

RITRANSPARENCY REPORT 2019

Amundi

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

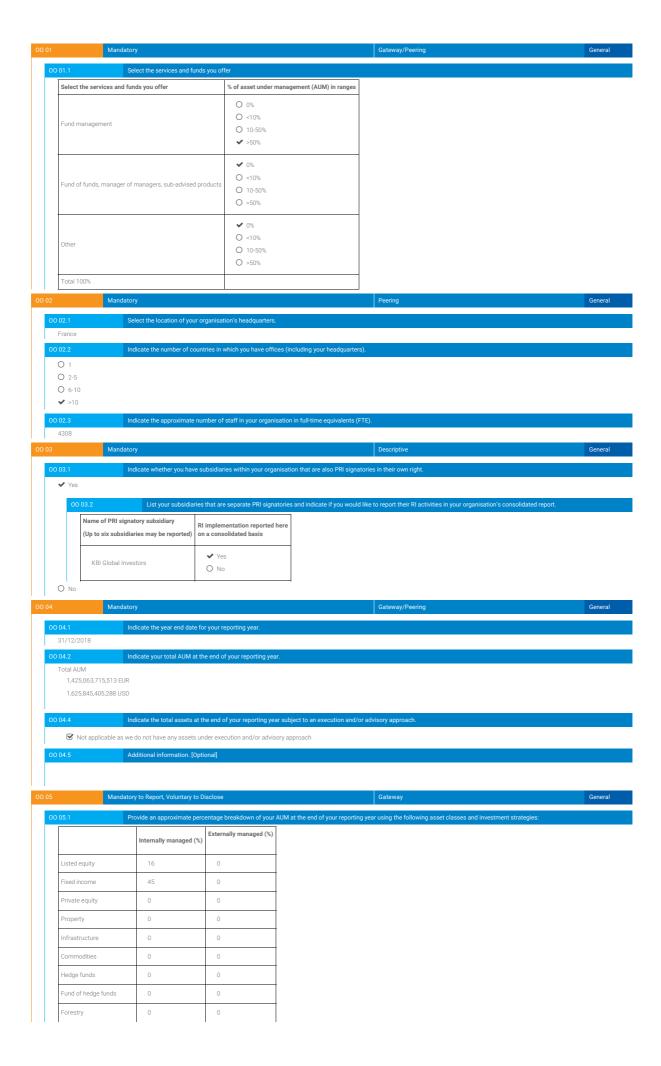

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

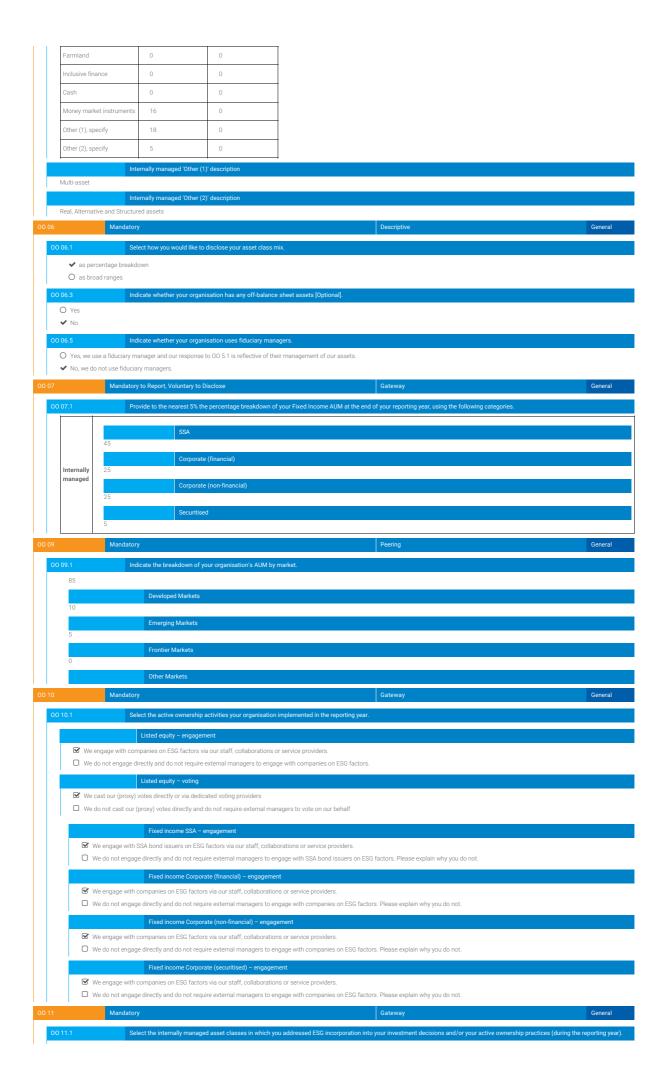

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

SG 01.6 CC Indicate the climate-related risks and opportunities that have been identified and factored into the investment strategies and products, within the organisation's investment time horizon. Climate change risk assessment at Amundi consists in:

