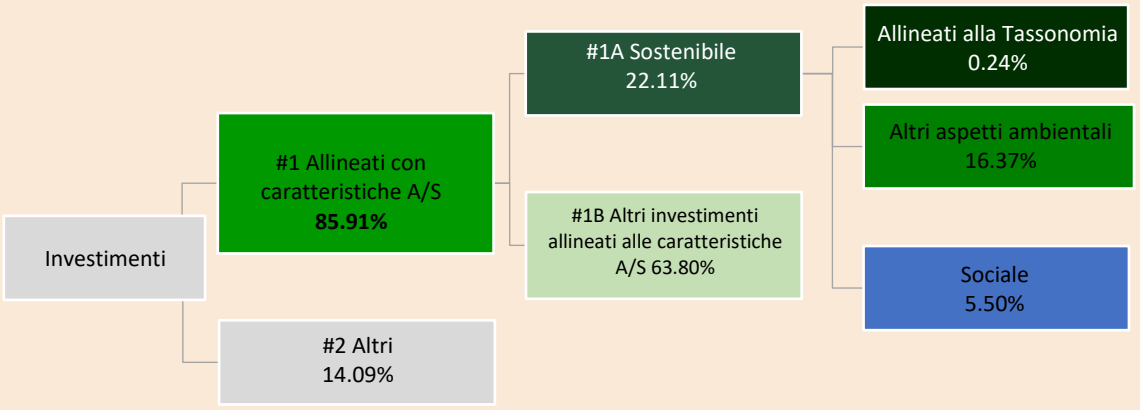
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 22.11% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.24% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.64%	99.30%	99.63%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.01%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.36%*	*0.69%*	*0.36%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.61%	99.24%	99.60%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.01%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.39%*	*0.74%*	*0.39%*

Questo grafico rappresenta il 92.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.36%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **16.37%** alla fine del periodo.

Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.50%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS GREEN BOND

Identificativo della Persona Giuridica: 2138001AOC3QUTY9SA42

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **70.21%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☐ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN EM CREDIT GREEN BOND DIVERSIFIED INDEX (HEDGED TO USD).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il comparto ha mantenuto la quota impegnata della sua allocazione investita nell'uso di green bond.

L'obiettivo dei green bond è quello di finanziare progetti che generano un impatto positivo e misurabile sull'ambiente. L'indicatore chiave per misurare l'impatto dei green bond è "tonnellate di emissioni di CO2 evitate per milione di euro investiti in un anno". Al di là dell'analisi finanziaria quantitativa e qualitativa delle obbligazioni che probabilmente andranno a comporre il portafoglio, il processo di selezione comprende una valutazione della strategia ESG a livello di emittente e una valutazione dei green bond in base a diversi punti di analisi:

1. Amundi ha sviluppato un sistema esclusivo di punteggio ESG basato su una scala di sette lettere, che va da A a G, dove A rappresenta il rating migliore e G quello peggiore. Qualsiasi emittente con rating G è escluso da tutti i portafogli gestiti attivamente di Amundi. Implementiamo la verifica del rating ESG dell'emittente e controlliamo la conformità del rating ai criteri del relativo fondo. Come indicato in precedenza, gli emittenti con un rating G nella scala di rating ESG di Amundi non sono idonei all'investimento. In caso di punti deboli, il team di ricerca ESG cercherà di approfondire le controversie sul relativo pilastro (A, S e G).
2. Valutazione dei green bond in termini di: (i) analisi del progetto, attraverso l'analisi dell'ubicazione geografica degli asset, l'azione sugli asset, la valutazione di qualsiasi impatto aggiuntivo del progetto green sull'ambiente, sulla biodiversità, sulle comunità locali o su altri aspetti sociali (Do no significant harm, ovvero "non arreca un danno significativo"), l'allineamento agli standard di settore (ad esempio, l'allineamento ai Green Bond Principles dell'International Capital Markets Association, alla Climate Bond Initiative, alla Tassonomia UE). (ii) analisi dell'emittente a livello di strategia ESG globale e di controversie, (iii) logica di finanziamento green (tipo di progetti finanziati, allocazione dei green asset, tipo di strumenti di finanziamento dei progetti green) e (iv) trasparenza (rapporto sui green bond, esistenza di un parere di terze parti).
3. Monitoraggio continuo (investimento ex-post), che comprende l'esame regolare dell'allocazione e del rapporto sull'impatto del green bond, delle controversie in cui l'emittente è coinvolto e della strategia ambientale dell'emittente.

Infine, tutti i Green Bond selezionati dovranno soddisfare i criteri e le linee guida dei Green Bond Principles pubblicati dall'International Capital Market Association. Per maggiori dettagli su quanto sopra, si prega di visitare la Politica di investimento responsabile di Amundi.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.239 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.097** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

Alla fine del periodo, il portafoglio detiene **87.20 %** di green bond.

- ***e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.131 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.006 (D) fine del periodo, il portafoglio deteneva 89.04 % di green bond.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

Per quanto riguarda gli strumenti di debito green, sociali e sostenibili ("GSS"), come definiti dall'International Capital Market Association ("ICMA"), e strutturati in conformità ai suoi principi o linee guida, che contribuiscono per progettazione a un obiettivo ambientale o sociale, si ritiene che superino il Contribution Test descritto sopra, a condizione che:

– Se applicabile, gli emittenti operino in un'attività compatibile con gli obiettivi di sostenibilità e sviluppo a lungo termine; oppure

– Gli strumenti GSS siano stati analizzati dagli analisti ESG di Amundi e rispettino i requisiti GSS di Amundi (inclusi ragioni del finanziamento, performance ESG dell'emittente, analisi del progetto e trasparenza).

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

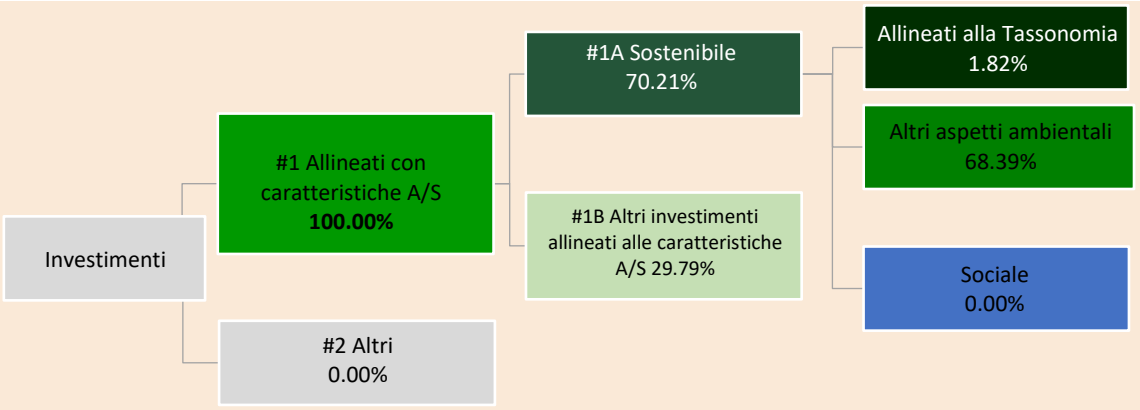
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 70.21% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.

#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili. La categoria **#1 Allineati con caratteristiche A/S** comprende:

- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.82% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.48%	99.39%	97.98%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.13%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.52%*	*0.48%*	*2.02%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.74%	99.77%	97.65%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.16%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.26%*	*0.07%*	*2.35%*

Questo grafico rappresenta il 80.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.25%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **68.39%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

Questo prodotto non si è impegnato ad effettuare investimenti sostenibili dal punto di vista sociale nel corso del periodo.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS HARD CURRENCY BOND

Identificativo della Persona Giuridica: 549300CF4H3SXCNRP626

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **8.98%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- Come si sono comportati gli indicatori di sostenibilità?

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **-0.027 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.127** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era -0.119 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.153 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo ad alcun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

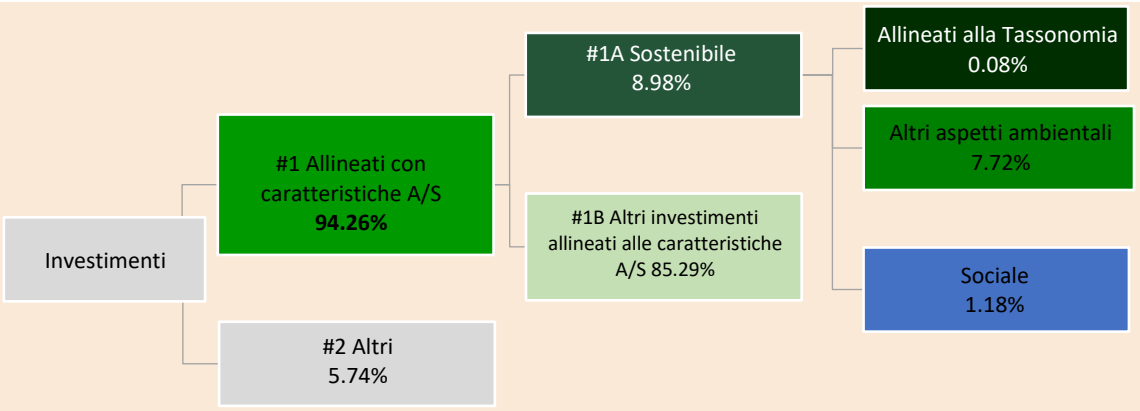
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 8.98% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.08% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.94%	99.91%	99.84%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.02%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.05%*	*0.08%*	*0.15%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.83%	99.70%	99.39%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.06%*	*0.01%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.17%*	*0.24%*	*0.61%*

Questo grafico rappresenta il 21.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.02%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **7.72%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.18%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS LOCAL CURRENCY BOND

Identificativo della Persona Giuridica: 549300JJ3276S8R63L30

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **7.74%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **80% JPM GBI EM GLOBAL DIVERSIFIED Index + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.336 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.182** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.328 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.186 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:
Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).
Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.
Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

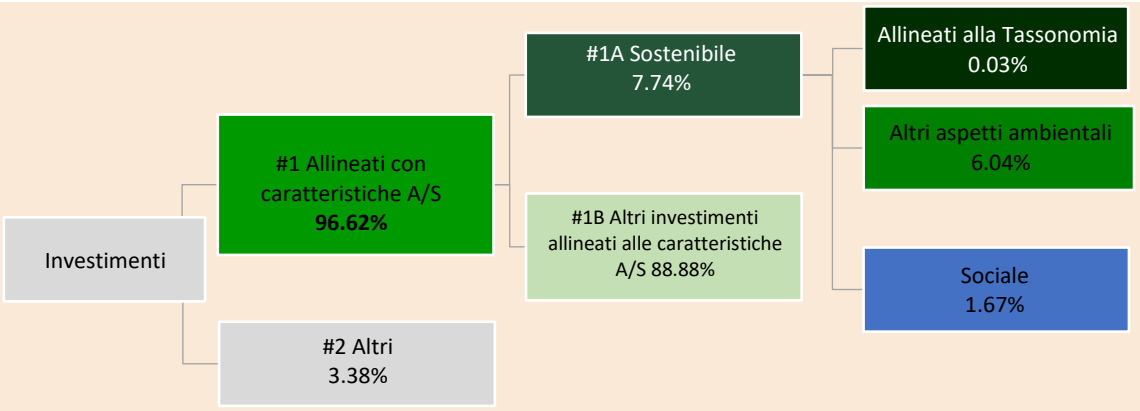
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 7.74% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.03% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	100.00%	99.99%	99.97%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.00%*	*0.00%*	*0.03%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.98%	99.90%	99.94%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.07%*	*0.05%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.02%*	*0.03%*	*0.00%*

Questo grafico rappresenta il 6.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.00%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.00%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **6.04%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.67%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EMERGING MARKETS SHORT TERM BOND

Identificativo della Persona Giuridica: 5493000K4D8P0NQAIA67

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **17.24%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.225 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.245** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.019 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.201 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

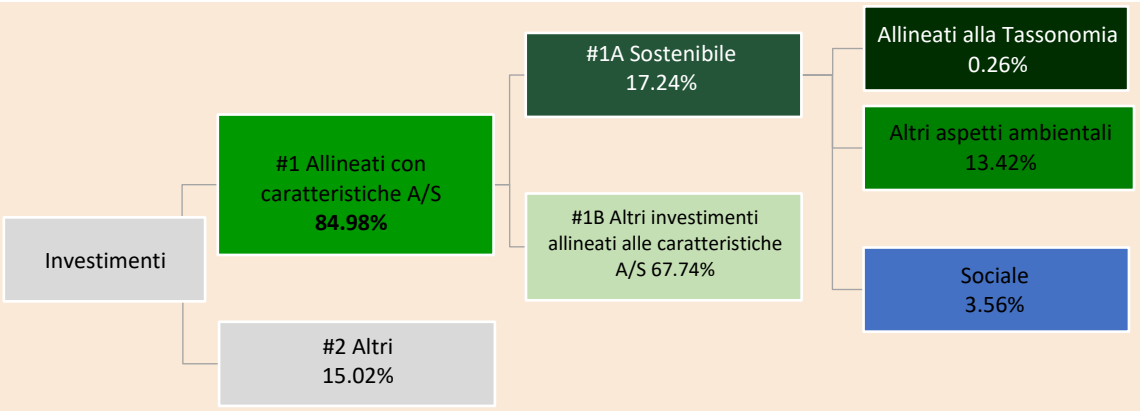
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 17.24% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.26% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.45%	99.14%	98.96%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.07%*	*0.10%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.55%*	*0.78%*	*0.94%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.05%	98.93%	98.70%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.09%*	*0.12%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.95%*	*0.98%*	*1.18%*

Questo grafico rappresenta il 79.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.01% e la quota di investimenti in attività abilitanti era pari al 0.26%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.08%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **13.42%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.56%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS ASIA MULTI ASSET TARGET INCOME

Identificativo della Persona Giuridica: 213800D8TH8Y8YWFBV59

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **30.89%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **50% MSCI Emerging Markets Index, 30% J.P. Morgan EMBI Global Diversified Composite e 20% J.P. Morgan CEMBI Broad Diversified Composite.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.192 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **-0.083** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.150 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.126 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

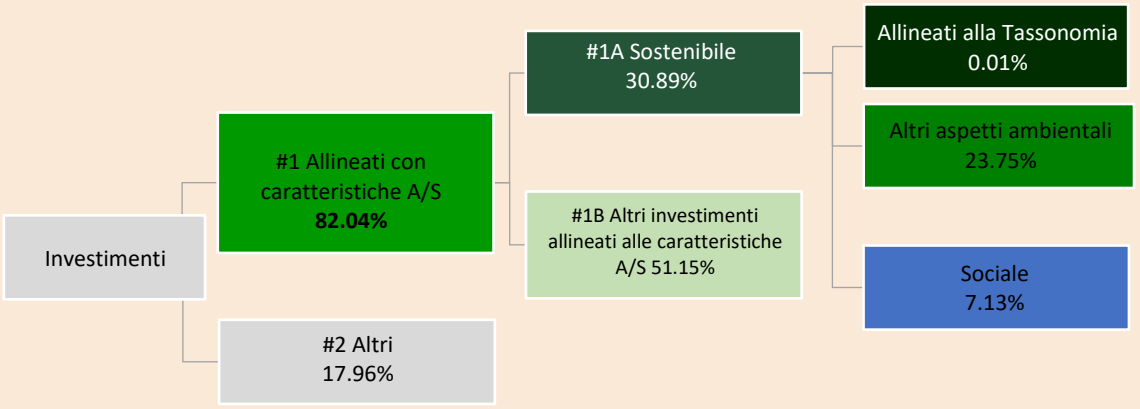
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 30.89% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.01% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

☐ Sì:

☐ In gas fossile ☐ In energia nucleare

☒ No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.90%	99.96%	99.99%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.10%*	*0.04%*	*0.01%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.88%	99.95%	99.99%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.12%*	*0.05%*	*0.01%*

Questo grafico rappresenta il 84.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.00% e la quota di investimenti in attività abilitanti era pari al 0.01%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.01%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **23.75%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 7.13%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO MULTI-ASSET TARGET INCOME

Identificativo della Persona Giuridica: 549300MRV3FILX0BHB52

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **33.34%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.674 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.674 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

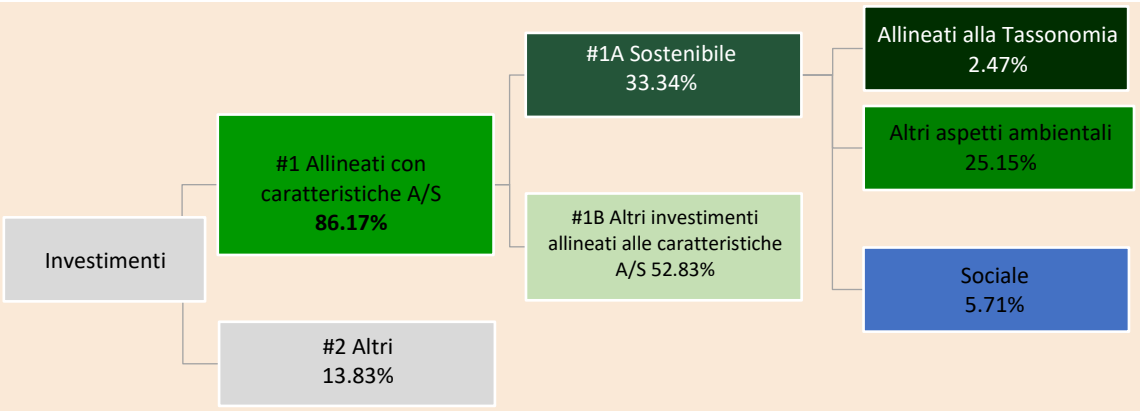
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 33.34% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 2.47% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.97%	95.06%	96.27%
■ Allineati alla Tassonomia: Gas	*0.02%*	*0.08%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.39%*	*0.41%*	*0.45%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.62%*	*4.45%*	*3.26%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.38%	94.15%	95.74%
■ Allineati alla Tassonomia: Gas	*0.02%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.18%*	*0.16%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.60%*	*5.57%*	*4.07%*

Questo grafico rappresenta il 68.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.40% e la quota di investimenti in attività abilitanti era pari al 1.38%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.62%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **25.15%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.71%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL MULTI-ASSET

Identificativo della Persona Giuridica: 549300OD7WDES3BYBD54

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **37.45%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.255 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.312 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

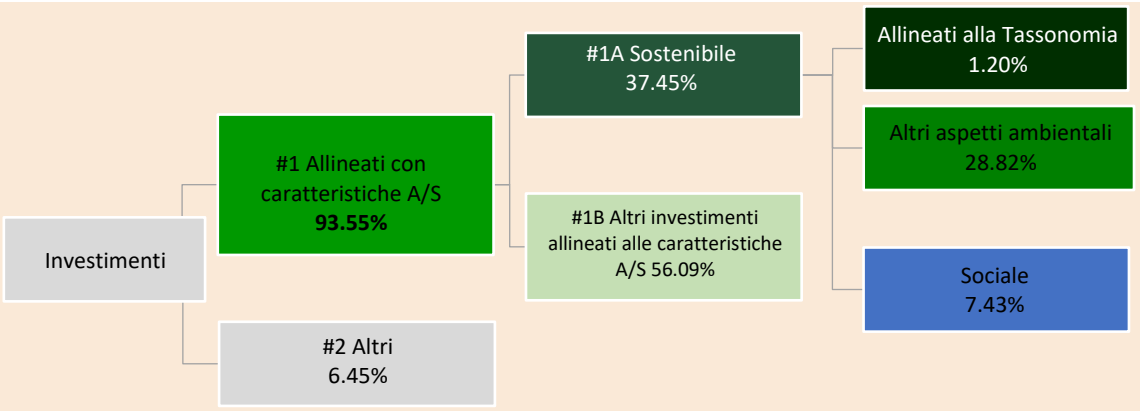
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 37.45% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.20% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.93%	96.95%	97.99%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.09%*	*0.09%*	*0.09%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.98%*	*2.93%*	*1.91%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.62%	96.62%	97.70%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.09%*	*0.09%*	*0.11%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.29%*	*3.28%*	*2.18%*

Questo grafico rappresenta il 84.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.35% e la quota di investimenti in attività abilitanti era pari al 0.78%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.37%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **28.82%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 7.43%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL MULTI-ASSET CONSERVATIVE

Identificativo della Persona Giuridica: 549300B1R0N20X3Z5K83

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **34.82%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.481 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.633 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