- TRANSITION RISKS

- Measure carbon exposure: carbon footprint
 Corporate or financial issuers' securities
 Sovereign or quasi-sovereign bonds
 Assees Energy Transition Risk: ET rating
 Exposure of a company to the energy transition risk and management of that risk

PHYSICAL RISKS 1. Analyze the impact of physical risks on issuers' ESG profile 2. Assess the impact of physical risks on the financial performance of portfolio SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks? ✓ Yes SG 01.8 CC Indicate the associated timescales linked to these risks and opportunities. We believe that climate change risks can materialise on the short, medium and long-term. No SG 01.9 CC Indicate whether the organisation publicly supports the TCFD? ✓ Yes No SG 01.10 CC Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related ri ✓ Yes Describe • Transition Risks Our approach is threefold: i) measure, ii) assess and iii) anticipate. 1.1 Measure the Carbon Exposure

Before actions can be taken to tackle risks, the exposure to the risks must be measured. Amundi has developed a "bottom-up" carbon footprint methodology that measures the CO2e/M€ invested in our client portfolios, for both equity and fixed income. CO2e being "CO2 equivalent" and defined as "the universal unit of measurement to indicate the global warming potential (GWP) of each of the six greenhouse gases, expressed in terms of the GWP of one unit of carbon dioxide. It is used to evaluate releasing (or avoiding releasing) different greenhouse gases against a common basis." Source: GHG Protocol.

1.2 Assess: Energy Transition rating

For each individual issuer, Amundi has developed an Energy Transition rating (TE rating) that assesses both the exposure of a company to the energy transition risk and the way this risk is anticipated and handled by the company's management team. The rating assesses the contribution of a company to the Energy Transition. The rating scale ranges from A to F, with A being the highest rating. As an example, an energy company involved primarily in bituminous sands without clear strategy to divest from the sector will have a TE rating of E or below.

1.3 Anticipate: estimate the impact of the 2°C Alignment risks on the performance of an investment portfolio

Amundi decided to adopt both a 'top-down' and 'bottom-up' approach to assess the 2°C Alignment risks.

Top-down: Amundi ESG Research team and CASA Research teams are joining force to research the highly complex so called 2°C Alignment risks. We base our research on the industry well recognized P9XCA methodology (developed by CASA group) that generates a sector-based and geographical mapping of carbon emissions.

Bottom-Up: Amundi uses the above-mentioned top-down assessment framework together with a bottom-up approach to develop a 2°C alignment risk assessment tool that is adapted to the needs of its core business of asset management and that allows to fine-tune the TE rating by adding the 2°C alignment risk assessment and management as a criteria of the TE rating, estimate the impact of the alignment risk of a portfolio on its financial performance, serve as a country, sector and issuers allocation tool for fund managers.

Physical Risks

Crédit Agricole group has developed physical risk assessment methodologies:

- Through our insurance sister companies that have gathered long-dated expertise in assessing-climate related physical risks and ;
- Through a top-down model combining both sector and geographical analysis of the physical risks.

Amundi is leveraging on Crédit Agricole group's methodologies to build a model specific to asset management, in order to:

- Analyze the impact of physical risks on issuers' ESG profile;
- Assess the impact of physical risks on the financial performance of investment portfolios.

Contribution to working groups and consultations on ESG issues

Amundi is an active participant in working groups conducted by market bodies aimed at moving responsible finance, sustainable development and corporate governance forward. Amundi's memberships include the French Asset Management Association (AFG), the European Fund and Asset Management Association (EFAMA), the French Institute of Administrators (IFA), the Corporate Social Responsibility Observatory (ORSE), the French Association of Financial Analysts (SFAF), Sustainable Investment Forums in France, Spain, Italy, Sweden, Canada, Japan, Australia, and the French Association of Businesses for the Environment, Amundi is also a member and Director of Finansol.

Amundi is also a member of Finance for Tomorrow, an initiative led by Paris EUROPLACE and the actors of the Paris Financial Center to promote sustainable finance in France and internationally. Amundi leads one of the working groups, on Public Affairs.

In 2018, Amundi also made contribution to several consultations about ESG integration: European Commission consultations (disclosures / framework / investors and asset managers' duties), HLEG, AFG, SIF Ireland, AMF, PRI Fiduciary duty in the 21st century etc.

☑ Improved ESG incorporation into investment decision making processing the processing of the pro

Key performance indicator

Amundi applies filters that exclude the worst-rated companies by its ESG analysts to more than €1.4 trillion of assets under management.