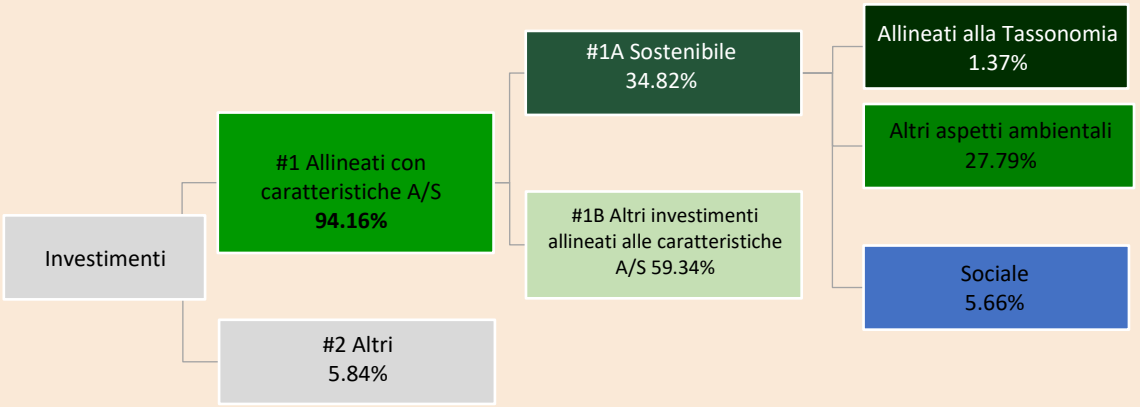
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 34.82% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.37% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.44%	97.22%	97.68%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.09%*	*0.11%*	*0.11%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.46%*	*2.65%*	*2.21%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.57%	95.73%	96.49%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.13%*	*0.16%*	*0.17%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.30%*	*4.09%*	*3.33%*

Questo grafico rappresenta il 63.4% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.44% e la quota di investimenti in attività abilitanti era pari al 0.83%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.37%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.79%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.66%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS GLOBAL MULTI-ASSET TARGET INCOME **Identificativo della Persona Giuridica:** 549300MJSB1OV3IZ3T98

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **23.49%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento. Nel determinare lo score ESG del Comparto e dell'Universo d'Investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance.
Non è stato designato alcun Indice ESG di riferimento.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.418 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.506 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:
Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti

Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle

attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

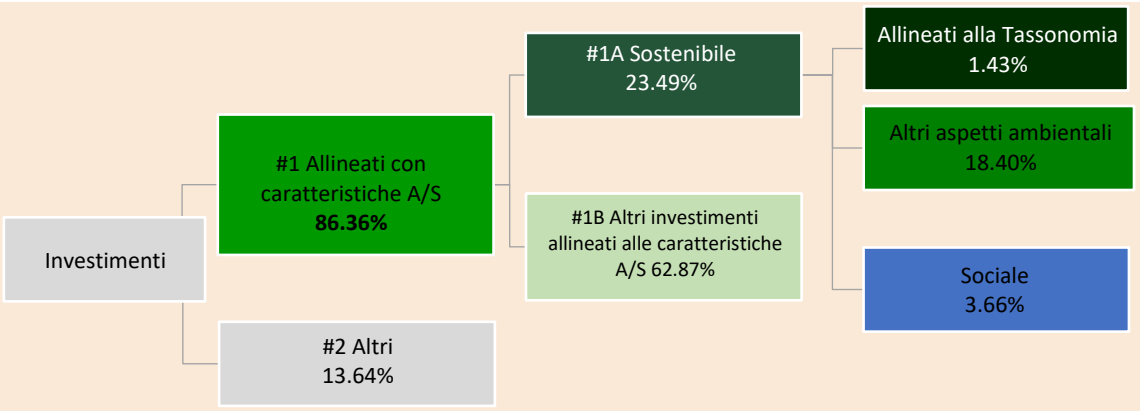
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 23.49% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.43% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.73%	97.24%	97.83%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.04%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.38%*	*0.38%*	*0.40%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.88%*	*2.34%*	*1.76%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.38%	96.63%	97.47%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.05%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.17%*	*0.11%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.60%*	*3.15%*	*2.40%*

Questo grafico rappresenta il 59.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.28% e la quota di investimenti in attività abilitanti era pari al 0.52%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.46%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **18.40%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.66%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS INCOME OPPORTUNITIES

Identificativo della Persona Giuridica: 549300ILVTGROHRV6666

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **28.60%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.035 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.280 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in

aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui

fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.

- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
ABN AMRO BANK NV-CVA	Finanziari	Banche	Paesi Bassi	2.83%

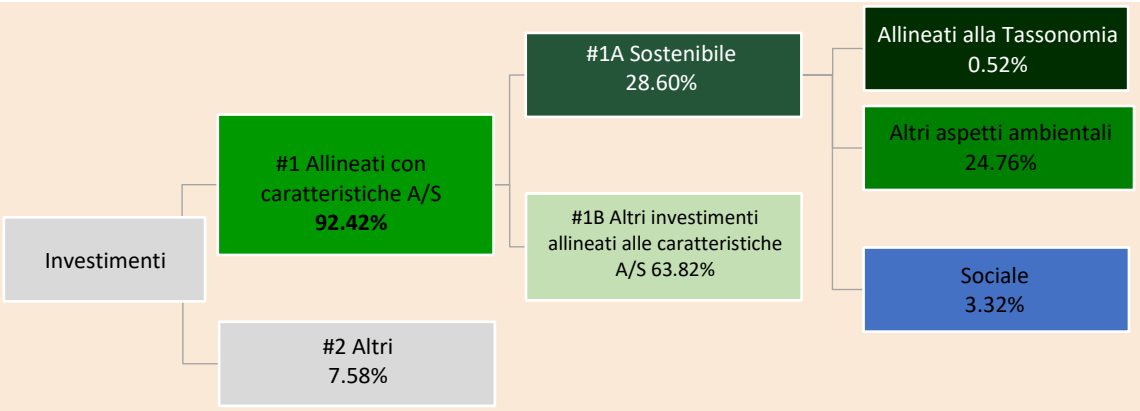
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 28.60% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.52% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.82%	99.10%	99.46%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.10%*	*0.03%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.18%*	*0.80%*	*0.52%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.76%	98.77%	99.26%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.14%*	*0.04%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.24%*	*1.09%*	*0.70%*

Questo grafico rappresenta il 73.7% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.10% e la quota di investimenti in attività abilitanti era pari al 0.09%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.01%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **24.76%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.32%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS MULTI-ASSET REAL RETURN

Identificativo della Persona Giuridica: 222100UNVFMGHI5DQJ57

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **45.53%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **Euro HICP ex Tobacco.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.777 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.769 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in

aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui

fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.

- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

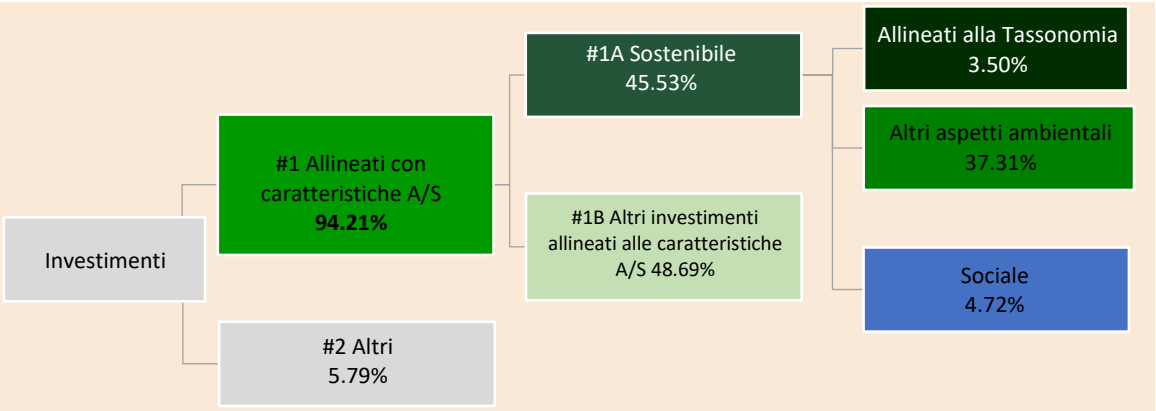
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 45.53% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 3.50% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.33%	93.56%	95.92%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.02%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.52%*	*0.60%*	*0.42%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.15%*	*5.82%*	*3.66%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.19%	91.60%	94.47%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.03%*	*0.34%*	*0.30%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.76%*	*8.02%*	*5.22%*

Questo grafico rappresenta il 69.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.33% e la quota di investimenti in attività abilitanti era pari al 0.82%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.06%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **37.31%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.72%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS MULTI-ASSET CONSERVATIVE RESPONSIBLE

Identificativo della Persona Giuridica: 549300E1QOFTUCHMCV76

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **72.93%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo benchmark **MSCI Daily Net Total Return World Euro Index (30%) Bloomberg EuroAgg Total Return Index Value Unhedged EUR Index (70%) Index.** Nel determinare lo score ESG del Prodotto e il benchmark, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

Il benchmark è un ampio indice di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Il prodotto è etichettato SRI (Investimento Sociale e Responsabile - Social and Responsible Investment). Nel corso dell'anno ha cercato di promuovere le 3 dimensioni (ambientale, sociale e di governance) tenendo conto del rating ESG degli emittenti nella costruzione del portafoglio.

Il rating ESG degli emittenti mira a valutare la loro capacità di gestire il potenziale impatto negativo delle loro attività sui fattori di sostenibilità. Questa analisi mira quindi a valutare i loro comportamenti ambientali e sociali in termini di governance, assegnando loro un rating ESG che va da A (rating migliore) a G (rating peggiore), in modo da ottenere una valutazione più globale dei rischi.

1. Il portafoglio ha applicato costantemente la seguente politica di esclusione di Amundi:
- Esclusioni legali di armi controverse
- Aziende che contravvengono gravemente e ripetutamente a uno o più dei 10 principi del Global Compact (UN Global Compac), senza misure correttive credibili;
- Le esclusioni settoriali del gruppo Amundi su carbone e tabacco (i dettagli di questa politica sono disponibili nella Politica di Investimento Responsabile di Amundi disponibile sul sito www.amundi.fr)
- Il Comparto ha applicato criteri di esclusione supplementari e specifici su società ed emittenti pubblici sulla base di attività controverse (inclusi armi controverse, armi nucleari e altre armi, tabacco, carbone, petrolio e gas, produzione di elettricità tramite carbone, nucleare, petrolio o gas, superalcolici, giochi d'azzardo, ingegneria genetica, pellicce e pornografia) e comportamenti controversi (inclusi lavoro minorile, diritti del lavoro e umani, comportamenti dannosi per l'ambiente, corruzione, frode, pena di morte, energia nucleare).

2. Non sono stati effettuati investimenti in emittenti con rating F o G. Per gli emittenti il cui rating è stato abbassato a F o G, i titoli già presenti in portafoglio sono stati venduti nei tempi previsti dal prospetto e tenendo conto degli interessi finanziari dei detentori.