Additionally, Amundi manages more than €275 billion in responsible assets, incorporating environ sustainable, long-term returns that address sustainable development issues

With the 3-year plan announced in October 2018 to strenghten Amundi's commitment to responsible investment, Amundi aims to implement a positive ESG approach to allocation choice across all our open-ended portfolios. Amundi is moving beyond an exclusion-only approach to establish an unprecedented level of ESG integration throughout the organization. Additionally, Amundi will continue to design innovative responsible solutions to respond to all clients' needs.

Mainstreaming ESG investing: 100% ESG INTEGRATION

By 2021, all actively managed open-ended funds will have to maintain a higher ESG score than their benchmark index. Basically, that means mainstreaming the practice of over- or underweighting holdings based on ESG ratings. Beyond the voting & engagement policy, passive strategies can integrate ESG through ready-to-use ESG index funds and ETFs or customized solutions.

Measure of the contribution of the ESG signal to performance of the portfolio

Amundi has published in December 2018 a new research on the impact of ESG investing on equity asset pricing t finds that when an alpha strategy is massively implemented, it becomes a beta strategy.

The study focused on the period 2010-2017 and used Amundi's proprietary ESG scores and Environmental, Social and Governance (E,S and G) sub-components to screen portfolios. The analysis was conducted for passive, active and multi-factor portfolios for Europe and North America, among others.

From 2014-2017, responsible investing was generally a source of outperformance in the Eurozone and North America. In the Eurozone, all pillars (Environmental, Social and Governance) and ESG score integration displayed positive returns, with the Governance pillar dominating. In North America, ESG investing during the 2014-2017 period also displayed positive returns, although the Environmental component is the largest winner.

Our study identifies several performance generation mechanisms, demonstrating that stock prices integrate ESG-related information at different levels. These mechanisms are dependent on the geographic region studied, the ESG focus, the ranking (best / worst-ranking or all gradients) and the period studied.

✓ Over or underweight companies based on ESG characteristics

ESG/SRI rules

With the aim of meeting investors' multiple needs regarding Responsible Investing, Amundi has developed a wide range of open-ended funds and bespoke ESG solutions

- take into account E, S and G criteria simultaneously
- apply a best-in-class rating process,
- cover traditional and non-traditional asset classes.
- ...through different ESG portfolio construction processes

Amundi's SRI portfolios (Afnor certification):

- have a best in class approach: over or underweigthing of companies depending on their ESG rating,
- exclusion of F. F. and G. rated issuers.

All SRI portfolios respect Amundi's SRI rules. This is verified internally by the risk team and also through the AFNOR certification.

. Objective of 100% ESG integration

By 2021, all actively managed open-ended funds will have to maintain a higher ESG score than their benchmark index. Basically, that means mainstreaming the practice of over- or underweighting holdings based on ESG ratings. Beyond the voting & engagement policy, passive strategies can integrate ESG through ready-to-use ESG index funds and ETFs or customized solutions.

☑ Improve ESG ratings of portfolio

Key performance indicator

ESG performance of the portfolio vs its benchmark

- All SRI portfolios must have an average ESG rating higher than C and higher than the ESG average of their benchmark. This is verified internally by the risk team and also through the AFNOR certification. This is also disclosed in the monthly reporting of the SRI funds.
- By 2021, all actively managed open-ended funds will have to maintain a higher ESG score than their benchmark index (cf 3-year action plan:

Low carbon and Green bonds funds / Carbon Reporting

Amundi has designed innovative financial solutions, across main asset classes, to make fight against climate change accessible to all investors.

Our off-the-shelf and bespoke solutions have three objectives:

- Manage climate-related risks
- Finance the energy transition
- Measure impact outcome

They are part of a range of financial innovations:

- Specific low carbon and decarbonisation strategies with the capacity to measure the carbon footprint of portfolios for both equity and fixed income investments.
- Specific equity, green bond and real assets strategies aiming to finance the energy transition for real economy environmental benefits.
- Specific impact strategy enabling investors to measure their positive impacts on the environment, thereby answering growing regulatory requirements imposed on institutional investors.

Public documentation

Since 2013, we publish Amundi's Engagement report, as an integral part of our policy of engagement for influence. In this report, we highlight best practices and measure companies' progress based on a grid on success indicators related to the examined themes and set up by the ESG analysts.