3. Non sono stati effettuati investimenti in emittenti valutati F o G in uno o più dei tre indicatori: Transizione Energetica ed Ecologica, Catena di Fornitura Socialmente Responsabile e Strategia ESG Aziendale.

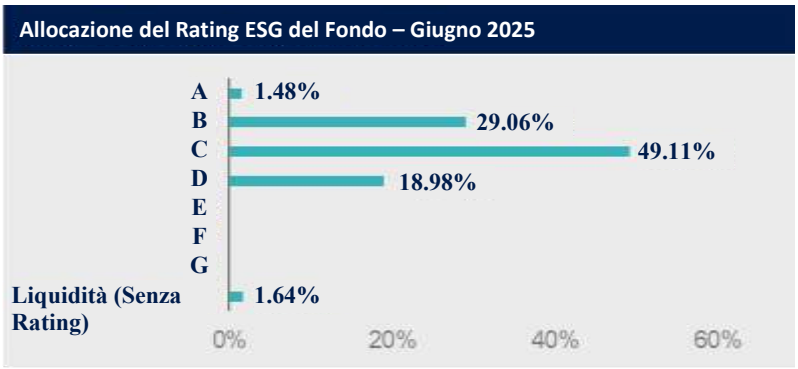
4. Il punteggio ESG medio ponderato del portafoglio è stato costantemente superiore al punteggio ESG medio ponderato del benchmark del fondo dopo aver eliminato il 20% degli emittenti peggiori. *(regola applicabile fino a fine dicembre 2024, successivamente la soglia è stata aumentata al 25%)*

5. Il fondo ha privilegiato gli emittenti che sono leader nel loro settore di attività secondo i criteri ESG identificati dal team di analisti extra-finanziari della società di gestione (approccio "best in class"). Ad eccezione delle esclusioni di cui sopra, tutti i settori economici sono rappresentati in questo approccio e l'UCI può quindi essere esposto ad alcuni settori controversi.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

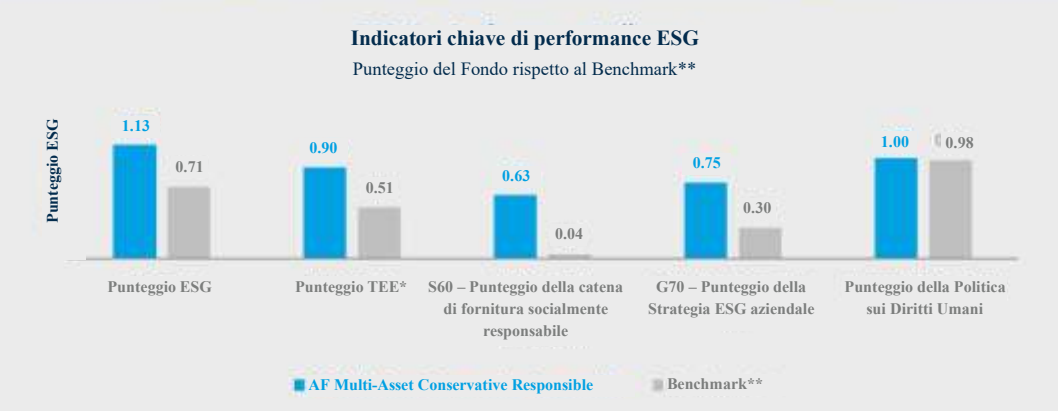
- ***Come si sono comportati gli indicatori di sostenibilità?***

- Impegno a migliorare gli Indicatori di Effetti Negativi Principali rispetto all'universo (benchmark): Intensità di carbonio e assenza di una politica sui diritti umani:



- Impegno a migliorare il rating ESG e Indicatori ESG aggiuntivi (Transizione Energetica e Ecologica, catena di fornitura socialmente responsabile, Strategia ESG aziendale, Politiche sui Diritti Umani come riferimento al Global Compact delle Nazioni Unite):

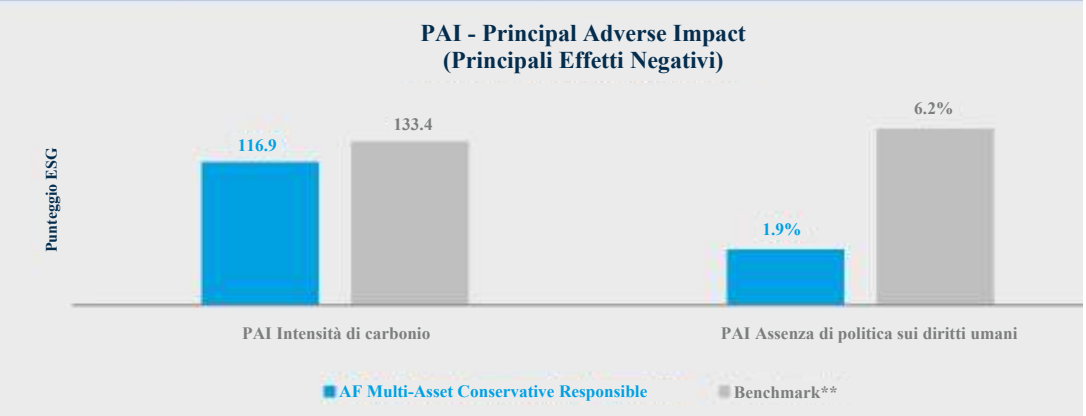
Punteggio degli indicatori chiave di performance ESG del Fondo rispetto al Benchmark** - Giugno 2025



*** L'Indice di Riferimento si riferisce al seguente benchmark [30% MSCI World + 70% Bloomberg Euro Aggregate].*

- Impegno a migliorare gli Indicatori di Effetti Negativi Principali rispetto all'universo (benchmark): Intensità di carbonio e assenza di una politica sui diritti umani:

PAI del Fondo rispetto al Benchmark** - Giugno 2025



Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG del benchmark del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.128 (C).**
- Il rating ESG medio ponderato del portafoglio è **0.711 (C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 1.104 (C) e il rating ESG medio ponderato del benchmark era 0.718 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni,

che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

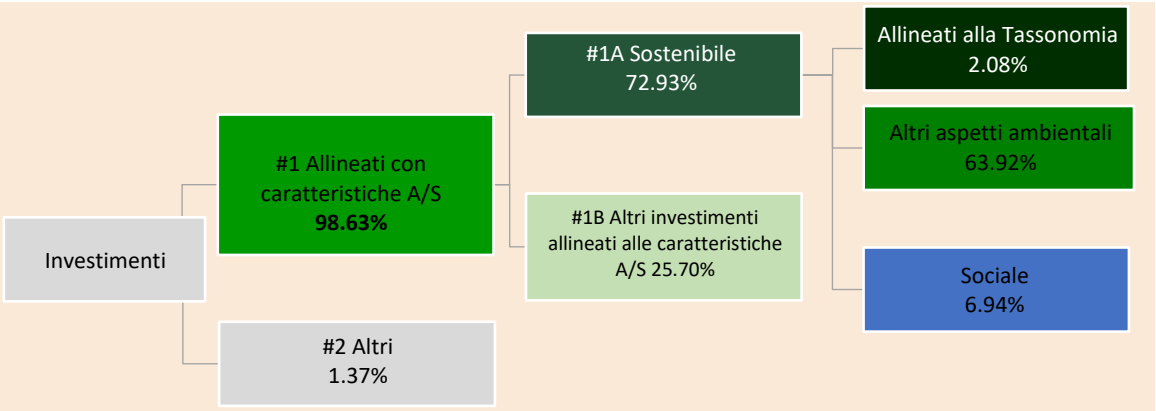
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 72.93% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 2.08% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[ ] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.15%	96.10%	96.91%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.46%*	*0.20%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.85%*	*3.44%*	*2.89%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.36%	94.63%	95.92%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.00%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.72%*	*0.32%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.64%*	*4.65%*	*3.76%*

Questo grafico rappresenta il 62.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.08% e la quota di investimenti in attività abilitanti era pari al 1.11%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.04%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **63.92%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.94%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS MULTI-ASSET CLIMATE

Identificativo della Persona Giuridica: 549300UWEKCHQNE88693

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ Si	☒ No
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **62.01%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali, puntando a ottenere un punteggio ESG superiore a quello del suo universo d'investimento **5% MSCI USD HY CORPORATE BOND INDEX + 50% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 25% MSCI EUR IG CORPORATE BOND INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali, puntando a ridurre la propria intensità di carbonio, allineando l'intensità della propria impronta di carbonio a quella del suo Benchmark **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index.**

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è 0.521 (C).
- Il rating ESG medio ponderato dell'universo d'investimento ESG è -0.003 (D).

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

L'indicatore di sostenibilità utilizzato è l'intensità dell'impronta di carbonio del portafoglio che viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset del Benchmark. Di conseguenza, i titoli con un'impronta ambientale relativamente bassa avevano una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 90.77.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 161.27.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portfolio era 0.519 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era -0.012 (D) fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 93.73 Alla fine del periodo precedente l'intensità di carbonio media ponderata del portfolio era 110.21.

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.
- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

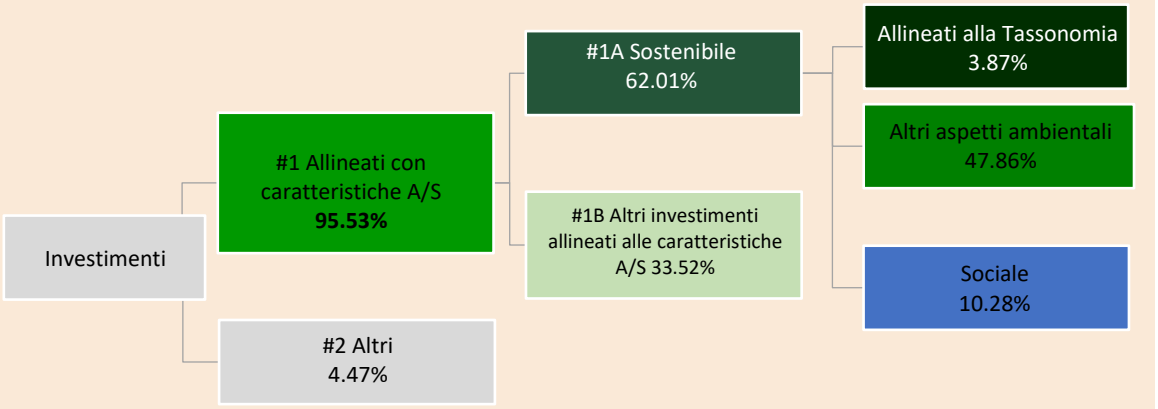
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 62.01% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 3.87% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.05%	94.74%	94.72%
■ Allineati alla Tassonomia: Gas	*0.04%*	*0.14%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.39%*	*0.50%*	*0.29%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.51%*	*4.62%*	*4.96%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.70%	95.32%	95.61%
■ Allineati alla Tassonomia: Gas	*0.05%*	*0.15%*	*0.03%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.26%*	*0.12%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.25%*	*4.27%*	*4.24%*

Questo grafico rappresenta il 92.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.20% e la quota di investimenti in attività abilitanti

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

era pari al 0.95%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.68%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **47.86%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 10.28%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo al 50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND INDEX + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX (ESG). L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 90.77.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 161.27

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

L'indice utilizzato è un "Climate Transition Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***
  - Il rating ESG medio ponderato del portafoglio è 0.521 (C).
  - Il rating ESG medio ponderato dell'universo d'investimento ESG è -0.003 (D).