In addition, we produce several thematic studies on themes linked to major sustainable development issues that allow us to highlight ESG best practices. They are available on amundi.com / Research

2018. The right for all to have access to decent work and a decent wage is outlined by the ILO and SDG8 pertaining to Decent Work and Economic Growth. Going forward Amundi hopes to increase its impact by leveraging resources with the PLWF to exert a stronger influence on companies whose operations affect living wages globally, and encourage ILO standards on decent wage to spread FINANCE FOR TOMORROW Advanced Amundi is one of the founding members of this French Initiative launched by Europlace to promote sustainable finance and is actively contributing to the working group "Public Affairs". Helping to remove barriers to the development of green and sustainable finance in France and internationally and ensure policy dialogue and discussion between private actors and public authorities. ✔ Yes sible investment independently of collaborative initiatives. Provide a description of your role in contributing to the 😴 Provided or supported education or training programmes (this includes peer to peer RI support) Your education or training may be for clients, investment managers, actuaries, broker/dealers, investment consultants, legal advisers etc.) We have provided thought leadership and a full support to investors mobilization for responsible investment. - Disseminate best practices globally through our knowledge sharing program, - High level forum gathering CEOs and ClOs to share their experience and convictions at Amund's Executive Program, Disseminate our research to our institutional investor partners; - Increadvisors/wealth managers' awareness of RI issues and opportunities through content sharing and specific training. - Sustainable construction (Construction Industry Products)
- ☑ Incorporation into investment analysis

Describe

We also assess climate change risks with measure of:

- Carbon footprint
- A specific "Energy transition" rating has been established, complementary to the ESG rating, to reflect the exposure of a company to the energy transition risk and the management of that risk. We are also working with Crédit Agricole SA to develop a 2°C aligment tool that will leverage on the CASA P9XCA methodology.
- ☑ Inform active ownership

Describe

Through our ongoing engagement with around 250 companies on a yearly basis, one third of the subjects adressed are related to specific climate-related topics: Energy consumption & Greehouse gas emissions / Environmental strategy / Biodiversity, pollution and waste / Water.

☑ Other

- In 2016, Amundi made the decision to disengage from issuers that derive over 50% of their revenue from coal extraction.
- In 2017, Amundi pursued its proactive approach by changing its policy of divestment from the coal sector. Companies that derive more than 30% of their revenue from coal mining or, following a qualitative and prospective analysis, companies producing 100 million tons or more coal per year, are now excluded from the portfolios.
- In 2018, the threshold has been lowered and the scope has been extended to coal power generation companies:
- 1. Coal Mining Extraction: Exclusion of all companies generating more than 25% of their revenues from coal mining extraction or with annual coal extraction of 100 MT or more without intention to reduce.
- 2. Coal mining Extraction + Coal power generation :
- Exclude all companies with revenue in coal mining extraction and coal power generation upper than 50% of their revenue without analysis.
- Exclude all coal power generation and coal mining extraction companies with a threshold between 25% and 50% with no intention to reduce the % of revenue from coal power generation or coal mining extraction. (analysis based on corporate communication or direct contact with companies).

SG 13.6 CC Indicate whether the organisation has evaluated the impacts of c

We are long-term investors. We are convinced that climate-related risks will play an increasing role in investment strategies in the coming decades. On a shorter horizon, we have announced, in October 2018, our ambition to strengthen initiatives related to the environment and with a strong social impact. The aim is to double the amounts invested in these initiatives, by increasing thematic funds to ϵ 20 billion

O No

SG 13.7 CC Indicate whether a range of climate scenarios is used.

Process for climate-related risks is integrated into overall risks in the process of the related risks in the process of the related risks in the related risks i Please describe related risks and opportunities is part of our fundamental ESG Analysis proces Amundi's ESG analysis is based of 36 criteria: 15 are generic to all sectors and 21 are sector-specific. The generic environmental criteria adress the issues linked to: - Power consumption - Greenhouse gas emissions - Water - Biodiversity - Pollution, - and Waste Among the environmental sector-specific criteria we analyse: - Green vehicles development strategy (Automotive) - Development and production of alternative energy and biofuels (Energy/Utilities) - Responsible forestry (Paper & Forests) - Green finance and insurance (Finance, Insurance) - Sustainable construction (Construction Industry Products) $\begin{picture}(60,0)\put(0,0){\line(0,0){100}}\put(0,0)$ Mr. Yves Perrier, CEO of Amundi; sent a public letter to the Chairmen and CEOs of the European largest companies in March 2019, highlighting the importance of ESG issues; and Amundi's integration of ESG topics in its ongoing shareholder dialogue with companies, in its investment decisions and its voting policy. In our analysis of and dialogue with companies, we wish to give particular importance to two themes in 2019 which represent systemic risks for our society: • Rising temperatures that threaten to trigger destructive chain reactions. We will therefore request that information on greenhouse gas emissions be provided and will monitor all commitments to reduce Widening inequalities, which generates social divisions that jeopardise the economic and political stability of democracies. We encourage the publication of the pay equity ratio (ratio between CEO sation and average employee compensation), which we will analyse in the light of companies' results, industry practices and countries of operation Access to the letter http://about.amundi.com/eziscore/call/eziscamundibuzz::sfForwardFront::paramsList=service=ProxyGedApi&routeld= dl MzlxYzFlYzA1MTczMz02YTZmZGE3MDq0YTk3ZWY40DU O No, we do not engage ✔ Yes Energy efficiency / Clean technology ✓ Listed equity 1% of AUM ☐ Fixed income - SSA ☑ Fixed income - Corporate (financial) 1% of AUM ☐ Fixed income - Corporate (non-financial) ☐ Fixed income - Securitised Other (1) ☐ Other (2) Amundi Valeurs Durables / Amundi Funds Equity Green Impact is a thematic equity SRI fund, investing in European companies generating >20% of their sales in green technologies (re energy, energy efficiency, water and waste management, etc.). It excludes companies that produce fossil/nuclear energy. In December 2018, CPR AM launched a new global thematic equity fund in partnership with CDP. Climate Action, to tackle the issue of Climate Change. It provides investors with a management of climate-related financial by investing in companies committed to limiting the impact of their activities on climate change. Amundi launched its first Green Bonds fund at the end of 2015, and its Impact Green Bonds fund in September 2016. The methodology is based on avoided emissions assessment. Amundi set up a strategic partnership with IFC in 2017 to provide investors the capacity to deploy massive amounts of capital to finance the green transition in emerging countries (\$2billion strategy).

SG 16		Mandatory Descriptive General
S		Describe how you address ESG issues for internally managed assets for which a specific PRI asset class module has yet to be developed or for which you are not required to report because your assets are below the minimum threshold.
	Asset Class	Describe what processes are in place and the outputs or outcomes achieved
	Fixed income - Securitised	The ESG process is the same for all our fixed income corporate managed assets (cf. module FI).
	Money market instruments	All G-rated values are excluded from all Amundi's active management funds, including Monetary funds. We also offer an SRI approach in this field, especially with an SRI fund which objective is to outperform the compounded EONIA, whilst incorporating ESG criteria into the fund's security analysis and selection criteria. The fund implements an SRI strategy based on a combination of approaches: normative (exclusion of issuers with the most questionable ESG practices, rated G) and best-in-class (selection of issuers with the best ESG practices rated A, B, C and D and exclusion of issuers rated E and F).
	Other (1) [as defined in	All G-rated values are excluded from all Amundi's active management funds, including Diversified funds.
	Organisational Overview module]	Amundi also offers SRI funds in its diversified product range, especially through: employee savings offering, solidarity funds.
	Other (2) [as defined in Organisational Overview module]	For Private Equity and loans , Amundi has defined an ESG process that encompasses the entire investment cycle. Early on in the process, deal opportunities are screened against an ESG checklist that help identify no go deals or deals requiring a higher degree of vigilance. If the investment committee approves the deal, a thorough ESG due diligence is carried out which leads to a recommendation that can be positive, positive with reserves or negative. Based on the findings of the due ledgence and the level of recommendation, the ESG analysis team finally enters into an ESG engagement phase where 1) an ESG action plan is negotiated with the company's management 2) regular ESG meetings are scheduled to support and monitor its implementation 3) companies in the portfolio annually report on their progress using both generic ESG indicators and a few KPIs specific to the priority objectives defined in the action plan.

 $\label{thm:product} http://about.amundi.com/ezjscore/call/ezjscamundibuzz:sfForwardFront:paramsList=service=ProxyGedApi&routeld=_dl_M2ExN2Y0NzQyNTBjZWMw0DdkYzMzYTImYTMzZWMyZTg$