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 90.77.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 161.27

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

L'obiettivo di investimento sostenibile viene raggiunto allineando gli obiettivi di riduzione dell'impronta di carbonio del fondo al 50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND INDEX + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX (ESG). L'intensità dell'impronta di carbonio del portafoglio viene calcolata come media del portafoglio ponderata per gli asset e confrontata con l'intensità dell'impronta di carbonio ponderata per gli asset dell'Indice.

Di conseguenza, i titoli con un'impronta ambientale relativamente bassa hanno una maggiore probabilità di essere selezionati nel portafoglio rispetto ai titoli con un'impronta ambientale relativamente alta. Inoltre, il fondo esclude le società sulla base di comportamenti e (o) prodotti controversi, in conformità alla politica di investimento responsabile.

- L'intensità media ponderata dell'impronta di carbonio del portafoglio è 90.77.
- L'intensità media ponderata dell'impronta di carbonio del Benchmark è 161.27

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

L'indice utilizzato è un "Climate Transition Benchmark" che incorpora obiettivi specifici relativi alla riduzione delle emissioni e alla transizione verso un'economia a basse emissioni di carbonio attraverso la selezione e la ponderazione dei componenti sottostanti.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS PIONEER FLEXIBLE OPPORTUNITIES

Identificativo della Persona Giuridica: 5493000SYHI3US1RDZ90

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.33%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **U.S. CPI Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.601 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.509 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset
POSTE ITALIANE SPA	Finanziari	Assicurazioni	Italia	4.63%

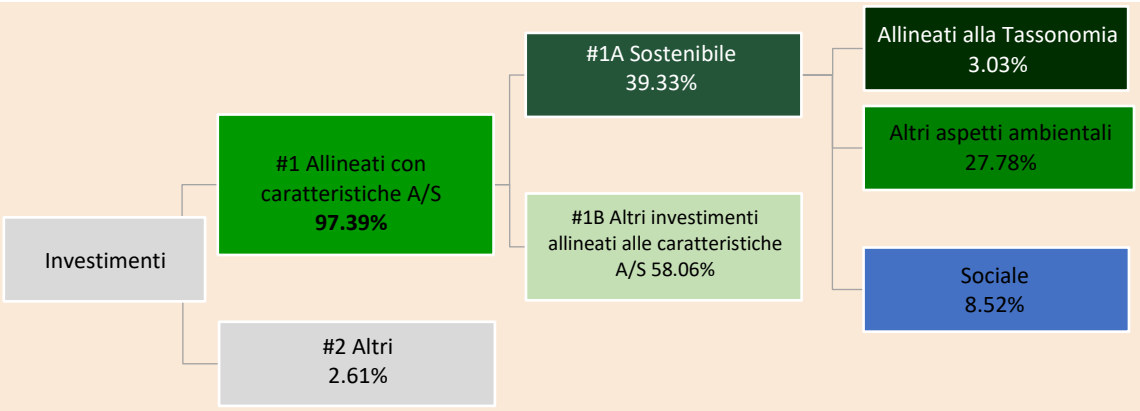
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 39.33% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 3.03% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE. L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.53%	92.83%	96.42%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.21%*	*0.07%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.21%*	*0.11%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.47%*	*6.75%*	*3.39%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	94.02%	92.67%	96.26%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.23%*	*0.08%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.23%*	*0.12%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*5.98%*	*6.86%*	*3.54%*

Questo grafico rappresenta il 91.5% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.42% e la quota di investimenti in attività abilitanti era pari al 1.63%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.35%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **27.78%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 8.52%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identificativo della Persona Giuridica: 549300B49TP3UV3FOI07

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **23.64%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% BLOOMBERG COMMODITY INDEX USD TR + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 10% MSCI World Index / Food Beverage & Tobacco -IG + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% ICE BOFA GLOBAL INFLATION-LINKED GOVERNMENT INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC (ESG)**. Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.419 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.025** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.533 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.045 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

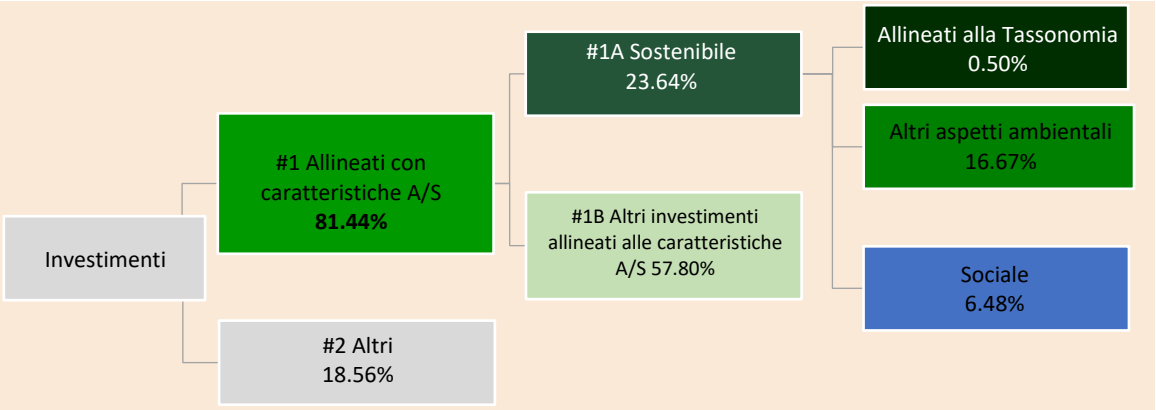
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 23.64% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.50% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.45%	97.84%	98.73%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.25%*	*0.21%*	*0.25%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.29%*	*1.91%*	*1.02%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.42%	97.70%	98.81%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.04%*	*0.04%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.57%*	*2.24%*	*1.14%*

Questo grafico rappresenta il 76.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.17% e la quota di investimenti in attività abilitanti era pari al 0.44%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.01%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **16.67%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.48%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS EURO BOND INCOME

Identificativo della Persona Giuridica: 2221009D0WCSI3Q32Q11

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **47.40%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **60% Bloomberg Euro Aggregate Corporate +40% ICE BofA European Currency High Yield Constrained Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.730 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.435** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.561 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.000 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.
Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.
La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

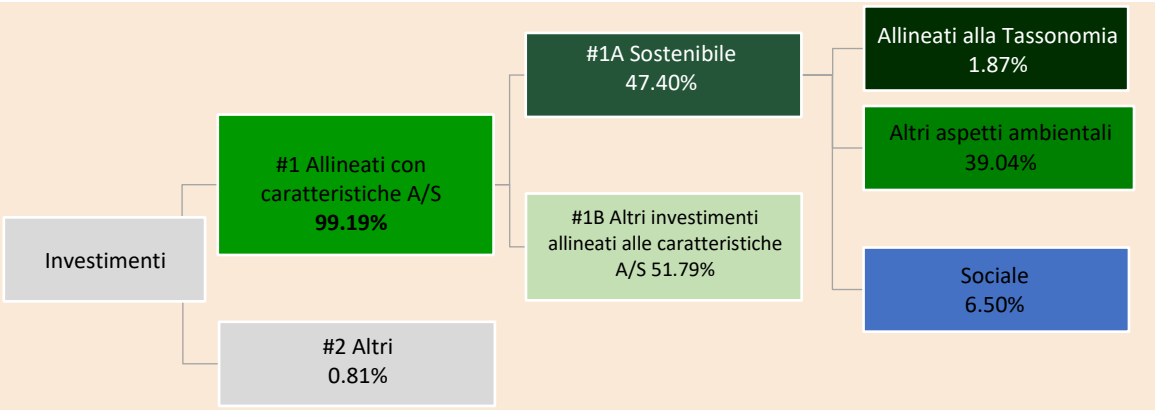
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 47.40% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.87% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.13%	95.57%	96.50%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.59%*	*0.81%*	*0.89%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.29%*	*3.59%*	*2.60%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.60%	96.06%	96.82%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.04%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.53%*	*0.51%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.40%*	*3.38%*	*2.66%*

Questo grafico rappresenta il 95.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.55% e la quota di investimenti in attività abilitanti era pari al 0.57%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 1.96%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **39.4%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.50%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS ABSOLUTE RETURN MULTI STRATEGY

Identificativo della Persona Giuridica: 549300G94XO1UF8XMQ66

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **35.95%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **INDEX AMUNDI RATING D (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.525 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.466 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

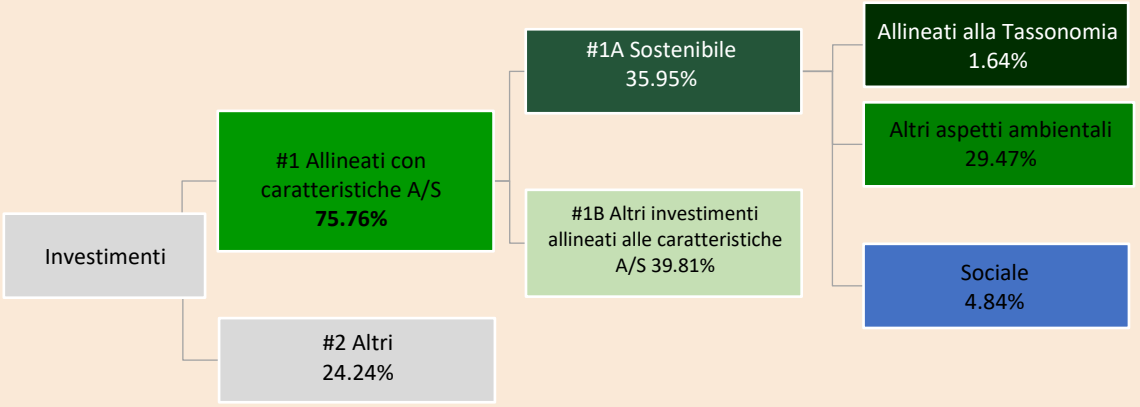
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 35.95% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.64% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.67%	95.31%	97.39%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.05%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.38%*	*0.28%*	*0.12%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.94%*	*4.36%*	*2.47%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.62%	94.73%	97.00%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.07%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.95%*	*0.02%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.37%*	*5.20%*	*2.96%*