■ Negative/exclusionary screening ✓ Product ✓ Activity ✓ Sector ☑ Country/geographic region ☑ Environmental and social practices and performance Corporate governance Organization. Amundi therefore excludes from all its active management*, companies that do not comply with its ESG policy, with international conventions, or with national law and regulations anti-personnel mines. chemical weapons, biological weapons depleted uranium weapons. Those issuers have a G rating on Amundi's rating scale. Amundi has also decided to exclude or underweight in its portfolios certain issuers whose activities have very strong negative externalities exposing them to increasing societal and regulatory pressures. At the end of 2018, this evolution affects two sectors: - Coal: exclusion of companies that derive over 25% of their revenue from coal extraction or that produce more than 100m tons of coal each year, - Tobacco: companies that generate more than 10% of their revenue in the tobacco sector cannot have an ESG rating higher than E (suppliers, many). ✓ Positive/best-in-class screening **☑** Product ✓ Activity **☑** Sector ☑ Country/geographic region Environmental and social practices and performance Our ESG analysis is highly pragmatic: rather than assessing business sectors, it analyses how, within a given sector, companies manage ESG risks and opportunities. Only the best companies are select is best-in-class analysis. In order to rate more than 5,500 issuers, Amundi initially refers to the analysis of ESG rating partner agencies, and other entities specialising in given themes. They are then further enriched by internal analysis. The final rating goes from A (highest score) to G (lowest score) Corporate extra-financial analysis is based on texts with a universal scope, like the United Nations Global Compact, the OECD's guiding principles on corporate governance, the International Labour Organization (ILO), etc. Our internal reference values are comprised of 36 criteria, of which 15 generic criteria, common to all companies whatever their business sector, and 21 sector-specific criteria. Criteria are weighted according to the business sector, regional and legislative context. The greater the risk associated to a criterion, the greater the weight attributed to this criterion. ☑ Norms-based screening ■ UN Global Compact Principles ☑ The UN Guiding Principles on Business and Human Rights ☑ International Labour Organization Conventions United Nations Convention Against Corruption ☑ OECD Guidelines for Multinational Enterprises ☑ Other, specify ILO's Core Labour Standards: Rights of Indigenous Peoples (UN. World Council, OAS): Biological Diversity (UN): Maritime Labour Convention, MARPOL Our investment strategies are based on several principles: promoting respect for international conventions on human rights, the International Labor Organization (ILO) and the environment, as well a advocating a model for responsible and sustainable social development The first application of these principles consists in excluding from our investment strategies companies and countries with unacceptable behaviours - Companies that violate these conventions repeatedly, without implementing suitable corrective measures. - Countries that systematically and wilfully violate human rights and make themselves guilty of the worst crimes: war crimes and crimes against hum Screening criteria are defined and reviewed by the ESG Rating Comr As regards our exclusion policy, the number of companies involved and the reason for their exclusion are published in Amundi's engagement report ☑ Comprehensive ESG research is undertaken or sourced to determine companies' activities and products 🗹 Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies 🗹 External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar ☑ Third-party ESG ratings are updated regularly to ensure that portfolio holdings comply with fund policies. $\hfill \square$ Trading platforms blocking / restricting flagged securities on the black list 🗹 A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions A periodic review of the quality of the research undertaken or provided is carried out

Our exclusion policy (ie 'G'-ratings motivated by environmental, social or/and governance issues) apply to all our active investments, which represent more than 90% of our total AuMs.

Moreover, the ESG ratings of more than 5,500 issuers are circulated in real time to all our management teams. At any given time, fund managers have access to the financial and extra-financial ratings of the stocks in their portfolios and benchmark indices.

I 10.2 Indicate which methods are part of your process to integrate ESG information into fair value/fundamental analysis and/or portfolio construction.	
☐ Adjustments to forecasted company financials (sales, operating costs, earnings, cash flows)	
Adjustments to valuation-model variables (discount rates, terminal value, perpetuity growth rates)	
□ Valuation multiples	
✓ Other adjustments; specify	
See the process in LEI 10.3	
El 10.3 Describe how you integrate ESG information into portfolio weighting.	
For SRI Equity funds	
1° Analyses	
ESG analysis	
Best-in-class approach based on 3 themes: Environment, Social and Governance. ESG ratings are established on a 7-level-scale from A to G, and reflect:	
- a sector analysis to identify the specific issues/risks of each sector and to determine a weighting of the ESG criteria,	
- a company analysis according to the sector analysis grid.	
Financial analysis	
Based on a model producing a rating built upon financial ratios taking into account sector specifics.	
50 financial criteria broken down into 6 styles. Value/Growth/Momentum/Profitability/Revisions/Debt.	
The output is a financial rating determined according to a 5-level scale from -2 to +2.	
2° Combined rating	
The extra-financial and financial ratings are entered into a decision matrix which determines a combined rating, inducing the active weight of a stock in the portfolio according to these rule	s:
+2: systematic overweight	
0 /+1: used for risk control purposes	
-1: systematic underweight	
-2 exclusion	
3° Portfolio optimisation and construction	
The optimisation aims to maximise the risk/return. Principles:	
- Neutralities against benchmark,	
-Implementation of ESG rating combined with financial rating to under/overweight the stocks	
- An ex-ante active risk level which complies with the management objective,	
- Control of the portfolio turnover.

	\checkmark	Thematic		
		Describe any alteration to your investment universe or other effects.		
		Example: Green Impact Equity strategy		
		Our strategy has three distinguishing features: • We do not invest in companies with fossil fuels or nuclear activities, thus avoiding green washing.		
		We invest only in companies that have high ESG ratings, as not all companies involved in the "green business" have responsible practice.		
		 The portfolio construction is focused on diversification: thematic strategies tend to be more risky than broad based equity strategies become some strategies of the strategy, the volatility of the fund has been lower than that of the MSCI Europe because of our strong focus 		r, so risk management is key
		The initial investment universe comprises around 140 stocks. Then we apply the SRI filter (exclusion of E, F, G rated companies) and a liquidity	filter, thus excluding around 30 con	npanies. We apply our SRI
		portfolio construction principles on the 100 remaining stocks, and obtain an investment portfolio composed of around 80 stocks. Integration of ESG factors		
	•

		ESG factor and explanation		
		[Company A], a US aerospace & defense company, closed the acquisition of [Company B], a company involved in controversial weapons (a has rated [Company A] as Red at the beginning of 2018.	ntipersonnel mines and cluster mur	nitions). As a result, ISS Ethix
		ESG incorporation strategy applied		
		Impact on investment decision or performance		
		In line with Amundi's exclusion policy on controversial weapons, the ESG Rating Committee approved to downgrade [Company A]'s rating	to G, thus preventing investments in	n this company.
	✓	ESG factor 2		
	_			
		ESG factor and explanation		
		Amundi's ESG Analysis has run a study on the issue of the living wage.		
		The rationale behind this study was to analyse the possibility of setting up a living wage (meaning a remuneration to meet basic needs – funder which conditions. ESG Analysis thus decided to engage dialog with companies that could have an exposure to that issue:	nousing, food, clothing, education)	all around the world and
		- focus only on emerging market even if the issue is also relevant in developed markets, because the context is too different in developed or	ountries and in emerging countries,	
		- an extended universe: not only garment related sectors (luxury, retail sportswear) but also construction, tech, food sectors,		
		- call with 20 companies: 17 accepted to integrate the report but 4 anonymously, 3 disagreed to integrate the engagement report (but one	of them agreed to continue to dialo	g with us),
		- closely work with Japanese analyst for the 4 Japan-based companies.

Impact on investment decision or performance

The ESG Analysis model aimed at defining the exposure of each companies to that issue, based on different criteria (gap between living wage and minimum wage, freedom of association and bargaining power in countries, % of production or outsourced production in emerging countries of the companies...) in order to select the most exposed companies to living wage issue (either through their own workers or through their subcontractors). Conclusions have been released in the 2017 Engagement report, published in 2018, and engagement with companies on this issue will continue.

We evaluated companies across four areas and then issued recommendations to help them improve their performance on this theme. Strategy and Policy We analysed whether their strategy conformed to ILO conventions (182 and 138), whether policy outlined qualitative and quantitative objectives, if its scope was defined and if the cohad a specific policy on child trafficking. Implementation Analysis of implementation considers: collaboration with local entities to improve the efficiency and coverage of the policy, supply chain including risk evaluation; agricultural training increase returns; raising awareness of the issue of child labour amongst farmers and members of the communities concerned. Evaluation Companies should ensure frequent and in-depth internal and external evaluation to ensure the implementation of controls and indicators to measure performance on child labour, the of farmer training and awareness programmes, as well as a higher level of transparency on aspects that require improvement. FI 02.3 Provide a brief description of the ESG information used, highlighting any differences in sources of information across your ESG incorporation strategies. ESG analysts have access to several sources of extra-financial information:	
- brokers, who are producing an increasing number of increasingly elaborate studies on SRI and sustainable development	
- NGOs	
- Scientific reports	
- Extra-financial rating agencies	
ESG analysts have access to 9 extra-financial providers chosen for:	
- the refinement of the reference framework used for analysis	
- their coverage universe	
- the quality of their analysis and their ability to justify their ratings	
- their ability to respond quickly to new information Of these 9 providers:	
- 5 agencies produce general ESG ratings used through a screening approach	
- 2 are for monitoring controversies	
- 1 allows for the identification of companies involved in the production or sale of anti-personnel mines and cluster bombs	
- 1 is specialised in monitoring the climate/environment theme	
To complement the data supplied by these agencies, our analysts' process information is taken from a variety of sources:	
- Amundi buy-side financial analysts	
- broker research	
- press and publicly-available documents - direct contact with the companies and stakeholders	
FI 02.4 Additional information. [Optional] These various sources of analysis are an essential element of the extra-financial analysis process and have a double objective:	
- allowing the ESG analyst to verify the data and to perfect their study by targeting their questions on the identified sector and specific stakes,	
to heighten companies' awareness regarding ESG issues and thus to contribute to the improvement of the ESG reporting supplied by them.	
03 Mandatory Additional Assessed	PRI 1

2.2

Please provide more detail on how you review E, S and/or G factors in your integration process

SSA

Our Country assessment methodology (CARe)

The aim of non-financial analysis of countries, based on CARe methodology, is to measure and compare the extent to which sustainable development challenges are integrated into countries' institutional and political systems in the three aspects of ESG (Environment, Social and Governance).

These three aspects are sub-divided into nine challenges (three for the environment, four for social and two for governance) which are analysed from three angles, Compliance, Action and Results (CARe methodology), specifically:

-Compliance: ratification of treaties (Kyoto Protocol for the E aspect, Chemical Weapons Convention for the aspect, etc.)

-Actions: public expenditure, decisions and implementation (share of renewable energy in the energy mix for the E aspect, share of GDP spent on health for the S aspect, etc.)