Questo grafico rappresenta il 76.1% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.30% e la quota di investimenti in attività abilitanti era pari al 0.79%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.22%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **29.47%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 4.84%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS ABSOLUTE RETURN GLOBAL OPPORTUNITIES BOND

Identificativo della Persona Giuridica: 549300BBK38MPT8QZI59

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ Si	☒ No
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **46.79%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **BLOOMBERG GLOBAL AGGREGATE (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.795 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.619** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***... e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.876 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.699 (C).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 3.79% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.13%	94.76%	95.70%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.09%*	*0.04%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.32%*	*0.22%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.87%*	*4.83%*	*4.04%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.51%	93.67%	95.09%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.13%*	*0.06%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.48%*	*0.32%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*4.49%*	*5.71%*	*4.52%*

Questo grafico rappresenta il 67.0% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.38% e la quota di investimenti in attività abilitanti era pari al 0.29%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.22%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **39.81%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.19%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS MULTI STRATEGY GROWTH

Identificativo della Persona Giuridica: 549300U03843Z1MQX452

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **30.54%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento. Nel determinare lo score ESG del Comparto e dell'Universo d'Investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance. Non è stato designato alcun Indice ESG di riferimento.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.437 (D).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.386 (D) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

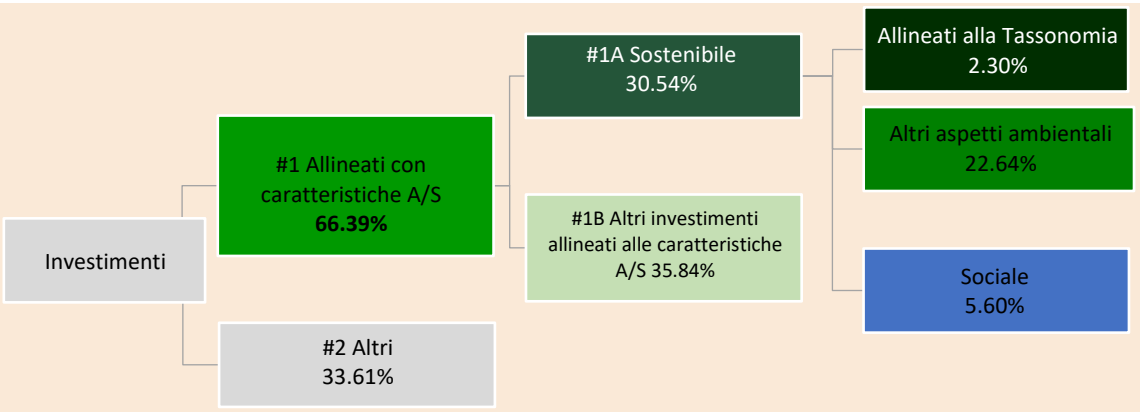
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 30.54% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili. La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 2.30% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	95.96%	94.45%	96.64%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.06%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.60%*	*0.37%*	*0.15%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.43%*	*5.12%*	*3.19%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	96.60%	94.76%	96.70%
■ Allineati alla Tassonomia: Gas	*0.0%*	*0.0%*	*0.0%*
■ Allineati alla Tassonomia: Nucleare	*0.0%*	*0.0%*	*0.0%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*3.38%*	*5.24%*	*3.32%*

Questo grafico rappresenta il 86.6% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.45% e la quota di investimenti in attività abilitanti era pari al 0.94%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.15%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **22.64%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 5.60%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS QUANTITATIVE GLOBAL ABSOLUTE RETURN BOND

Identificativo della Persona Giuridica: 213800ADK5DD5CTZQ486

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **43.88%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **90% Bloomberg Global Aggregate + 10% JPM EMBI Global Diversified Index.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **1.107 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.545** (**C).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 1.067 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

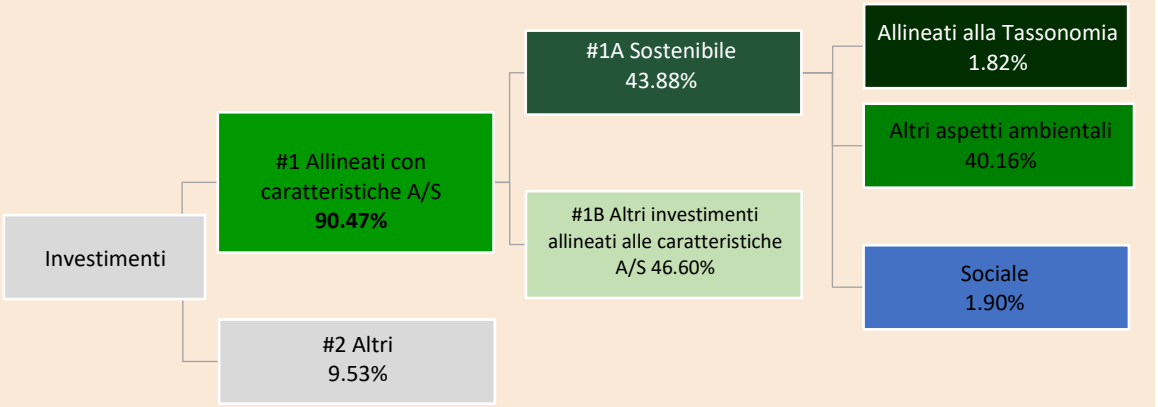
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 43.88% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.82% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.36%	98.18%	97.54%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.00%*
■ Allineati alla Tassonomia: Nucleare	*0.15%*	*0.97%*	*0.50%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.48%*	*0.84%*	*1.95%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.52%	98.58%	97.38%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.01%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*1.29%*	*0.61%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.48%*	*0.11%*	*2.00%*

Questo grafico rappresenta il 66.3% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.22% e la quota di investimenti in attività abilitanti era pari al 0.32%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.05%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia è stata pari al **40.16%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 1.90%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS PROTECT 90

Identificativo della Persona Giuridica: 22210055YWH87PNEL252

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **39.32%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Il Comparto promuove le caratteristiche ambientali e/o sociali, puntando ad avere un punteggio ESG superiore a quello dell'universo d'investimento.

Nel determinare lo score ESG del Comparto e dell'Universo d'Investimento, la performance ESG è stata valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ESG ambientali, sociali e di governance.

Non è stato designato alcun Indice ESG di riferimento.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.589 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.000** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.648 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

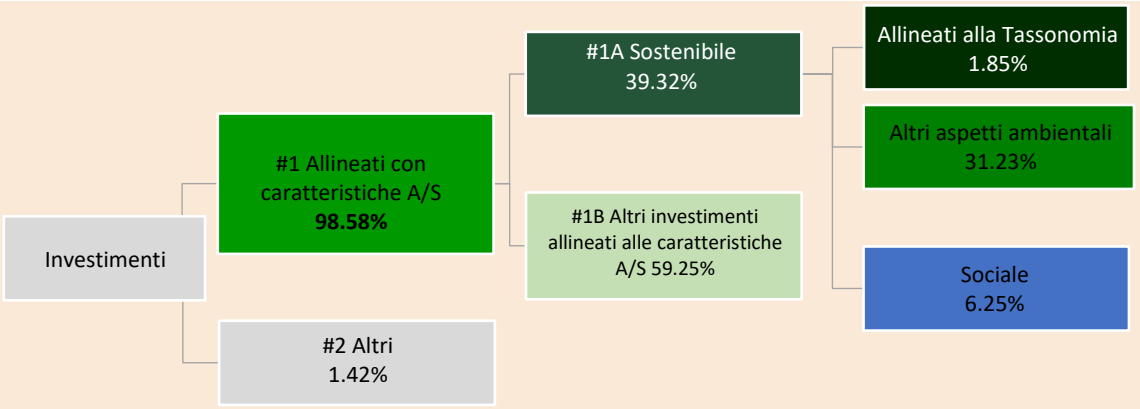
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 39.32% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***

L'asset allocation descrive la quota di investimenti in asset specifici.



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	***Sottosettori***	***% Asset***
Finanziari	*Fondi comuni di investimento*	*98.58%*
Altri	*Altri*	*0.15%*
Forex	*Forex*	*0.04%*
Tesoreria	*Tesoreria*	*0.00%*
Cash	*Cash*	*1.23%*

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- turnover quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- spese in conto capitale (CapEx) investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- spese operative (OpEx) attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.85% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	98.31%	97.26%	97.49%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.03%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.08%*	*0.37%*	*0.24%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.61%*	*2.34%*	*2.25%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.84%	96.42%	96.45%
■ Allineati alla Tassonomia: Gas	*0.01%*	*0.04%*	*0.01%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*0.46%*	*0.29%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.14%*	*3.08%*	*2.95%*

Questo grafico rappresenta il 72.2% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.13% e la quota di investimenti in attività abilitanti era pari al 0.69%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.36%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **31.23%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 6.25%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS CASH EUR

Identificativo della Persona Giuridica: 5299002SSK89DA5VPJ96

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **64.50%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX.** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo.
Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.993 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.098** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.849 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.051 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

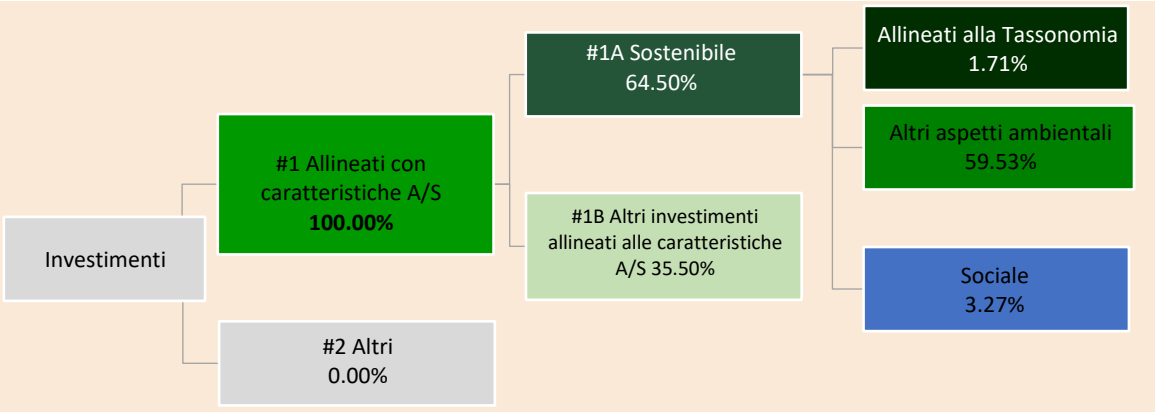
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 64.50% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 1.71% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.22%	96.07%	97.00%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.03%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*2.19%*	*1.25%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.77%*	*1.71%*	*1.73%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	99.00%	95.76%	97.10%
■ Allineati alla Tassonomia: Gas	*0.00%*	*0.04%*	*0.02%*
■ Allineati alla Tassonomia: Nucleare	*0.01%*	*2.63%*	*1.39%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*0.99%*	*1.58%*	*1.49%*

Questo grafico rappresenta il 77.8% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.14% e la quota di investimenti in attività abilitanti era pari al 0.53%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.63%.