-Results: quantifiable and measurable (CO2 emissions for the E dimension, Transparency International's Corruption Perceptions Index for the G aspect, etc.)

The nine challenges cover approximately 100 criteria.

This methodology is based on public data sources:

- UNDP - United Nations Development Programme

- Coordination of efforts to achieve the Millennium Development Goals, the main one being to halve poverty by 2015
- Action focuses: promotion of democratic government, sustainable management of resources, preventing the spread of HIV/Aids
- WHO World Health Organisation (UN institution specialising in health)
- WRI World Resources Institute: Environmental protection think tank
- Transparency International: Anti-corruption NGO

Corporate (finan

The process is the same for financial and non-financial corporates

Analysts rate companies on a scale with seven levels, from A to G. There are three stages to the non-financial assessment of companies: a pre-analysis phase, an analysis phase and a post-analysis phase.

1. Pre-analysis: Selection of analysis criteria, weightings and selection of research sources

Our E, S, G analysis grid comprises 15 generic criteria and 21 criteria specific to the sector. This reference system allows an exhaustive, normative and systematic analysis of all securities, irrespective of the asset class (equities, bonds or money market instruments).

In each of the sectors, analysts identify four to five key criteria which are weighted more heavily than other criteria.

ESG ratings are a weighted average of E, S and G ratings. The weighting varies according to the sector to which the security belongs. The choice of criteria and their weighting results from the expertise of the ESG analysis team and depend on the different sectors.

The ESG analysis team currently draws on the expertise of nine non-financial rating agencies

- five are non-specialists: Sustainalytics, MSCI, Vigeo Eiris, ISS Oekom, ISS QualityScore
- two allow tracking of controversial issues: Factiva, Reprisk
- one identifies securities involved in the manufacture of controversial weapons: ISS-Ethix
- one provides information on environmental issues: Trucost $\,$

In addition to this data, analysts handle information from a range of sources, including: brokers, NGOs, scientific reports, Amundi group financial and credit analysts, Crédit Agricole Group analysis, the press and public documents, and direct contact with the companies and stakeholders.

${\bf 2.\ Analysis:\ calculation\ and\ validation\ of\ ESG\ ratings}$

A proprietary tool for calculating, validating and disseminating ESG ratings was developed in 2009 by Amundi's IT teams. The ESG analysis teams

- validates the ratings calculated by the tool,
- makes a decision on any discrepancies,
- makes a decision regarding securities that are not monitored (at managers' request),
- makes a decision regarding securities awarded an average ESG score but which are particularly weak on one criterion (smoothing effect).

The score for a given security will depend on a combination of the different suppliers' scores, the weights assigned by analysts to the criteria depending on the sector for example.

Finally, the ESG score is the weighted average according to the weights assigned to criteria in the reference system of the scores obtained for each criterion.

The calculation tool allows total transparency in security's rating at any time.

3. Post-analysis: quantitative research

The post-analysis phase is based on the expertise of the quantitative research team and makes it possible to refine the ratings calculation algorithm, identify, in collaboration with management teams, the securities with the biggest over- or under-performance for any non-financial causes, analyse and correct any bias and enhance the pre-analysis phase. This type of analysis is conducted by sector, criterion or geographical region.

Corporate (non-financial)

The process is the same for financial and non-financial corporates.

FI 13 Voluntary Descriptive PRI 1

I 13.1 Describe your RI approach for passively managed fixed income asset

Considering responsible investment as one of its foundational pillars, Amundi has long offered investment solutions that reconcile passive management and SRI commitments.

If initially, discussions on ESG were focused on the equity side, now they are very much part of the conversation in fixed income as well.

In that context, Amundi has launched a range of equity and fixed income ETFs and index funds that offer SRI exposures:

- four equity ETFs tracking the MSCI SRI Europe, MSCI SRI US, MSCI SRI EM and MSCI SRI World indexes
- and two innovative fixed income products tracking the Bloomberg Barclays MSCI Corporate Index in the U.S. and Europe.

These last two ETFs combine Bloomberg's and Barclays' expertise in corporate indices with MSCI's ESG research capabilities. They give investors access respectively to US Dollar denominated and euro denominated investment grade corporate bonds, excluding issuers involved in alcohol, tobacco, thermal coal, military weapons, gambling, adult entertainment, GMO and nuclear power.

Beyond open-ended solutions, Amundi has the capacity to create RI bespoke solutions hand in hand with investors, both on equity and fixed income indices. To do so, our teams can either work from investors' specific exclusion lists or guidelines, or tilt or improve the profile of an existing portfolio.

Our 30 year-experience in indexing, combined with Amundi DNA on ESG, give us the flexibility to incorporate additional sets of data or requirement on any indices, including fixed income.