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **59.53%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.27%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, commi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI FUNDS CASH USD

Identificativo della Persona Giuridica: 529900YRTK94MJYXUO62

Caratteristiche ambientali e/o sociali

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **Tassonomia UE** è un sistema di classificazione istituito dal Regolamento (UE) 2020/852, che stabilisce un elenco di **attività economiche ecosostenibili**. Tale regolamento non definisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Si**	☒ **No**
☐ Ha effettuato **degli investimenti sostenibili con un obiettivo ambientale: _____**	☒ Ha **promosso caratteristiche ambientali/sociali (A/S) sostenibili** e pur non avendo come obiettivo un investimento sostenibile, ha avuto una quota del **48.76%** di investimenti sostenibili
☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE	☒ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia UE	☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
	☒ con un obiettivo sociale
☐ Ha effettuato degli **sostenibili con un obiettivo sociale: _____**	☐ Ha promosso caratteristiche di A/S, **ma non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha promosso costantemente le caratteristiche ambientali e/o sociali puntando ad avere un punteggio ESG superiore a quello del suo universo d'investimento **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX (ESG).** Nel determinare lo score ESG del Prodotto e l'universo d'investimento ESG, la performance ESG è stata costantemente valutata confrontando la performance media di un titolo rispetto al settore dell'emittente del titolo, in relazione a ciascuna delle tre caratteristiche ambientali, sociali e di governance.

L'universo d'investimento è un ampio universo di mercato che non valuta o include componenti basate su caratteristiche ambientali e/o sociali e non è pertanto destinato ad essere coerente con le caratteristiche promosse dal fondo. Non è stato definito alcun benchmark ESG.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Come si sono comportati gli indicatori di sostenibilità?***

Amundi ha sviluppato un proprio processo di rating ESG interno basato sull'approccio "Best-in-class". I rating adattati a ciascun settore di attività mirano alla valutazione delle dinamiche in cui operano le aziende.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del prodotto, il quale è misurato rispetto al punteggio ESG dell'Universo di Investimento del prodotto.

Alla fine del periodo:

- Il rating ESG medio ponderato del portafoglio è **0.585 (C).**
- Il rating ESG medio ponderato dell'universo d'investimento ESG è **0.098** (**D).**

Il Rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio di tipo quantitativo espresso in sette gradi, che vanno da A (universo dei punteggi migliori) a G (punteggi peggiori). Nella scala di rating ESG di Amundi, i titoli appartenenti all'elenco di esclusione corrispondono a un G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri pertinenti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per sviluppare il proprio capitale umano e il rispetto dei diritti umani in generale;
- Dimensione della governance: Valuta la capacità dell'emittente di garantire le basi per un quadro di corporate governance efficace e di generare valore nel lungo termine.

La metodologia applicata dal rating ESG di Amundi si avvale di 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o settoriali, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione relativa a un emittente. I rating ESG di Amundi possono essere espressi a livello globale sulle tre dimensioni E, S e G o a livello individuale su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente il rating ESG medio ponderato del portafoglio era 0.736 (C) e il rating ESG medio ponderato dell'universo d'investimento ESG era 0.051 (D).

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario intendeva parzialmente realizzare e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli investimenti sostenibili hanno come obiettivo l'investimento in società beneficiarie che cerchino di rispettare due criteri:

1. seguire le migliori prassi ambientali e sociali; e
2. evitare di produrre beni o prestare servizi che arrechino danni ambientali e sociali.

Per poter affermare che l'impresa beneficiaria degli investimenti contribuisce al predetto obiettivo deve trattarsi di una società "best performer" nel proprio settore di attività con riferimento ad almeno un fattore ambientale o sociale rilevante.

La definizione di "best performer" si basa sull'esclusiva metodologia ESG di Amundi per la misurazione della performance ESG di un'impresa beneficiaria di investimenti. Per poter essere considerata "best performer", un'impresa beneficiaria di investimenti deve ottenere un rating compreso tra i migliori tre (A, B o C su una scala di rating che va da A a G) nel proprio settore con riferimento ad almeno un fattore ambientale o sociale rilevante. I fattori ambientali e sociali rilevanti sono identificati a livello del settore. L'identificazione dei fattori rilevanti si basa sul quadro di analisi ESG di Amundi che combina dati extrafinanziari e analisi qualitativa del settore associato con le tematiche della sostenibilità. I fattori identificati come rilevanti sono quelli da cui risulta un contributo al punteggio ESG complessivo che sia superiore al 10%. Per il settore energetico per esempio i fattori rilevanti sono: emissioni e energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per una panoramica più completa sui predetti settori e fattori, consultare la dichiarazione regolativa di Amundi in materia ESG sul sito www.amundi.lu.

Per contribuire ai predetti obiettivi, l'impresa beneficiaria degli investimenti non dovrebbe avere un'esposizione significativa verso settori di attività (quali, per esempio, tabacco, armi, gioco d'azzardo, carbone, aviazione, produzione di carni, produzione di fertilizzanti e pesticidi, produzione di plastica monouso) incompatibili con i criteri sopra indicati.

La natura sostenibile di un investimento è valutata a livello dell'impresa beneficiaria degli investimenti.

I principali effetti negativi sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario ha inteso in parte realizzare non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino un danno significativo ("DNSH"), Amundi si avvale di due filtri:

Il primo filtro DSNH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, delle RTS (Regulatory Technical Standards, norme tecniche di regolamentazione) quando sono disponibili dati affidabili e significativi (per es. intensità delle emissioni di gas serra da parte delle imprese beneficiarie degli investimenti) attraverso una combinazione di indicatori (per es. l'intensità carbonica) e specifiche soglie o regole (per es. che il livello dell'intensità carbonica dell'impresa beneficiaria degli investimenti non rientri nell'ultimo decile del settore).

Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

Oltre gli specifici indicatori relativi ai Principali Effetti Negativi sui fattori di sostenibilità contemplati nel primo filtro, Amundi ha definito un secondo filtro, che non tiene conto degli indicatori obbligatori concernenti i Principali Effetti Negativi sopra descritti, al fine di verificare che la società non abbia un rendimento negativo da un punto di vista complessivo ambientale o sociale rispetto ad altre aziende nel suo stesso settore, cosa che corrisponde a un punteggio ambientale o sociale superiore o uguale a E nella scala di rating ESG di Amundi.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***
  Gli indicatori relativi agli effetti negativi sono stati presi in considerazione come riportato nel primo filtro "non arrecano un danno significativo" (DNSH), sopra descritto.
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori concernenti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del regolamento delegato (UE) 2022/1288, quando sono disponibili dati affidabili e significativi attraverso la combinazione dei seguenti indicatori e specifiche soglie o regole:
  - Avere un'intensità di CO2 che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore (applicabile solo a settori ad alta intensità), e
  - Avere un grado di diversità nel Consiglio di Amministrazione che non rientri nell'ultimo decile rispetto alle altre aziende nel medesimo settore, e
  - Non essere implicata in controversie riguardanti le condizioni di lavoro e i diritti umani.
  - Non essere implicata in controversie riguardanti biodiversità e inquinamento.

  Amundi prende attualmente in considerazione alcuni dei Principali Effetti Negativi nell'ambito della propria politica di esclusione, facente parte della Politica di Amundi per l'Investimento Responsabile. Tali esclusioni, che si applicano in aggiunta ai test sopra descritti, coprono i seguenti temi: esclusione di armi controverse, violazione di Principi del Global Compact dell'ONU, settore del carbone e del tabacco.

- ***Gli investimenti sostenibili erano allineati alle linee guida OCSE destinate alle imprese multinazionali e ai Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***
  Si, le Linee guida OCSE destinate alle imprese multinazionali e i Principi Guida ONU su imprese e diritti umani sono integrati nella metodologia di rating ESG di Amundi. Il nostro meccanismo esclusivo di rating valuta gli emittenti servendosi dei dati disponibili provenienti dai nostri fornitori di dati. Per esempio, il modello ha un criterio dedicato denominato "Coinvolgimento della Comunità e Diritti Umani" che viene applicato a tutti i settori oltre ad altri criteri correlati ai diritti umani, tra i quali catene di fornitura socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, effettuiamo il monitoraggio delle controversie con frequenza almeno trimestrale includendo aziende identificate per la violazione di diritti umani. Nel caso in cui emerga una controversia, gli analisti stimano la situazione, assegnano un punteggio alla controversia (servendosi della nostra metodologia esclusiva) e stabiliscono il modo migliore di agire. I punteggi relativi alle controversie vengono aggiornati trimestralmente per tenere traccia dell'andamento e delle misure adottate per porvi rimedio.

La Tassonomia UE stabilisce il principio "non arreca un danno significativo", in base al quale gli investimenti allineati alla Tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della Tassonomia UE, ed è accompagnata da criteri specifici dell'UE.

Il principio di "non arreca un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'UE per le attività economiche sostenibili dal punto di vista ambientale. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri UE per le attività economiche sostenibili dal punto di vista ambientale.

Qualsiasi altro investimento sostenibile non deve inoltre arrecare danni significativi ad alcun obiettivo ambientale o sociale.

Questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il prodotto prende in considerazione tutti i Principali Effetti Negativi di cui all'Allegato 1, Tabella 1, del Regolamento delegato (UE) 2022/1288, applicabile alla strategia del prodotto e si basa su una combinazione di politiche di esclusione (normative e settoriali), impegno e approcci di voto:

- Esclusione: Amundi ha definito regole di esclusione basate su previsioni normative, su attività e su settori, le quali coprono alcuni degli indicatori chiave relativi agli effetti negativi sulla sostenibilità elencati dal Regolamento sull'Informativa (Disclosure).
- Integrazione dei fattori ESG: Amundi ha adottato le norme minime di integrazione ESG applicate automaticamente ai propri fondi di tipo aperto gestiti attivamente (esclusione di emittenti con rating pari a G e punteggio medio ponderato ESG migliore di quello del benchmark applicabile). I 38 criteri utilizzati nell'approccio di rating ESG di Amundi sono stati ideati in modo da tenere conto anche degli effetti chiave sui fattori di sostenibilità, e la qualità delle azioni di mitigazione intraprese è presa in considerazione anche a tale riguardo.
- Engagement: il coinvolgimento (engagement) degli emittenti è un processo continuo e mirato che cerca di influire sulle attività e sui comportamenti delle società beneficiarie degli investimenti. L'obiettivo delle attività di engagement può ricadere in due categorie: coinvolgimento dell'emittente per migliorare le modalità di integrazione della dimensione ambientale e sociale, coinvolgimento dell'emittente per migliorare l'impatto delle attività di quest'ultimo sugli aspetti ambientali, sociali e correlati ai diritti umani o sulle altre tematiche della sostenibilità che siano rilevanti per la società e l'economia globale.
- Voto: la politica di voto di Amundi risponde a un'analisi olistica completa degli aspetti che, nel lungo periodo, possono influire sulla creazione del valore ivi incluse le tematiche ESG rilevanti. Per ulteriori informazioni, è possibile consultare la Politica di Voto di Amundi.
- Monitoraggio delle controversie: Amundi ha elaborato un sistema per tracciare le controversie che si basa su tre fornitori di dati indipendenti per il monitoraggio sistematico delle controversie e della loro gravità. Questo approccio quantitativo è quindi integrato da una valutazione approfondita, da parte degli analisti ESG, di ogni controversia grave e dal riesame periodico della sua evoluzione. Questo approccio viene applicato a tutti i fondi Amundi.

Per ulteriori dettagli su come vengono presi in considerazione gli indicatori obbligatori concernenti i Principali Effetti Negativi, si rimanda al Disclosure Statement di Amundi Sustainable Finance disponibile sul sito www.amundi.com.

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che costituiscono **la quota maggiore degli investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **Dal 01/07/2024 al 30/06/2025**

Maggiori Investimenti	Settore	Sottosettori	Paese	% Asset

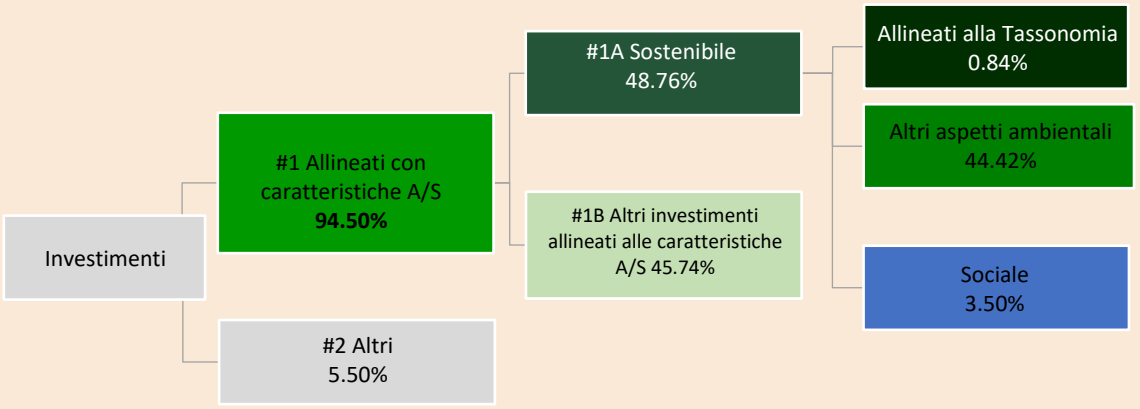
Qual è stata la quota di investimenti legati alla sostenibilità?

Il fondo ha investito il 48.76% in investimenti legati alla sostenibilità.

- ***Qual è stata l'allocazione degli asset?***



#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende i restanti investimenti del prodotto finanziario che non sono allineati alle caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- La sottocategoria **#1A Sostenibili** contempla gli investimenti sostenibili con obiettivi ambientali o sociali.
- La sottocategoria **#1B Altre caratteristiche A/S** contempla gli investimenti allineati alle caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

L'asset allocation descrive la quota di investimenti in asset specifici.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Per conformarsi alla Tassonomia UE, i criteri per il **gas fossile** includono limitazioni alle emissioni e il passaggio a energia completamente rinnovabile o a combustibili a basso contenuto di carbonio entro la fine del 2035. Per quanto riguarda l'**energia nucleare,** i criteri includono norme complete sulla sicurezza e sulla gestione delle scorie

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le attività di transizione sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

Le attività allineate alla tassonomia sono espresse in percentuale di:
- **turnover** quota di entrate da attività verdi delle imprese beneficiarie degli investimenti.
- **spese in conto capitale (CapEx)** investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, ad es. per la transizione verso un'economia verde.
- **spese operative (OpEx)** attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla Tassonomia UE?

Il fondo promuove sia caratteristiche ambientali che sociali. Sebbene il fondo non si sia impegnato ad effettuare investimenti allineati alla Tassonomia UE, nel periodo di riferimento ha investito lo 0.84% in investimenti sostenibili allineati alla Tassonomia UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione del cambiamento climatico della tassonomia dell'UE.
L'allineamento delle società partecipate ai suddetti obiettivi della Tassonomia UE viene misurato utilizzando i dati relativi al fatturato (o ai ricavi) e/o all'utilizzo dei proventi dei green bond.
La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***Il prodotto finanziario ha investito in attività legate al gas fossile e/o all'energia nucleare conformi alla Tassonomia UE[1]?***

[X] Sì:

[X] In gas fossile [X] In energia nucleare

[ ] No

I grafici che seguono mostrano in verde la percentuale di investimenti allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Investimenti allineati alla tassonomia **comprese le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.96%	95.80%	97.81%
■ Allineati alla Tassonomia: Gas	*0.05%*	*0.13%*	*0.04%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.59%*	*0.46%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*1.99%*	*3.48%*	*1.69%*

2. Investimenti allineati alla tassonomia **escluse le obbligazioni sovrane***

	OpEx	*CapEx*	*Fatturato*
■ Non allineati alla Tassonomia	97.78%	95.50%	97.66%
■ Allineati alla Tassonomia: Gas	*0.06%*	*0.14%*	*0.04%*
■ Allineati alla Tassonomia: Nucleare	*0.00%*	*0.63%*	*0.49%*
■ Allineati alla Tassonomia [Non gas e nucleare]	*2.17%*	*3.73%*	*1.81%*

Questo grafico rappresenta il 91.9% degli investimenti totali.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane.*

[1] Le attività legate ai gas fossili e/o al nucleare saranno conformi alla tassonomia UE solo se contribuiranno a limitare i cambiamenti climatici ("mitigazione dei cambiamenti climatici") e non danneggeranno in modo significativo alcun obiettivo della Tassonomia UE. I criteri completi per le attività economiche legate al gas fossile e all'energia nucleare conformi alla Tassonomia UE sono stabiliti nel Regolamento delegato (UE) 2022/1214 della Commissione.

- ***Qual è stata la quota di investimenti effettuati in attività transitorie e abilitanti?***

Al 30/06/2025, utilizzando come indicatore i dati relativi al fatturato e/o all'utilizzo dei proventi dei green bond, la quota di investimenti del fondo in attività transitorie era pari allo 0.04% e la quota di investimenti in attività abilitanti era pari al 0.45%. La percentuale di allineamento degli investimenti del fondo con la Tassonomia UE non è stata verificata dai revisori del fondo o da terzi.

- ***In che modo la quota di investimenti allineati alla Tassonomia UE è stata confrontata con i periodi di riferimento precedenti?***

Alla fine del periodo precedente percentuale di investimenti con allineamento alla tassonomia era dello 0.39%.

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili ai sensi del Regolamento (UE) 2020/852.

Qual è stata la quota di investimenti sostenibili con un obiettivo ambientale che non sono allineati alla Tassonomia UE?

La quota di investimenti sostenibili con obiettivi ambientali non allineati alla tassonomia era pari al **44.42%** alla fine del periodo.
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del regolamento SFDR, ma svolgono una parte delle attività che non sono in linea con gli standard di Tassonomia UE o per i quali non sono ancora disponibili i dati per effettuare una valutazione della Tassonomia UE.

Qual è stata la quota di investimenti socialmente sostenibili?

La quota di investimenti socialmente sostenibili alla fine del periodo era del 3.50%.

Quali investimenti erano compresi nella categoria "#2 Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

"#2 Altri" include la liquidità e altri strumenti detenuti per la gestione del rischio di liquidità e di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in atto salvaguardie ambientali e sociali minime attraverso uno screening controverso rispetto ai Principi del Global Compact delle Nazioni Unite. Inoltre, possono esservi inclusi titoli privi di rating ESG per cui non sono disponibili i dati necessari a misurare il conseguimento di caratteristiche ambientali o sociali.

Che azioni sono state intraprese per soddisfare le caratteristiche ambientali e/o sociali nel periodo di riferimento?

Gli indicatori di sostenibilità sono costantemente disponibili nel sistema di gestione del portafoglio, consentendo ai gestori del portafoglio di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono incorporati nel quadro di controllo di AMUNDI, con responsabilità distribuite tra il primo livello di controlli eseguiti dagli stessi team di investimento e il secondo livello di controlli eseguiti dai team di Rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base continuativa.

Inoltre, la Politica di investimento responsabile di AMUNDI definisce un approccio attivo basato sull'engagement che promuove il dialogo con le società beneficiarie dell'investimento, comprese quelle presenti nel portafoglio di questo prodotto. Il nostro Annual Engagement Report, disponibile su https://about.amundi.com/esg-documentation, fornisce un resoconto dettagliato di questo impegno e dei suoi risultati

Come si è comportato questo prodotto finanziario rispetto all'indice di riferimento?

Gli indici di riferimento sono indici atti a misurare se il prodotto finanziario rispetta le caratteristiche ambientali o sociali che promuove.

Questo prodotto non dispone di un Benchmark ESG.

- ***In che modo l'indice designato differisce da un benchmark generale di mercato pertinente?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto agli indicatori di sostenibilità per determinare l'allineamento del benchmark di riferimento alle caratteristiche ambientali o sociali che promuove?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto al benchmark di riferimento?***

Questo prodotto non dispone di un Benchmark ESG.

- ***Come si è comportato questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non dispone di un Benchmark ESG.
